Four HCL Technologies' Customers Honored as Laureates by International Data Group's Computerworld Honors Program

Global Information Technology Awards Foundation Pays Tribute to Individuals and Organizations Leveraging Information Technology to Benefit Society

SUNNYVALE, CA, NOIDA, India — June 7, 2010 – HCL Technologies Ltd. (HCL), a global leader in IT services, today announced four customers, Avago Technologies, Cummins Inc., TXU Energy and Birmingham City Council (UK), have been recognized as Laureate winners by the International Data Group's (IDG) Computerworld Honors Program. For more than two decades, the program has honored individuals and organizations that have used information technology to benefit society. This year's ceremony and accompanying Gala Awards Evening is scheduled for June 7, 2010 at the Andrew W. Mellon Auditorium in Washington, D.C.

"Each Laureate selected for this honor understands the importance of using one's resources and technical prowess to benefit one's fellow man," said Bob Carrigan, Chairman of the Computerworld Honors Program Chairmen's Committee and CEO of IDG Communications Worldwide.

"We are pleased that four of our customers have been recognized this year for promoting positive social and economic progress through outstanding achievements in technology by the Chairmen's Committee, a highly influential group of CEOs from global technology companies," said Shami Khorana, President of HCL America. "Our customers' positive contributions to the IT industry will leave a permanent mark on the societies in which they operate and the community at large, and HCL is honored to be associated with organizations of such caliber."

Avago Technologies has reduced operational costs by 30 percent and increased operational transparency since engaging HCL in a strategic co-sourcing engagement centered on managed services to reduce operational costs and increase IT operational transparency – all without disrupting the business operations of more than 40,000 customers worldwide. By leveraging HCL's strong SLA-driven framework, Avago has achieved greater control over its IT infrastructure and the ability to refocus on key business objectives.

HCL serves as an extended arm of **Cummins** Business Services group, providing multilingual help desk support for the last seven years. Cummins was honored by Computerworld Honors for its Connected Community Partnership, an initiative that brings more affordable technology to Bartholomew County, Indiana, giving community members greater access to technology resources and creating a collaborative environment that fosters economic growth, more effective government and excellent education.

Birmingham City Council embarked on a Corporate Service Transformation (CST) with SAP and HCL AXON to revolutionize its business processes in order to align with e-Government strategic directives. The longterm, strategic business transformation was the largest of its kind in the UK public sector and transformed the five processes that are central to any efficient back office.

In conjunction with SAP and HCL AXON, **TXU Energy** implemented a highly sophisticated marketing and sales-driven solution that replaced three existing legacy customer service and billing systems with a single consolidated solution to support more than 2.1 million customers in the state of Texas. The new solution enhanced TXU's customer support and expanded its service offerings to allow clients to choose how they interact with the retailer and how they can purchase power.

About Avago Technologies
Avago Technologies is a leading supplier of analog interface components for communications, industrial and consumer applications. By leveraging its core competencies in III-V compound and silicon semiconductor design and processing, the company provides an extensive range of analog, mixed signal

and optoelectronics components and subsystems to approximately 40,000 end customers. Backed by strong customer service support, the company's products serve four diverse end markets: wireless communications, wired infrastructure, industrial and automotive electronics, and consumer and computing peripherals. Avago has a global employee presence and heritage of technical innovation dating back 40 years to its Hewlett-Packard roots. Information about Avago is available on the Web at www.avagotech.com
