

Migrate your SAP environment with speed and reliability

The challenge of migrating SAP applications to the cloud

Organizations embarking on their digital transformation often struggle with the complexities of migrating SAP to the cloud. A major reason is that SAP is a deeply integrated workload and migration requiring teams to carefully consider all aspects of the enterprise: infrastructure, processes, customizations, and other dependencies. The HCL Amazon Web Services (AWS) Business Unit (HCL AWS BU) can work closely with your organization to build a migration plan that accounts for these needs and streamlines the overall migration process.

HCL AWS BU: Experienced in SAP migration

Enterprises undergoing digital transformation can accelerate SAP modernization by working with a partner that has the experience migrating and operating SAP workloads on the cloud. HCL, an AWS SAP Premier Consulting Partner, works closely with customers to migrate their SAP workloads, deploy them on AWS, and manage them when running on the cloud. HCL can accelerate your SAP transformation journey by offering IP-based tooling and best practices derived from more than 40 years of executing large-scale technology modernization.

Outcomes of working with the HCL AWS BU

Improve agility, simplify operations, and unlock SAP innovation

Leverage deep expertise to optimize deployments and streamline cloud adoption

Right-size your environment and reduce your SAP total cost of ownership (TCO)

HCL differentiators

- ✓ AWS Premier Consulting Partner
- ✓ 2,000+ certified and 10,000+ trained AWS resources
- ✓ Innovative IPs and frameworks
- ✓ Multiple AWS competencies
- ✓ AWS Center of Excellence
- ✓ Unique cloud-native strategy
- ✓ Advanced service delivery model

Why trust AWS and HCL to run SAP?

AWS is the most reliable cloud to run your SAP workloads, providing the longest track record of cloud success and supporting more than 5,000 active SAP customers. Work with HCL to get the assistance you need to execute your migration and undergo transformation. We have over 2,000 AWS-certified resources and over 10,000 trained AWS specialists on our team. Based on this experience, HCL is uniquely positioned to manage the move of your business-critical SAP applications and operations to AWS.

Work with HCL on the following engagements

RISE for SAP

Move to the as-a-service model of RISE with SAP using HCL's digital and application capabilities, while leveraging existing investments in SAP configuration and extensions.

AWS Migration Acceleration Program (AWS MAP) for SA

Accelerate and reduce the cost of SAP migration with tools, best practices, and AWS service credits.

AWS Center of Excellence (CoE)

Work with our dedicated SAP on AWS Center of Excellence (CoE) team to gain specialized assistance deploying and managing SAP workloads on the cloud.

The HCL SAP to AWS migration method protects business integrity

Governed by HCL's 360-degree cloud migration framework, HCL offers tailored services for SAP applications. The framework encompasses end-to-end support, from consultation and design to migration and management.

EXPERIENCE

Strategize, assess, install, and support

- Consultation and planning
- Proof of concept
- Design and build
- Installation and upgrade
- Migration and transformation
- Customization and development
- Technical and functional support
- SAP quality awards

OPTIMIZATION

Performance and modernization

- SAP lifecycle management
- DevOps automation and modernization
- Data migration
- Extension integration and orchestration
- Cost optimization
- System performance tuning

MAINTENANCE

Transformation and patch management

- SAP S/4HANA
- SAP BW/4HANA
- Patch management
- Backup and disaster recovery
- System monitoring and management
- Service desk/SLA management
- OS/DB/AWS/BASIS administrationSAP Quality Awards
