

Factory + for **SAP S/4HANA**

Safely move your ECC system into the digital future

The benefits of digital ERP + minimal business change

You've spent years investing in SAP ERP – customizing processes and working hard to build a system that reflects your business. The resulting ECC system likely supports your business needs today – but will it drive business growth tomorrow?

Existing ECC systems rely on legacy technology, and your code customizations were designed for this old SAP infrastructure. This means that new ECC investments won't drive long-term ROI – and costs for maintaining legacy technology will only rise.

The good news is that conversion to SAP S/4HANA brings the agility, scalability, access to SAP innovations, and the competitive advantage that comes with implementing a new intelligent ERP – but at a significantly lower cost and risk than implementing a new system.

Whether your existing ECC system is heavily customized, or you just want to keep your core system design as-is, a conversion using HCLTech's Factory+ is the lowest-risk way to move to digital ERP – without the need for significant capital investment or disruptive business change.

HCLTech's Factory + allows you to:

Protect your ECC investments

Retain the code you need, retire what you don't, drive down TCO

Retain existing data and assets

Optimize your processes

Take advantage of our deep SAP expertise across industries

Deliver business benefits

Faster book closure, eliminate reconciliations, one source of truth, better insight into operations, reduced data footprint, improved UX, real time supply chain planning

Leverage new technologies

Innovate and drive incremental value with technology such as Business Technology Platform, SAP iRPA and Fiori

Low-risk industrialized migration + custom code optimization = **lower TCO**

HCLTech's Factory+ multi-disciplinary team reduces conversion timelines using our automated industrialized delivery model and proprietary tools. This is supported by highly-qualified conversion specialists – combining the reliability of automation with the flexibility and skills HCLTech has built a reputation on.

The key building blocks of HCLTech's Factory+ are:

Simplification
experts

Automated code
remediation

Automated
regression testing

Automated
data transformation

HCLTech's Factory+ tools reduce custom code adaptation effort by **25 to 55%**

Factory+ is supported by an HCLTech developed toolset that has been optimized for intelligent automation – delivering faster migrations, even for systems with a high level of bespoke development. Our proprietary **custom code disposition and benchmarking tool** advises which code to retire, retain, simplify, or convert into cloud extensions.

What does the plus in **Factory+** mean?

Factory +

Preparation for your
SAP S/4HANA
journey

Factory +

Industrialized
Full-Service
Conversion

Factory +

Future roadmap

Factory +

Futureproofed
SAP landscape

Benefits realized: **Factory +** success stories

Factory + has been designed to deliver significant benefits for customers using on-premise ECC in all industries. For example:

IT Services

Performing real-time analytics on transaction data led to a 25-40% reduction in processing time and a 50% reduction in global payroll processing time

Chemicals

Migration led to a 33% increase in MRP performance and a 55% faster release of the monthly forecast due to improved financial closing

Media

Enabled a leaner, more agile organization with optimized processes and real-time analytics

Oil & Gas

Migration to S/4HANA enabled real-time decision making, streamlined and optimized processes, improved productivity through Fiori apps, and enabled tight integration with satellite apps via the SAP Business Technology Platform

Conversion packages mapped to your business needs

To keep things simple and affordable, we offer fixed-scope packages with T-shirt sized pricing. Packages can also be supplemented with additional services, including business partner conversion, prerequisite upgrades, additional Fiori activation, archiving/rightsizing, cloud infrastructure provisioning, or integration with other applications.
