

Accelerate your
digital transformation journey
with AI & ML solutions

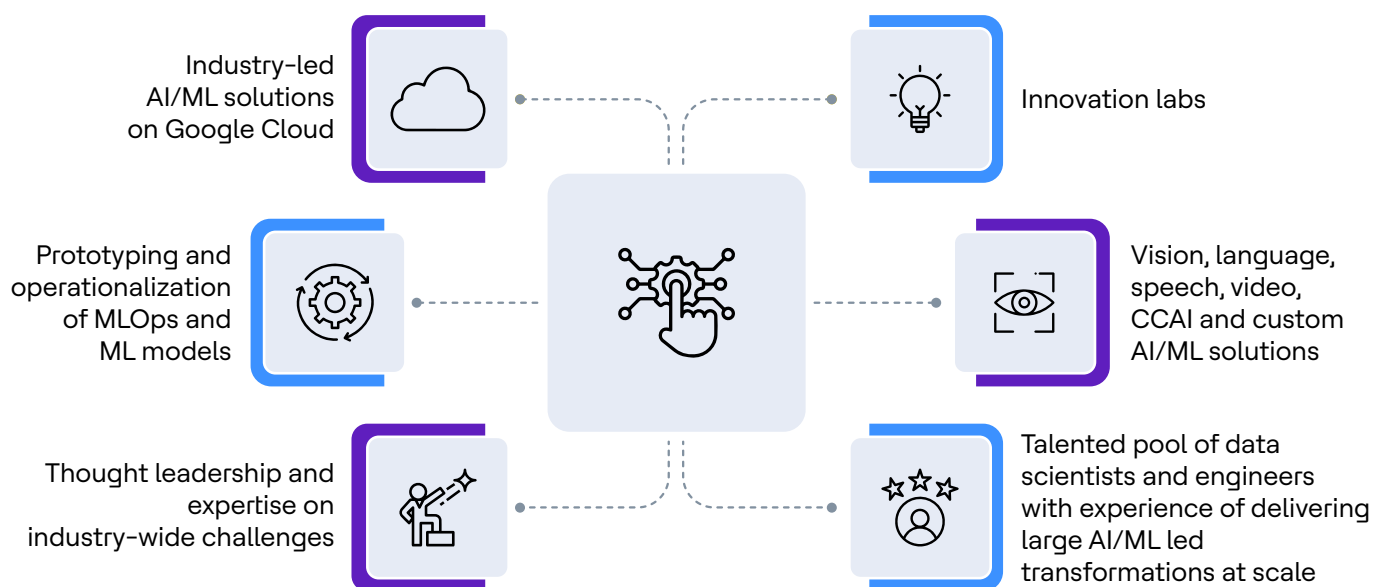

Unlock new value streams

Discover how our AI and ML solutions can help you to democratize the use of data and become data driven and customer centric. Read our customer success stories to find out how we are helping our customers with ready-to-use and custom-built AI solutions across industries and geographies to accelerate their journey to digital transformation, creating new value streams, and enabling clients to take smarter decisions

What we offer

Our USPs

Our AI/ML solutions are driven by a strong technology partner ecosystem and guiding principles which advocate accountability, safety, privacy and scientific excellence.

12K

Google Cloud resources

+200

Successful global projects

+300

Data and AI certified experts

+75

Google Cloud expertise

+250

GCP certified data scientists and specialists

+60

IPs and Accelerators helping clients expedite their digital transformation journey

The challenges we solve

Adoption of AI —
how, when and
why

Democratization
of Data, AI, and
Analytics

Data led
transformation for
creating new value
streams

Data monetization,
activation and
decision making

How we solve these challenges

Our proprietary solutions, IPs
and Accelerators

Initial assessment, use case
feasibility and building a
roadmap for AI adoption
at scale

Helping enterprise customers
build AI/ML CoEs and upskill
talent

Time-tested AI/ML delivery
framework for developing and
operationalizing AI/ML
solutions

Scalable and re-usable
solutions for data life cycle
management — ingestion,
transformation, governance,
testing, security and valuable
insights

Years of experience
building industry-specific
AI/ML solutions built by SMEs

The building blocks of our solutions

- Pre-trained API's & AI solutions
- Custom AI with Auto ML models with a no-code approach
- Build and Deploy AI from scratch using core tools & IP's

The benefits

- Speed to insights and productionizing AI with the help of HCLTech's IPs and Accelerators
- Multiple decades of experience delivering best practices and excellence
- Agile based approach for MLOPs orchestration with better coordination between data scientists, IT, and business stakeholders.
- Trusted and proven methods to enhance the AI maturity of organizations
- Knowledge sharing with customers on best practices and post implementation support for smooth transition

Customer success stories

We empowered the world's largest express company by building a secure infrastructure with AI/ML capabilities to protect the business from security threats, unauthorized access and to track anomalous activities in the network.

Value delivered

- 15% in cost savings by designing reusable and customized data ingestion and an integration solution
- +\$25K in monthly savings by following Google best practices
- Prevention of security breaches and threats by restricting any suspected network access
- Detecting the presence of hackers quickly to reduce the damage

We helped a leading Healthcare company in the US build AI/ML intelligence in infrastructure and IT operations by using GCP capabilities to drive better process efficiencies.

Value delivered

- Real-time insights and diagnosis reports for smart decision-making
- AI-led incident routing and early warning systems for predictive maintenance
- Data cataloging for search and easy reference
- MLOPs for enterprise-wide productivity
- Scalable process reducing onboarding time for new data integration
