

DRIVE.Fleet

Smart fleet management for complete
control and better tracking

Overview

DRIVE.Fleet (powered by PICASSO) by HCLTech enables smart fleet management of connected vehicles. It allows horizontal and vertical integration with ecosystem data and enterprise systems, providing complete control over the fleet and its activity.

DRIVE.Fleet helps fleet operators across various markets and segments to strengthen their businesses and implement newer business models with shorter go-to-market timelines.

An AWS-supported cloud solution, DRIVE.Fleet:

- Offers multi-layered and modular business functions for pick-choose feature implementation
- Is easily extendable and customizable with the ability to create new and relevant features
- Has data ownership with the customer with potential monetization opportunity

DRIVE.Fleet Smart Fleet Management

DRIVE.Fleet's Smart Fleet Management capability provides fleet managers with advanced tools to enhance fleet tracking, reduce workloads and improve fleet productivity through efficient operations by streamlining maintenance programs.

Key Features

- Live vehicle tracking and geo-fencing
- Driver behavior tracking
- Trip analysis
- Vehicle condition monitoring (diagnostic and prognostic services)
- Customizable dashboards

Benefits

Speed-to-Market as-a-service and software/connectivity/data-led revenue streams are the major outcomes delivered by the solution. It also provides flexibility to onboard new business solutions using customizable and extendible architecture. Some of the key benefits include:

- Remote fleet management
- Increased vehicle lifespan
- Reduced cost and increased revenue
- Real-time notifications and theft alerts
- Compilation of fleet data and monetization opportunities
