

# HCL'S GUIDEWIRE UPGRADE SERVICES

Keeping your Guidewire implementation current, through regular updates and point releases is an important component of the Guidewire journey. Whether it is bug fixes or major upgrades, the system continues to provide more and more functionality, performance and stability over time. For each major upgrade, the following are some of the key challenges you will face:

- Assessment:** Assess your upgrade need, extent of change and methodology
  - Provisioning:** Technology & infrastructure provisioning
  - Resourcing:** Creating an onsite/offshore resourcing plan for executing and managing the change
  - Risk Planning:** Identifying possible risks and introducing mitigation measures preemptively
- At HCL, we can assist you with all of the above.

## KEY TO SUCCESSFUL UPGRADES

- Inception Phase to bring out all possible impact for planning and budgeting
- Proper environments to support Upgrade and Production fixes
- Environment sizing to be done based on the volume of data to avoid performance issues
- Parallel testing during upgrade to minimize testing cycle at the end
- Risk Based Testing to identify critical functional areas & frequently run test cases
- Enhancement freeze in production trunk
- Restrict unplanned feature requests

## PRESENTING THE HCL GUIDEWIRE UPGRADE SERVICES:

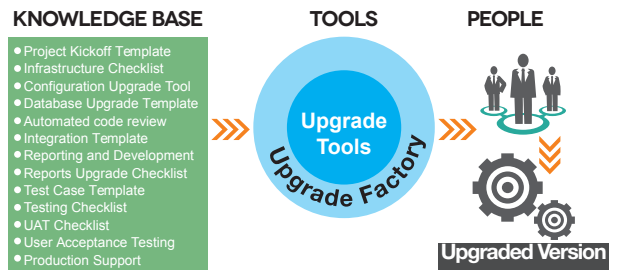

<b>Upgrade Assessment</b> <ul style="list-style-type: none"> <li>• As-is Vs. to-be Vs. OOTB analysis</li> <li>• Fit-gap</li> <li>• Which, why and when study</li> </ul>	<b>Upgrade</b> <ul style="list-style-type: none"> <li>• Technical upgrade</li> <li>• Upgrade &amp; align</li> <li>• Upgrade &amp; enhance</li> </ul>	<b>Value adds</b> <ul style="list-style-type: none"> <li>• Guidewire upgrade framework</li> <li>• Database comparator</li> <li>• Upgrade checklists</li> </ul>
---	--	--

- End-to-end services from assessment to deployment and carry-through to maintenance
- Upgrades performed in tune with the scale, complexity and unique demands of a wide spectrum of carriers
- Upgrade services that have evolved with the product version – from Version 2 right through to Version 8

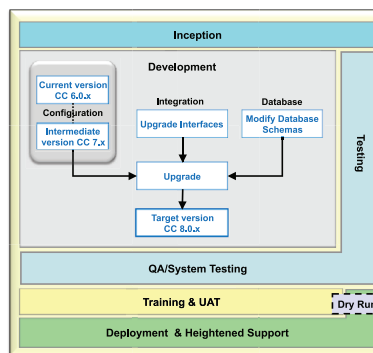

- Comprehensive ability to address upgrade needs across technology, data, infrastructure and operations
- Use of in-house accelerators specific to Guidewire upgrades that help to speed up the process

## HCL UPGRADE FRAMEWORK – THE GLUE THAT HOLDS THE SHIP TOGETHER

- Seamless upgrades
- Consistent project execution
- Reduced rework effort through use of existing knowledge base
- Templates, Tools & Techniques
- Scalable team structure

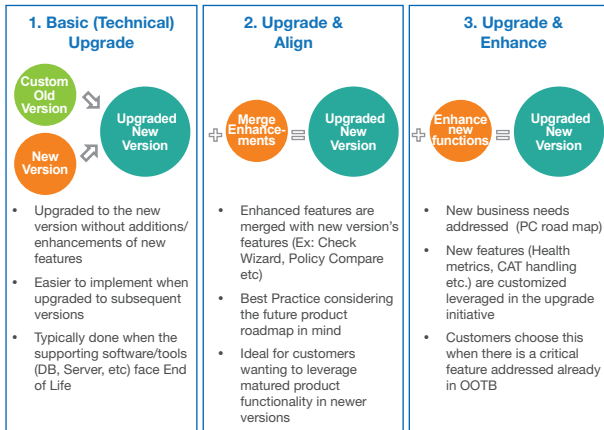

## THE TYPICAL UPGRADE LIFE CYCLE

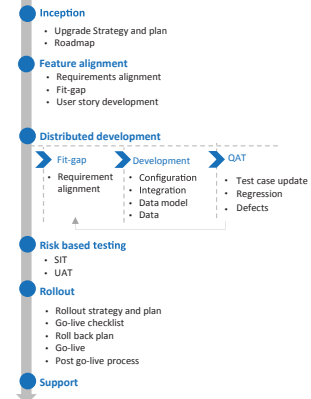

- Inception**
  - Analyze existing code base
  - Understand new changes
  - Create user stories, Estimate & plan
  - Branching and Merging strategies
- Development**
  - Upgrade Infrastructure
  - Procure tools
  - Run Guidewire upgrade tools
  - Merge changes & Parallel test
  - Retrofit & Enhance new features
  - Update test cases, test scripts
  - Parallel test development
- System testing**
  - Functional testing
  - Integration testing
  - Regression testing
  - Performance testing
- Training & UAT**
  - Complete Technical and user training
  - Update run books
  - Merge with Production hot fixes
  - Perform mock-production
  - Merge with regular support cycle
- Deployment**
  - Go-Live
  - Merge with support cycle

## THE DIFFERENT UPGRADE “FLAVORS” AVAILABLE

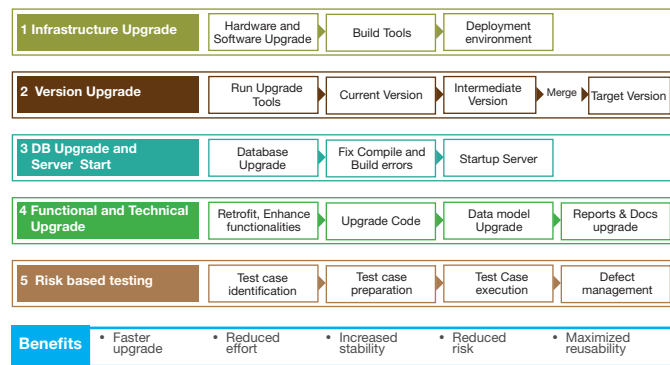

## TRANSFORMATION JOURNEY FOR GUIDEWIRE UPGRADE

## HOW DO WE ENSURE THAT THINGS GO ACCORDING TO PLAN? THESE ARE A FEW OF THE STEPS...

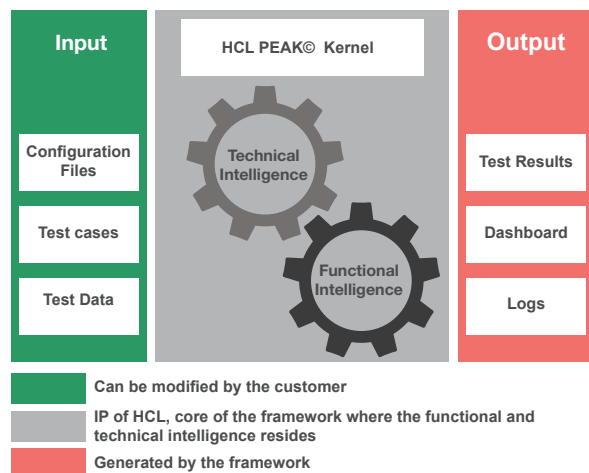

- Refined Agile Methodology for Guidewire upgrades with 10-15 days sprints
- Use short iterations and rapid prototyping
- Use continuous and distributed integration
- HCL's proprietary database comparison accelerator takes the guesswork out of data integrity assurance
- Parallel testing to minimize testing cycle at the end
- Experienced Guidewire SMEs on hand
- Strict enforcement of the discipline towards acceptance and fulfillment of feature requests
- Tools & reports to track off-shore progress

## HCL PEAK (PROCESS ENHANCEMENT AUTOMATION KIT) – THE SECRET SAUCE

HCL PEAK® (Process Enhancement Automation Kit) is a solution accelerator developed specifically for Guidewire products for upgrades and testing.

- Inbuilt functional and technical intelligence to handle application specific flows
  - Verifies functional defects and non-functional aspects (not a record & play tool)
  - Over 3000 man days of effort invested in framework
  - Comparison module
- Repository of large number of reusable automated test cases
- Ease of defining test hierarchy, test suites, customization, error handling and recovery mechanism
- Support for all tools that understand VB Scripting
