

FOR IMMEDIATE RELEASE

HCL and Celestica Form Innovative Joint Venture

Integrated Offering Accelerates Concept-to-Manufacturing Solutions for Global OEM Customers

November 14, 2006 – Sunnyvale, CA and Toronto, Ontario – **HCL Technologies Ltd. ("HCL")**, a leading global engineering, R&D, IT services, and business process outsourcing firm, and **Celestica Inc. (NYSE, TSX: CLS)**, a world leader in electronics manufacturing services (EMS), today announced that the two companies have entered into an agreement to form a joint venture to provide complete concept-to-manufacturing (C2M) solutions for original equipment manufacturers (OEMs). Through this collaborative venture, the two companies are driving change in an increasingly competitive market by offering seamlessly integrated design, manufacturing and supply chain solutions. This is the first joint venture of this kind in the electronics industry.

Historically outsourcing has often involved multiple suppliers handling various aspects of the product lifecycle. This joint venture will provide a fully integrated product lifecycle solution to OEM customers – including product concept, design, engineering, manufacturing, fulfillment, sustaining engineering, reverse logistics and after-market services. HCL's broad and scalable design engineering capabilities combined with Celestica's existing strengths in hardware design for manufacturability and supply chain integration create an exciting new alternative for OEMs seeking time-to-market and total cost advantages.

This joint venture cements an existing three-year relationship between the two companies, through which HCL and Celestica have successfully provided integrated solutions to customers across the telecom, enterprise, consumer, medical, aerospace and semiconductor sectors. HCL's strength in software development complements Celestica's hardware focus and is already being leveraged in Celestica's existing Solutions Accelerator platforms for server blades, WiMAX, ATCA and storage equipment.

"By recognizing the increasing complexity of the marketplace, including rapidly changing customer demand, and the difficulties of managing multiple partners at different stages

of the product lifecycle, a new market is being created through this joint venture. It removes a level of complexity, allowing OEM customers to focus on their core business and strategic initiatives,” said Vineet Nayar, President, HCL Technologies.

“Our customers are increasingly being challenged to compress their concept-to-manufacturing schedule,” said Dave Tiley, Senior Vice President, Global Services, Celestica. “This exciting joint venture between two world-class companies creates a highly integrated, flexible offering that enables OEMs to focus on IP generation while Celestica and HCL focus on time-to-market and total cost of ownership.”

The venture is aligned with HCL’s blue ocean strategy to create uncontested market spaces and create additional value for its customers, as well as Celestica’s strategic mandate to continually bring cost and time-to-market benefits to customers through its integrated global services and solutions. This strategic alignment will provide a unique proposition of a single point of contact for OEM customers – from concept to manufacturing – leveraging the strength of both industry leaders.

About HCL Technologies

HCL Technologies is one of India’s leading global IT Services companies, providing software-led IT solutions, remote infrastructure management services and BPO. Having made a foray into the global IT landscape in 1999 after its IPO, HCL Technologies focuses on Transformational Outsourcing, working with clients in areas that impact and re-define the core of their business. The company leverages an extensive global offshore infrastructure and its global network of offices in 16 countries to deliver solutions across select verticals including Financial Services, Retail & Consumer, Life Sciences, Hi-tech and Manufacturing, Telecom and, Media and Entertainment. HCL Technologies, along with its subsidiaries had revenue of US \$ 1.058 billion (Rs. 4797 crore) for the twelve month period ending 30th September 2006, and employed 36,452 professionals.
