

HCL Technologies Selected as an Artesia Consulting Alliance Partner

HCL Strengthens Partnership through Launch of Content 2.0, a New Network Publishing Platform Leveraging Artesia Digital Asset Management

Los Angeles, CA – Henry Stewart Conference (Booth #133) – November 12, 2007:

HCL Technologies Ltd. (“HCL”), India’s leading global IT services company, today announced a new partnership with Open Text™ Corporation’s (Nasdaq: OTEX, TSX: OTC) Artesia Digital Media Group, the leading provider of Digital Asset Management solutions. As part of this alliance, HCL has been added as one of Artesia’s select Consulting Alliances partners and will serve as a systems integrator for Artesia’s products.

Artesia’s Consulting Alliance members offer Artesia’s customers an extensive range of services including industry best practices, business analysis and reengineering, software installation, implementation and integration services, project management, product localization, training expertise, and outsourcing administration.

“Artesia is committed to working with partners who bring specialized expertise and knowledge to our customer engagements,” said Michael Barros, VP of Sales & Business Development for Open Text’s Artesia Digital Media Group. “By adding HCL as a Consulting Alliance partner, we’re expanding our capabilities for our customers and offering a deeper level of expertise and global reach.”

“The changing dynamics of the digital content industry are forcing media, entertainment and marketing enterprises to re-evaluate their content strategy,” explained Karan Puri, Senior Vice President, HCL Technologies. “By partnering with Artesia, we’re offering our global customers the combined strength and synergy of both companies from a single source, and in turn giving our customers a competitive edge.”

Additionally, HCL today launched Content 2.0, a network publishing platform for the automation and improvement of workflows across the publishing lifecycle (i.e. creation, management and delivery). Based on best-of-breed publishing technologies and tools, Content 2.0 also leverages Artesia Digital Asset Management for multi-channel publishing and digital asset creation workflows. The new platform supports XML-based collaborative authoring, multi-format content ingestion, federated content and digital asset repositories, and metadata/full text search. Furthermore, Content 2.0 offers tight integration with print and interactive composition tools and digital delivery over multiple channels.

“Content 2.0 enables customers to solve a critical business need with a single solution and is representative of each company’s continuing efforts to combine best-of-breed technologies and services to best serve the market,” added Barros of Artesia.
