

DRIVE.SmartKey

For enhanced flexibility,
convenience and security

Overview

DRIVE.SmartKey is an innovative solution that authorizes your smart device and converts it into a key which can be used to access and operate a connected device, be it a car, an industrial asset, or any other. SmartKey provides fleet managers with advanced features to reduce operational complications and improve productivity.

DRIVE.SmartKey offers multiple use cases for fleet operators, automotive OEMs, smart city applications and industrial assets. The cloud solution is designed on an architecture driven by Connected Car Consortium (CCC) standards and provides multi-level authentication (UWB/BLE/NFC).

Key Features

Drive.SmartKey delivers a range of features designed to enhance user experiences, including

Time-based/user-based access (Remote Access Vehicle Management)

Welcome controls, approach and departure experience

Hyper-personalization

Digital glovebox and document sharing

Benefits

The solution provides comprehensive benefits ranging from safety, convenience, comfort and contingency support. They include:

SmartKey security features to enhance user safety and security

Authorized functions for different users

Personalization and preferences settings

Monitoring utilization of assets
