Independent

Auditor's Report

To the Shareholders of HCL Axon Proprietary Limited.

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of *HCL Axon Proprietary Limited* set out on pages 6 to 32, which comprise the statement of financial position as at 31 March 2017, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the financial statements present fairly, in all material respects, the financial position of *HCL Axon Proprietary Limited* as at 31 March 2017, and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the company in accordance with the Independent Regulatory Board for Auditors *Code of Professional Conduct for Registered Auditors (IRBA Code)*, the International Ethics Standards Board for Accountants *Code of Ethics for Professional Accountants (IESBA code)* and other independence requirements applicable to performing the audit of *HCL Axon Proprietary Limited*. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code, IESBA Code, and in accordance with other ethical requirements applicable to performing the audit of *HCL Axon Proprietary Limited*. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The directors are responsible for the other information. The other information comprises the Directors' Report as required by the Companies Act of South Africa. The other information does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Statements

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

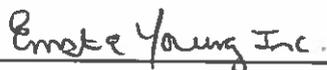

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Directors' Report

1. Directors' responsibilities

The directors are required by the Companies Act of South Africa to maintain adequate accounting records and are responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is their responsibility to ensure that the annual financial statements fairly present the state of affairs of the company as at the end of the financial period and the results of its operations and cash flows for the period then ended, in conformity with International Financial Reporting Standards.

The responsibility of the external auditors is to express an independent opinion on the fair presentation of the Annual Financial Statements based on their audit of the company. The board is satisfied that the external auditors were independent of the company during period under review.

The board is satisfied that the Annual Financial Statements fairly present the financial position, the results of operations and cash flows in accordance with International Financial Reporting Standards and the Companies Act of South Africa and supported by reasonable and prudent judgements consistently applied.

The directors acknowledge that they are ultimately responsible for the system of internal financial control established by the company and place considerable importance on maintaining a strong control environment. To enable the directors to meet these responsibilities, the Board sets standards for internal control aimed at reducing the risks of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the company and all employees are required to maintain the highest ethical standards in ensuring the company's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the company is on identifying, assessing, managing and monitoring all known forms of risks across the company. While operating risk cannot be fully eliminated, the company endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The directors are of the opinion, based on the information and explanations given by the management that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss.

2. Incorporation

The company was incorporated on 16th February, 2009 and obtained its certificate to commence business on the same day.

3. Business and operations

The company is engaged in sale, purchase, distribution, license, lease, services, manpower deployment, maintenance and consultancy of all kind related to information technology.

The operating results and state of affairs of the company are fully set out in the attached annual financial statements and do not in our opinion require any further comment.

The board is of the opinion that the company is financially sound and operates a going concern. The annual financial statements have accordingly been prepared on this basis.

4. Review of operations

The results of operations for the period are set out in the statement of comprehensive income. A net profit of ZAR 89,672,431 (2016: Profit ZAR 135,489,259) was recorded for the year under review.

5. Share capital

Nil shares were issued during the year. Unissued shares are under control of the Board of directors.

HCL Axon Proprietary Limited

(Registration number 2009/003046/07)

Audited Annual Financial Statements for the year ended March 31, 2017

Accounting policies

1. Presentation of Annual Financial Statements

The Annual Financial Statements set out on pages 6 to 32 are prepared on the historical cost basis. The company's significant accounting policies conform with International Financial Reporting Standards.

The Company has changed its accounting year to commence from 1st April of every year and to end on 31st March of following year. Consequently, the current accounting period is for twelve months from April 1, 2016 to March 31, 2017. Hence, the current year figures are not comparable to those of previous year.

1.1 Property, plant and equipment

Plant and equipment is initially recorded at cost. Cost includes all costs directly attributable to bringing the assets to working condition for their intended use.

Depreciation is recorded by a charge to statement of comprehensive income computed on a straight-line basis so as to write off the cost of the assets over their expected useful lives.

Plant and machinery	10 years
Office equipment	5 years
Computer equipment	4 to 5 years
Furniture and fittings	7 years

Property, plant and equipment under construction and cost of assets not ready for use at the year-end are disclosed as "Under Construction".

An item of equipment is derecognised upon disposal or when no future economic benefits are expected to arise from continued use of the asset. Any gains or losses on derecognition of the asset is included in the Statement of Comprehensive Income in the year in which the item is disposed. Where the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is written down to its recoverable amount through the statement of comprehensive income.

1.2 Tax

Current tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Deferred Tax

Deferred tax is provided, using the liability method, for all temporary differences arising between the tax bases of assets and liabilities and their carrying values for financial reporting purposes. Currently enacted tax rates are used to determine deferred income tax. The principle temporary differences arise from depreciation on plant and equipment, provisions and tax losses carried forward. Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which to utilise the deferred tax asset.

The Company offsets tax assets and liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority.

1.3 Leases

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at inception date of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset. A reassessment is made after inception of the lease only if one of the following applies:

- There is a change in contractual terms, other than a renewal or extension of the arrangement;
- A renewal option is exercised or extension granted, unless the term of the renewal or extension was initially included in the lease term;
- There is a change in the determination of whether fulfilment is dependent on a specified asset; or
- There is a substantial change to the asset.

Where a reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gave rise to the reassessment for scenarios a), c), or d) and at the date of renewal or extension period for scenario b).

Company as lessee

All leases are operating leases and the relevant rentals are charged to income in a systematic manner related to the period of use of the asset concerned.

Accounting policies (continued)

1.3 Leases (continued)

Company as lessor

Leases in which the Company transfers substantially all the risk and benefits of ownership of the asset are classified as finance leases. Assets given under a finance lease are recognized as a receivable at an amount equal to the net investment in the leased assets. After initial recognition, the Company apportions lease rentals between the principal repayment and interest income so as to achieve a constant periodic rate of return on the net investment outstanding in respect of the finance leases. The interest income is recognized in the statement of profit and loss. Initial direct costs such as legal cost, brokerage cost etc. are recognized immediately in the statement of profit and loss.

1.4 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is its fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses.

Internally generated intangible assets, excluding capitalised development costs, are not capitalised and expenditure is reflected in the Statement of Comprehensive Income in the year in which the expenditure is incurred. The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life is reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the Statement of Comprehensive Income in the expense category consistent with the function of the intangible assets. The following are the finite lives of the intangible assets in the company.

Category	Finite lives
Customer Relationship	10 years
Intellectual Property	5 years
Software Application	3 years
Order Backlog	3 years

1.5 Business combinations and goodwill

Business combinations are accounted using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred measured at acquisition date fair value and the amount of any non-controlling interests in the acquiree. Acquisition-related costs are expensed as incurred and included in administrative expenses.

Any contingent consideration to be transferred by the acquirer will be recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of IAS 39 Financial Instruments: Recognition and Measurement, is measured at fair value with changes in fair value recognised either in either profit or loss or as a change to Other Comprehensive Income(OCI). If the contingent consideration is not within the scope of IAS 39, it is measured in accordance with the appropriate IFRS. Contingent consideration that is classified as equity is not re-measured and subsequent settlement is accounted for within equity. Transactions costs directly attributable to the acquisition forms part of the acquisition costs.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the gain is recognised in profit or loss.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the acquire are assigned to those units.

Accounting policies (continued)

1.6 Financial instruments

Recognition

Financial assets and financial liabilities are initially recognised on the balance sheet when the enterprise becomes party to the contractual provisions of the instrument. Recognition is based on the trade date.

Measurement

Financial instruments are initially measured at fair value plus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial instrument.

Cash and cash equivalents

Cash and cash equivalents are after initial recognition measured at amortised costs. Gains and losses are recognised in profit or loss when the cash and bank balances are derecognised or impaired as well as through the amortisation process. Cash and cash equivalents comprise cash in bank and cash on short notice and money in transit.

Trade and other receivables

Trade and other receivables are after initial recognition measured at amortised cost using the effective interest rate method less any allowance for impairment. Gains and losses are recognised in profit or loss when the trade and other receivables are derecognised or impaired as well as through the amortisation process.

Interest bearing loans and borrowings

Interest bearing loans and borrowings are classified as financial liabilities held for trading and are after initial recognition carried at amortised cost using the effective interest rate method, being original debt value less principal repayments and amortisation. Gains and losses are recognised in Statement of comprehensive income when the liabilities are derecognised as well as through the amortisation process.

Intercompany loans and balances

Intercompany loans and intercompany balances are after initial recognition measured at amortised cost using the effective interest rate method. Gains and losses are recognised in profit or loss when the inter loans and intercompany balances are derecognised or impaired as well as through the amortisation process.

Trade and other payables

Trade and other payables are classified as financial liabilities originated by the enterprise and are carried after initial recognition at amortised cost using the effective interest rate method. Gains and losses are recognised in profit or loss when the trade and other payables are derecognised or impaired as well as through the amortisation process.

Derecognition

a) Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised where:

- the rights to receive cash flows from the asset have expired;
- the company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third part under a 'pass-through' arrangement; or
- the company has transferred its rights to receive cash flows from the asset and either
 - (a) has transferred substantially all the risks and rewards of the asset, or
 - (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the company has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the company's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the company could be required to repay.

Where continuing involvement takes the form of a written and/or purchased option (including a cash-settled option or similar provision) on the transferred asset, the extent of the company's continuing involvement is the amount of the transferred asset that the company may repurchase, except that in the case of a written put option (including a cash-settled option or similar provision) on an asset measured at fair value, the extent of the company's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

Accounting policies (continued)

1.6 Financial Instruments (continued)

b) Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in profit or loss.

Impairment

The company assesses at each balance sheet date whether a financial asset or group of financial assets is impaired.

i) Assets carried at amortised cost

If there is objective evidence that an impairment loss on loans and receivables carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset shall be reduced either directly or through use of an allowance account. The amount of the loss shall be recognised in profit or loss.

The company first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed. Any subsequent reversal of an impairment loss is recognised in the Statement of comprehensive income, to the extent that the carrying value of the asset does not exceed its amortised cost at the reversal date.

ii) Assets carried at cost

If there is objective evidence that an impairment loss on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, or on a derivative asset that is linked to and must be settled by delivery of such an unquoted equity instrument has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

iii) Available-for-sale financial assets

If an available-for-sale asset is impaired, an amount comprising the difference between its cost (net of any principal payment and amortisation) and its current fair value, less any impairment loss previously recognised in profit or loss, is transferred from equity to the Statement of comprehensive income. Reversals in respect of equity instruments classified as available-for-sale are not recognised in profit. Reversals of impairment losses on debt instruments are reversed through profit or loss, if the increase in fair value of the instrument can be objectively related to an event occurring after the impairment loss was recognised in profit or loss.

1.7 Provisions

Provisions are recognised where the company has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

The company recognises the estimated liability on all products still under warranty at the balance sheet date. This provision is calculated based on service histories. Employee entitlements to annual leave are recognised when leave accrue to employees. A provision is made for the estimated liability for annual leave and long service leave as a result of services rendered by employees up to the balance sheet date.

1.8 Foreign currencies

Foreign currency transactions are accounted for at the exchange rates prevailing at the date of the transactions. Gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of comprehensive income. Such balances are translated at year end exchange rates unless hedged by forward foreign exchange contracts, in which case the rates specified in such forward contracts are used.

Accounting policies (continued)

1.9 Revenue recognition

Revenue from software services comprises income from time and material and fixed price contracts. Revenue with respect to time and material contracts is recognized as related services are performed. Revenue from fixed price contracts and fixed time frame contracts is recognised in accordance with the percentage completion method under which the sales value of performance, including earnings thereon, is recognised on the basis of cost incurred in respect of each contract as a proportion of total cost expected to be incurred. The cumulative impact of any revision in estimates of the percentage of work completed is reflected in the year in which the change becomes known. Provisions for estimated losses are made during the year in which a loss becomes probable based on current contract estimates. Revenue from sale of licenses for the use of software applications is recognised on transfer of title in the user license. Revenue from annual technical service contracts is recognised on a pro rata basis over the period in which such services are rendered. Income from revenue sharing agreements is recognised when the right to receive is established.

Other revenues earned by the company are recognised on the following basis:

Interest income: As it accrues unless collectability is in doubt.

Revenue from sale of goods is recognised when the significant risks and rewards of the ownership of the goods have been passed to the buyer, usually on delivery of goods.

1.10 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective assets. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

1.11 Retirement benefits

The company's contribution to the defined contribution plan is charged to the Statement of comprehensive income in the year to which it relates.

1.12 Investments

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises the purchase price and directly attributable acquisition charges such as brokerage, fees and duties. If an investment is acquired, or partly acquired by the issue of shares or the other securities, the acquisition cost is the fair value of securities issued. If an investment is acquired in exchange for another asset, the acquisition is determined by reference to the fair value of the asset given up or by reference to the fair value of the investment acquired, whichever is more clearly evident.

1.13 Impairment

The company assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the company makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded subsidiaries or other available fair value indicators. Impairment losses of continuing operations are recognised in the Statement of comprehensive income in those expense categories consistent with the function of the impaired asset, except for property previously revalued where the revaluation was taken to equity. In this case the impairment is also recognised in equity up to the amount of any previous revaluation.

Accounting policies (continued)

1.13 Impairment (Continued)

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the company makes an estimate of recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of comprehensive income unless the asset is carried at revalued amount, in which case the reversal is treated as a revaluation increase. Impairment losses recognised in relation to goodwill are not reversed for subsequent increases in its recoverable amount.

The following criteria are also applied in assessing impairment of assets:

Goodwill

Goodwill is tested for impairment annually and when circumstances indicate that the carrying value may be impaired. Impairment is determined for goodwill by assessing the recoverable amount of each cash-generating unit (or group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash generating unit is less than their carrying amount an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets

Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cash generating unit level, as appropriate and when circumstances indicate that the carrying value may be impaired.

1.14 Inventories

Stock in trade, stores and spares are valued at the lower of the cost or net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

Cost of stock in trade procured for specific projects is assigned by identification of individual costs of each item. Cost of stock in trade, that are interchangeable and not specific to any project and cost of stores and spare parts are determined using the weighted average cost formula.

1.15 Value Added Tax

Expenses and assets are recognised net of the amount of Value Added Tax, except:

I) When the Value Added Tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the Value Added Tax is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable.

II) When receivables and payables are stated with the amount of Value Added Tax included.

The net amount of Value Added Tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

1.16 Significant accounting judgements and estimates

Judgements

In the process of applying the accounting policies, management has made no judgements, apart from those involving estimations, which have significant effect on the amounts recognised in the financial statements.

Estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities, within the next financial year, are discussed below.

Accounting policies (continued)

1.16 Significant accounting judgements and estimates(Continued)

Fair value measurement of contingent consideration

Contingent consideration, resulting from business combinations, is valued at fair value at the acquisition date as part of the business combination. Where the contingent consideration meets the definition of a derivative and thus financial liability, it is subsequently re-measured to fair value at each reporting date. The determination of the fair value is based on discounted cash flows.

The key assumptions take into consideration the probability of meeting each performance target and the discount factor.

Depreciation rates

Property, plant and equipment are depreciated on a straight line basis over the expected useful lives of the various classes of assets, after taking into account residual values. During the year management revised the estimated useful life of assets as stated in note 1.1.

Trade accounts receivable

Trade receivables that are individually determined to be impaired at the reporting date related to debtors that have been outstanding more than 365 days. These receivables are not secured by any collateral or credit enhancements.

1.17 New Standards and Interpretations

Standards and interpretations effective and adopted in the current financial year

In the current financial year, the company has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

Standard/ Interpretation: Effective date: years beginning on or after

Amendment to IFRS 11: Accounting for Acquisitions of Interests in Joint Operations (effective 1 January 2016)

Amendments to IAS 16 and IAS 38: Clarification of Acceptable Methods of Depreciation and Amortisation (effective 1 January 2016).

Amendments to IFRS 10, 12 and IAS 28: Investment Entities applying the consolidation exemption and Discontinued Operations: Annual Improvements project (effective 1 January 2016)

Amendment to IFRS 7: Financial Instruments: Disclosures: Annual Improvements project (effective 1 January 2016)

Amendment to IAS 19: Employee Benefits: Annual Improvements project (effective 1 January 2016)

Disclosure Initiative: Amendment to IAS 1: Presentation of Financial Statements (effective 1 January 2016)

Amendment to IAS 34: Interim Financial Reporting. Annual Improvements project (effective 1 January 2016)

Standards and Interpretations not yet effective

The company has chosen not to early adopt the following standards and interpretations, which have been published and are mandatory for the company's future accounting periods.

Standard/ Interpretation: Effective date: years beginning on or after

IFRS 16 Leases (effective 01 January 2019)

IFRS 9 Financial Instruments (effective 01 January 2018)

IFRS 15 Revenue from contracts with customers (effective 01 January 2018)

Amendments to IFRS 15: Clarifications to IFRS 15 Revenue from Contracts with Customers (effective 01 January 2018)

Amendments to IAS 7: Disclosure initiative (effective 01 January 2017)

Amendments to IAS 12: Recognition of Deferred Tax Assets for Unrealised Losses (effective 01 January 2017)

The provision for leave pay represents the potential liability for leave days accrued, and not utilised by staff members. The provision is expected to be utilised through employee leave days or, under exceptional circumstances, to be paid to relevant employees.

The bonus provision represents the potential liability to certain staff members for bonuses calculated based on the company's financial year performance. The amounts of the bonuses are uncertain, as the bonuses are awarded at the holding company's discretion. The bonuses are expected to be settled within 1 year.

These are mainly liquidity damages provision provided in the cases where customer suffers consequential damages because of services performed by the company, and these damages are to be borne by the company.

23. Commitments

a) Operating lease commitments

The company has entered into operating leases consisting of land and buildings. These leases are non-cancellable and have remaining lease terms of between 1 and 5 years. Certain leases include a clause for renewal, and a clause to enable upward revision of the rental charges on an annual basis based on prevailing market conditions.

The future minimum lease payments under non-cancellable operating leases are as follows:

	31 March 2017 ZAR	31 March 2016 ZAR
Not later than one year	1,179,696	1,534,044
Later than one year but not later than five years	1,651,089	695,383
	<u>2,830,785</u>	<u>2,229,427</u>

b) Capital commitments

There are capital commitments at the balance sheet date March 31, 2017 amounting to ZAR 642,009 (2016: 12,636,342)

24. Financial Instrument risk management

Financial instruments carried on the statement of financial position include cash and cash equivalents, trade receivables, trade payables and borrowings. The main purpose of the financial liabilities is to raise finance for the company's operations. The financial assets arise from normal business transactions.

The main risks arising from the company's financial instruments are interest rate risk, credit risk, foreign currency risk and liquidity risk.

The board of directors reviews and agrees policies for managing each of these risks which are summarised below.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because in changes in the market interest rates. Company's exposure to the risk of changes in market interest rates relates primarily to the company's debt with floating interest rates.

Increase / (decrease) in basis points	Effect on loss for the year increase / (decrease) (In ZAR)

HCL Axon Proprietary Limited

(Registration number 2009/003046/07)

Audited Annual Financial Statements for the year ended March 31, 2017**Notes to the financial statements (continued)****24. Financial instrument risk management(continued)****Credit risk**

Credit risk is the risk that a counter party will not meet its obligation under a financial instrument or customer contract, leading to financial loss. The company is exposed to credit risk from its operating activities (primarily for trade receivables and loan notes) and from its financing activities, including deposit with banks and financial institutions, foreign exchange transactions and other financial instruments.

Customer credit risk is managed by each business unit subject to company's policy, procedures and control relating to customer credit risk management. Credit limit are established for all customers based on internal rating criteria. Credit quality of the customer is assessed based on an extensive credit rating scorecard. The requirement for impairment is analysed on an individual basis for major clients. Additionally, a large number of minor receivables is grouped into homogeneous groups and assessed for impairment collectively.

Exposure to credit risk

At the balance sheet date, the Company's maximum exposure to credit risk is represented by the carrying amount of each class of financial assets recognised in the balance sheet as disclosed under Note 12 to the financial statements.

No collateral is held for these receivables as these receivables are considered to be reputable and credit worthy.

Financial assets that are neither past due nor impaired

Trade and other receivables that are neither past due nor impaired are creditworthy debtors with a good payment record with the Company. Cash and cash equivalents, are placed with reputable financial institutions.

Financial assets that are either past due or impaired

Information regarding financial assets that are either past due or impaired is disclosed in Note 11 (trade receivables).

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The company's exposure to the risk of changes in foreign exchange rates relates primarily to operating activities (when revenue or expenses are denominated in a different currency to the company's functional currency).

Foreign currency sensitivity

The following table demonstrates the sensitivity to a reasonable possible change in the exchange rate, with all other variables held constant, of the company's profit before tax due to changes in the fair value of monetary assets and liabilities.

Terms and conditions of transactions with related parties

The sales to and purchase from related parties are made at terms equivalent to those that prevail in arm's length transactions. Outstanding balances at year-end are unsecured, interest free (except loan from parent company) and settlement occurs in cash. There have been no guarantees provided or received for any related party receivables or payables. For the year ended March 31, 2017, the company has not recorded any impairment of receivables relating to amounts owed by related parties.

27. Retirement benefits

All eligible employees are members of the HCL Axon S.A. 319 Proprietary Ltd Pension Fund defined contribution plan administered by Liberty. The plan is governed by the Pension Funds Act of 1956. Pension contributions are made by employees with HCL Axon S.A. 319 Proprietary Ltd contributing an equal amount plus administration costs of the fund. Pension costs relating to contributions recognised in the current financial year are reflected under employee benefits in Note 3.

28. Capital management

	31 March 2017 ZAR	31 March 2016 ZAR
Share capital	87,000,000	87,000,000
Accumulated profit	485,273,983	395,601,552
	<u>572,273,983</u>	<u>482,601,552</u>

Capital includes equity shares and equity attributable to the equity holders of the parent. The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximise shareholder value. The Company manages its capital structure and makes adjustment to it, in light of change in economic conditions. To maintain the capital structure, the company may issue new shares.

(Registration number 2009/003046/07)

Audited Annual Financial Statements for the year ended March 31, 2017**Notes to the financial statements (continued)****29. Remuneration to directors and key management personnel**

Some of the directors and key management personnel of the Company are also directors and key management personnel in other group companies within the HCL group and all of these companies together are viewed as one business unit and their remuneration is paid by the ultimate parent Company. The directors do not believe that it is practicable to apportion the remuneration paid between their services as directors and key management personnel of the Company and their services as directors and key management personnel of the other group companies within the HCL group.

Non-executive directors' (Luyolo Poswa) fees reflect their services as directors and services on various sub-committees on which they serve. Total remuneration paid for their services in current Period is ZAR Nil (PY ZAR Nil), non-executive directors do not earn attendance fees.

Non-executive directors do not participate in any incentive schemes or plans of any kind.

30. Financial Leases

The future minimum sub lease payments expected to be received under non cancellable sub lease of equipments and applicable software licences are as follows:-
