

NexALM CoE

In recent years, with advent of embedded systems and software the nature of conventional products and the entire product development lifecycle of undergoing major transformation. The products are becoming smarter and more connected through adoption of various technologies like IoT, analytics, machine learning and artificial intelligence. The traditional product lifecycle having mechanical, electrical, hardware and software components developed in silos is changing to become more systems driven with Integrated Systems Engineering view becoming central.

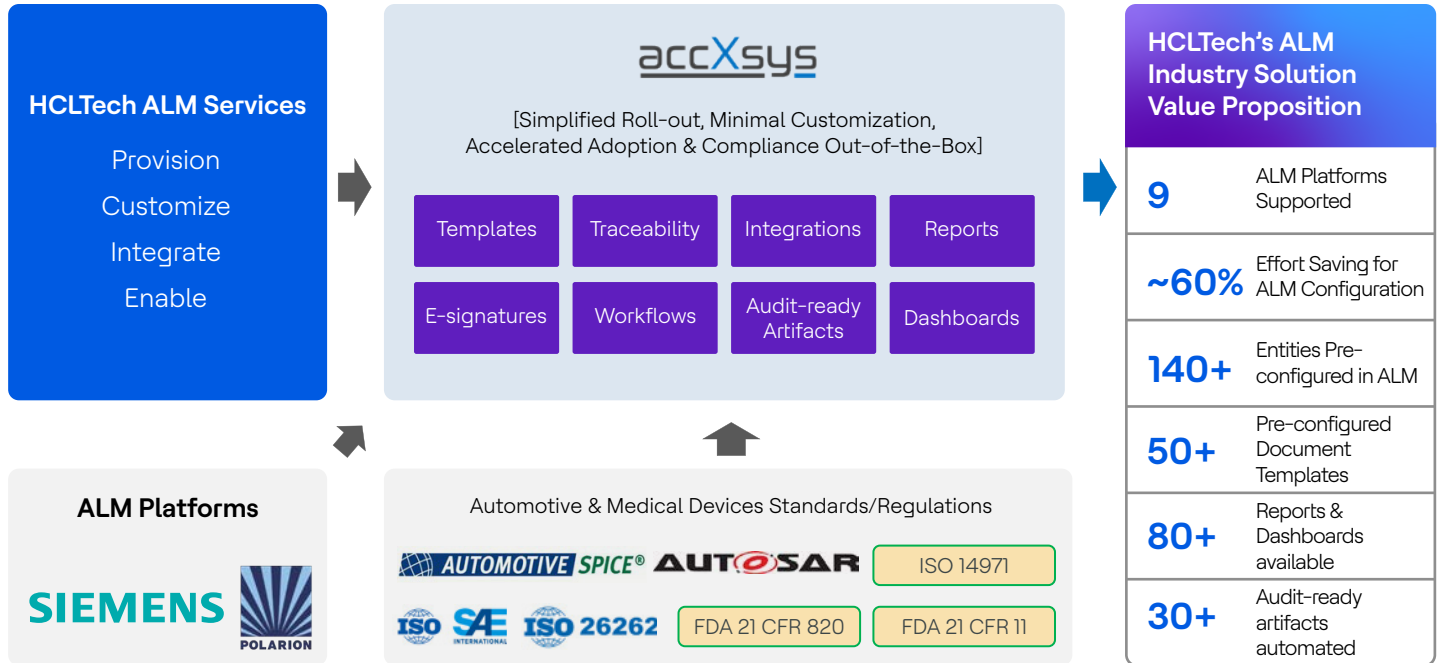

HCLTech has established a dedicated R&D Unit, nexALM CoE, focusing on providing Services & Solutions for all ALM Platforms. Our offerings are targeted for Automotive, Medical, Aerospace & Defense, Industrial, Telecommunications, Semiconductor and Hi-tech verticals addressing the specific needs as per relevant industry standards (ISO, ASPICE, FDA, FAA, DO178B/C, etc.).

NexALM CoE Offers Services for ALM Commissioning, Implementation (Configuration, Customization), Data Migration, Adoption Support & Integrations

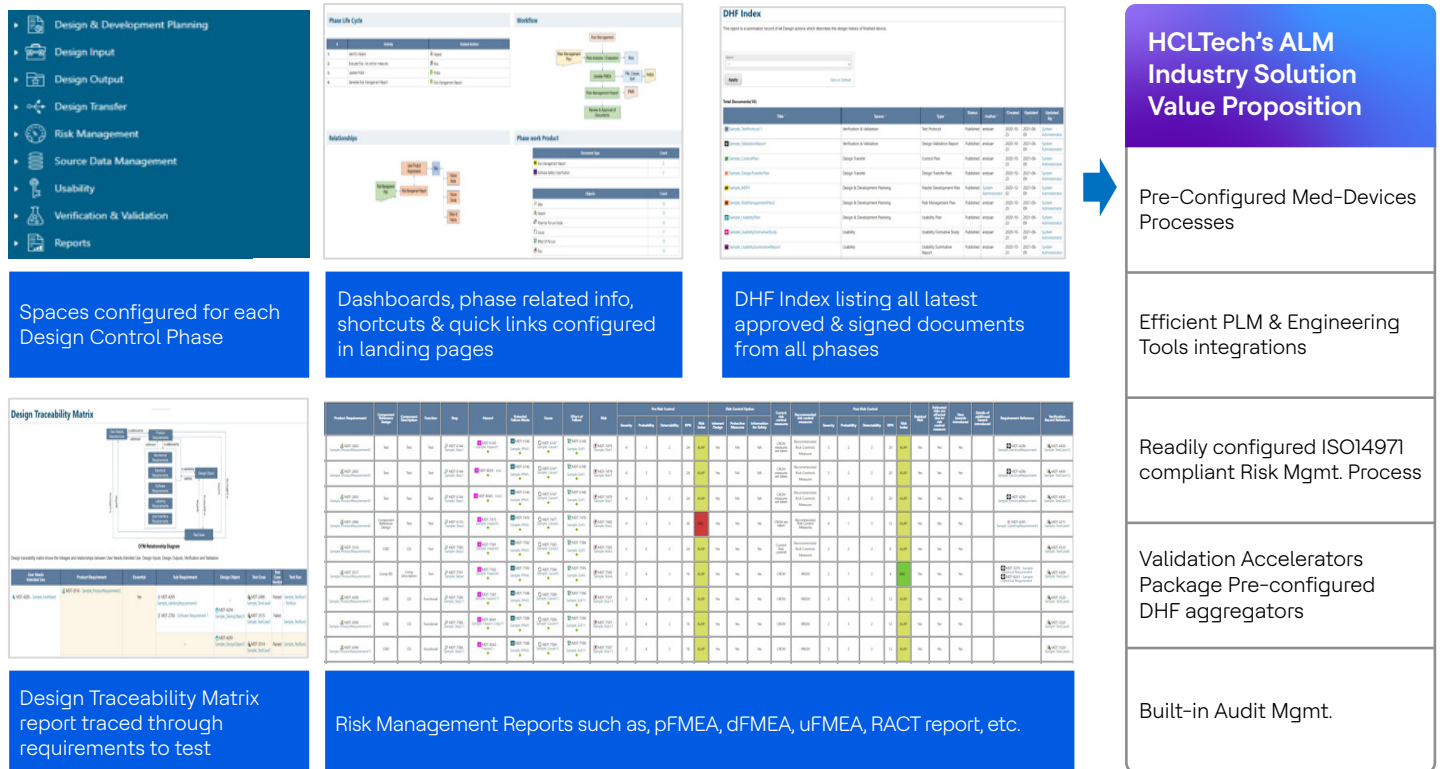

accXsys - Industry Solution Templates for Siemens Polarion ALM

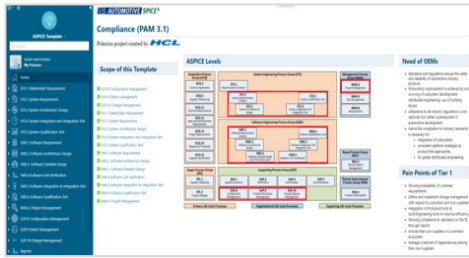

accXsys is Templated Industry Solutions designed for Siemens Polarion ALM to enable accelerated adoption and enabling compliance with standards & regulations for Automotive & Medical Devices Industries

Medical Devices Solution Template for Siemens Polarion ALM

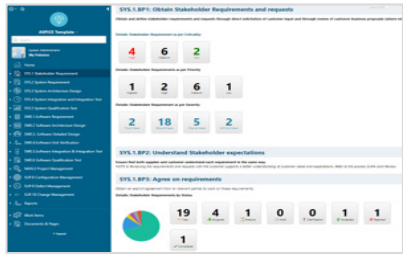

Automotive Solution Template for Siemens Polarion ALM

Automotive compliant templated industry solution

Phase-wise organized spaces

Base practices listed on every phase

Key Highlights Of accXsys

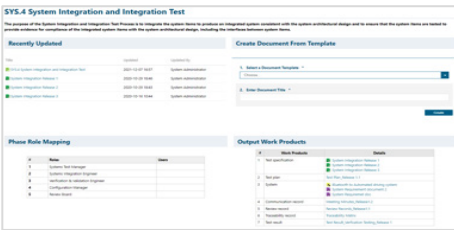

Templated solutions catering to Industry Standards like ASPIICE, ISO 26262 and CMMI, etc.

Efficient PLM & Engineering Tools integrations

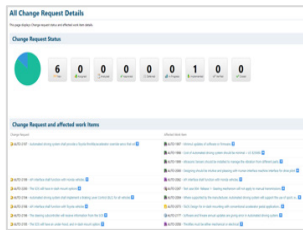

Audit Ready Documents and Reports

Ready to use CM Strategy

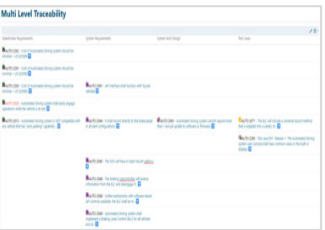

Seamless Risk Management process with FMEA/Hazard Analysis

Ready to use document templates and quick access to all output work products

Customized Reports and Dashboards

Solution benefits

 Pre-configured processes and industry standards

 Compliant Audit Ready Documents and Reports

 Built-in Audit Mgmt. with Automatic creation of Audit Report from findings

 Efficient PLM & Engineering Tools integrations for visibility into product and engineering artifacts

 Ready to use CM Strategy for Software Management Process
