

Smart Fleet Management

Delivering advanced intelligence for fleet operators

HCLTech Smart Fleet Management enables easy access and integration of data from vehicles, ecosystems, and enterprise IT systems to provide advanced intelligence, connected vehicles use cases and generate actionable insights for monetization opportunities. This solution enables comprehensive connectivity, resiliency, robustness, and enhanced security by leveraging the power of the cloud to deliver connected fleet-specific business services. It helps organizations & partners in reducing time-to-market and provides fleet managers with advanced tools for efficient operation and streamlining maintenance programs.

Key industry use cases

Fleet tracking & vehicle management

Logistics management & goods condition monitoring

Autonomous vehicle management

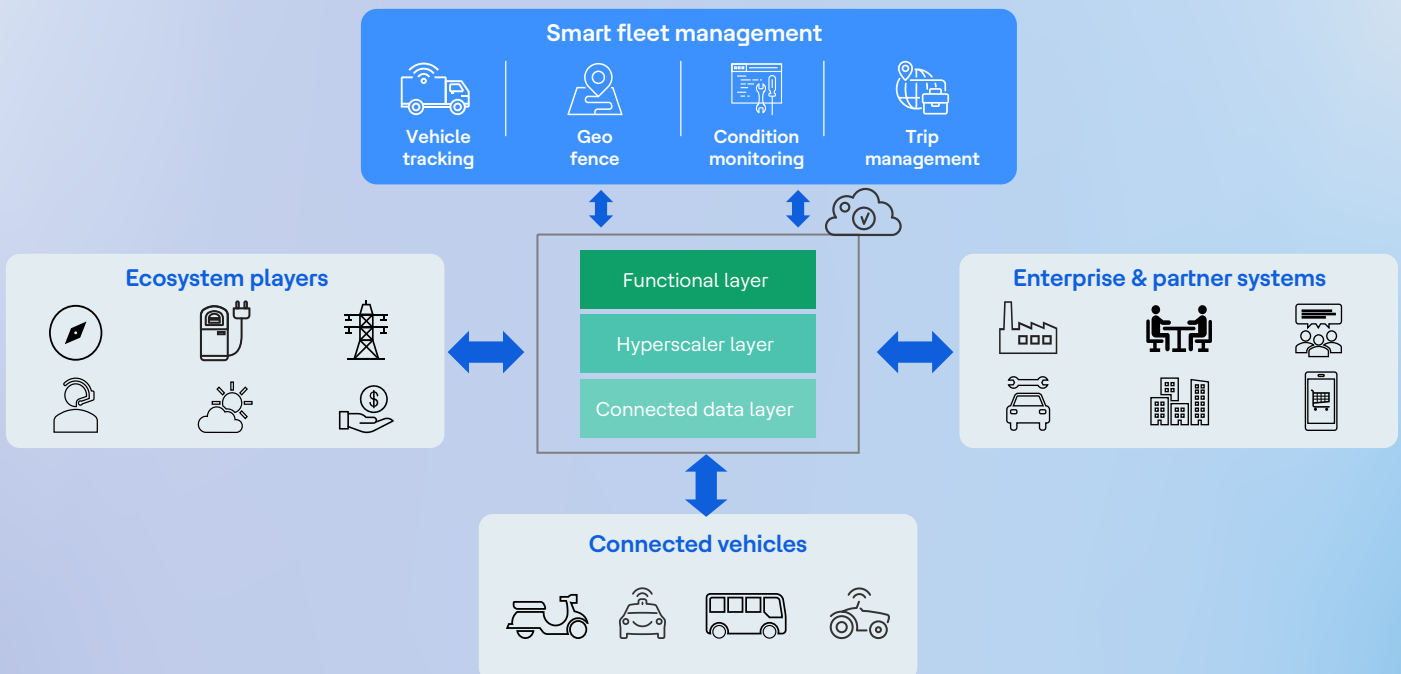

Airport ground fleet management

Fleet subscription services

Service framework

Key features

Fleet tracking & geo-fence

Driver behavior & trip analysis

Fleet condition monitoring

Prediction & recommendation services

Customizable dashboards

Theft detection

Benefits

Faster time-to-market

Extendable architectural framework

Flexibility to integrate & customize business modules

Extended monetization potential

Scalable technical and business layers

Leverages secure and robust native Azure services and Microsoft Connected Fleets reference architecture
