

PRESS RELEASE

HCL Technologies' Open-Source Idea Platform Receives Acclaimed Industry Award

Platform Facilitates Co-Innovation with Customers

SUNNYVALE, CA and NOIDA, India—September 23, 2011—HCL Technologies, a leading IT global services provider, today announced that its employee idea exchange platform has been honored with a Forrester Groundswell Award in the Management: Innovation System category. HCL's Value Portal is an online platform where HCL employees collaborate, innovate and lead the implementation of their ideas to deliver value to HCL's customers.

The fifth annual Forrester Groundswell Awards, which recognize excellence in achieving business and organizational goals with social technology applications, were announced yesterday at the Forrester Content & Collaboration Forum in Boston.

"In our second year of the Forrester Groundswell Awards management category, now featuring mobile, collaboration and innovation programs for employees around the world, the number of quality of entries was remarkable," said **Ted Schadler, vice president and principal analyst at Forrester Research, Inc.** and co-author of *Empowered*. "The entries reflected the deep commitments that companies and governments are making in programs that empower employees to solve customer and business problems."

Through Value Portal, HCL employees provide their customers with clear visibility of a particular product or solutions implemented by customers by proactively identifying problems and providing a forum where improvements can be made and are predefined by quality, timeline and available budgets. The ideas are co-created and co-implemented with a very tight collaboration among working group members and hence it becomes much easier for the customer to measure the value realized through such initiative.

Since the Value Portal was launched in April 2007, 7,312 ideas have been generated by more than 5,000 HCL employees. Out of these, 860 ideas were implemented in phase I and have delivered total value of \$15.64 million till date.

"The Value Portal is a prime example of HCL's efforts to give employees a voice and an environment in sharing the strategic direction of the customer organizations they work with", said **Shami Khorana, President of HCL Americas**. It is gratifying to see how each HCL employee works towards creating his or her mark in the value chain". "We will continue to invest in these collaborative platforms to sustain the process of value creation and idea transfers to our customers," he added.

The Forrester Groundswell Awards were developed to support and recognize the principles outlined in the Forrester Research books *Groundswell: Winning in a World Transformed by Social Technologies* (Harvard Business Press, 2008) and *Empowered: Unleash Your Employees, Energize Your Customers, and Transform Your Business* (Harvard Business Press, 2010). More information about the Forrester Groundswell Awards is available at: <http://www.forrester.com/empowered>.
