HCL

ADvantage Simplified Platform for Application and Digital Enterprise Transformation

ADvantage Simplified Platform for Application and Digital Enterprise Transformation (SPADE) is a 'low touch' solution to turbo charge your migration to a newer version of the Blue Yonder WMS. It automates and simplifies the migration of the configuration, and master data from various older versions of the Blue Yonder WMS to a newer version. ADvantage SPADE can be deployed as Public Cloud/Private Cloud or on-premises solution.
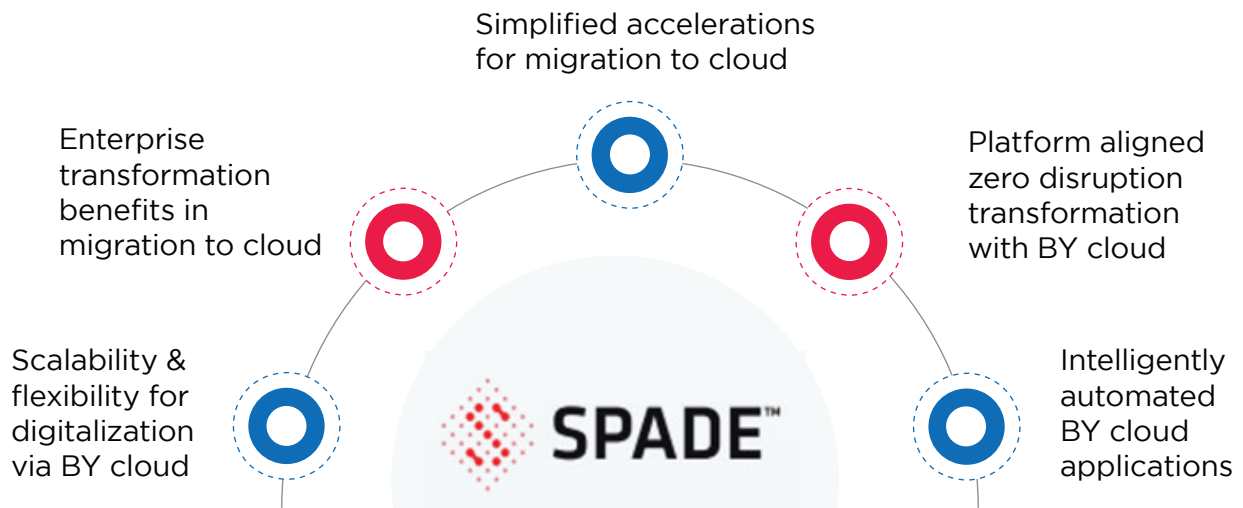

ADvantage SPADE helps organizations prepare, analyze, adopt and execute migration to a new version of Blue Yonder WMS. Designed with best practices guidelines for migration, ADvantage SPADE has built-in business data extractors and upgrade accelerators that turbo charge the migration journey for end-customers, helping them migrate at scale and speed.

ADvantage SPADE is adaptable in terms of a migrating data from any older version of Blue Yonder WMS to any newer version of Blue Yonder WMS. Regardless of whether your instance is on-premises, in the cloud, or part of the Blue Yonder SaaS Solution. It assures zero disruption transformation and can be executed independently, so that the source and target systems are not affected.
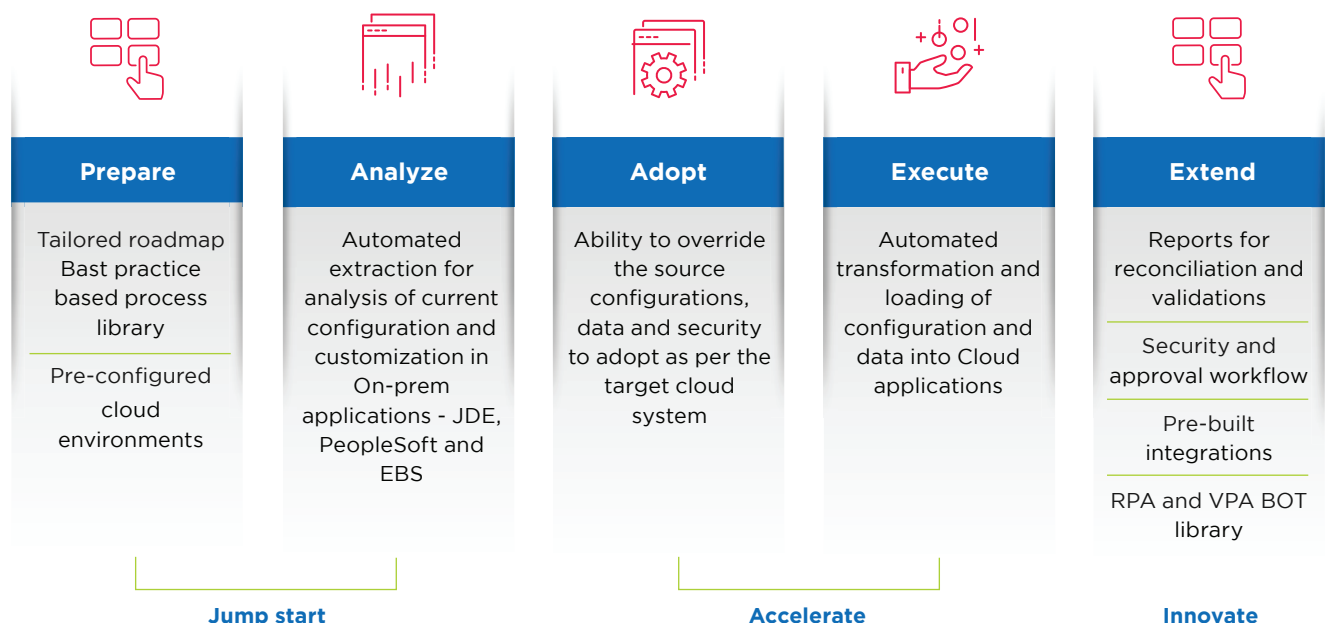

Solution highlights

For companies looking to migrate to a newer version of Blue Yonder WMS, the biggest challenge lies in data migration due to volume, complexity, validation and reconciliation.

ADvantage Simplified Platform for Application Digital Enterprise Transformation

Simplified accelerations for migration to cloud

Enterprise transformation benefits in migration to cloud

Platform aligned zero disruption transformation with BY cloud

Scalability & flexibility for digitalization via BY cloud

SPADE™

Intelligently automated BY cloud applications

ADvantage SPADE is a unified platform to discover, prepare, accelerate, adopt and extend your migration journey with built-in flexibility, extreme automation, transparency to give you a head-start on your digital journey-faster, better, with lower TCO and mitigated risk.

Intelligent automation

Prepare	Analyze	Adopt	Execute	Extend
Tailored roadmap Bast practice based process library	Automated extraction for analysis of current configuration and customization in On-prem applications - JDE, PeopleSoft and EBS	Ability to override the source configurations, data and security to adopt as per the target cloud system	Automated transformation and loading of configuration and data into Cloud applications	Reports for reconciliation and validations
Pre-configured cloud environments				Security and approval workflow
				Pre-built integrations
				RPA and VPA BOT library

Jump start   **Accelerate**   **Innovate**

- Pre-built auto extraction of business process

- Built-in impact analysis and usage analysis for customizations

- Identification of current configurations and customizations

- Best practice-based process library for Blue Yonder WMS

- Auto configurations and migration of data

- Reconciliation reports for every data loading

- Field-tested iterative methodology

- Multiple data source extraction which includes Cloud to Cloud migration

- Value adds- reports, dashboards, integrations, RPA/Chatbot

Key Features

- Any complex data transformation can pe performed at scale and speed within lesser time and business team involvement

- Reduces the risk of human error through automation

- Accelerates conversion by 50-60%

- Simple to deploy for specific geography and locations

- Reduces overall implementation time & costs by up to 30%

- Simplifies and ensures a smooth and efficient transition to the cloud

- Leverages an ability to override pre-built mapping & reconciliation reports to ensure quality transformation

- Open source technology to avoid software licensing issues

Benefits

HCL
