HCL Technologies Launches New 5G Applications for Global Mobile Network Operators

BARCELONA, SPAIN and NOIDA, INDIA, March 1, 2022 – HCL Technologies (HCL), a leading global technology company, has launched two new 5G applications to help mobile network operators optimize customer experience and reduce energy consumption across their 4G and 5G infrastructure. HCL's Quality of Experience (QoE) and Energy Savings applications are built on HCL's [Augmented Network Automation \(ANA\) Platform](#), developed by its Industry Software Division. The HCL ANA Platform is HCL's next-generation network optimization solution that enables mobile operators globally to effectively manage their 5G and 4G services, by automating multi-vendor and multi-technology deployments in cloud or on-premise environments.

To improve network performance in places with high traffic congestion, such as city centers and large sporting events, HCL's QoE application allows mobile network operators to provide seamless, fast and reliable 5G services, by using artificial intelligence (AI). HCL's Energy Savings application reduces the operating costs of delivering 5G, using AI-based network automation capabilities. By analyzing traffic patterns, the application identifies where network infrastructure can be temporarily powered down during off-peak times, such as at night, without impacting the quality of experience for mobile subscribers.

"Our telecommunications portfolio represents our multi-year strategy to develop innovative products for network operators and enterprises globally," said Sukamal Banerjee, Corporate Vice President and Head of Industry Software Division, HCL Technologies. "Many of the world's largest mobile network operators have experienced how HCL's innovative software products can optimize their networks and build a 5G world through next-generation AI and automation. As the industry continues to adopt the Open Radio Access Network (O-RAN) architecture to unleash the power of 5G and beyond, HCL Technologies is well positioned to support them with its innovative HCL ANA Platform."

HCL Technologies will be at MWC 2022 in Barcelona from February 28 to March 3, 2022, at booth 2E30 in Hall 2. Visit us to discover more about our telecommunications portfolio.

About HCL Technologies

HCL Technologies (HCL) empowers global enterprises with technology for the next decade, today. HCL's Mode 1- 2-3 strategy, based on its deep-domain industry expertise, customer-centricity and entrepreneurial culture of Ideapreneurship™, enables businesses to transform into next-gen enterprises.

HCL offers its services and products through three business units: IT and Business Services (ITBS), Engineering and R&D Services (ERS) and Products & Platforms (P&P). ITBS enables global enterprises to transform their businesses through offerings in the areas of applications, infrastructure, digital process operations and next generational digital transformation solutions. ERS offers engineering services and solutions in all aspects of product development and platform engineering. P&P provides modernized software products to global clients for their technology and industry specific requirements. Through its cutting-edge co-innovation labs, global delivery capabilities and broad global network, HCL delivers holistic services in various industry verticals, categorized as Financial Services, Manufacturing, Technology & Services, Telecom & Media, Retail & CPG, Life Sciences & Healthcare and Public Services.

As a leading global technology company, HCL takes pride in its diversity, social responsibility, sustainability and education initiatives. For the 12 months ended Dec. 31, 2021, HCL had consolidated revenue of US\$11.18 billion. Its nearly 198,000 idepreneurs operate out of 52 countries.
