

Press Release**QUESTRA AND HCL TECHNOLOGIES IN PARTNERSHIP AGREEMENT****Growth In Questra Customer Base Triggers Expansion Of Implementation Force**

Redwood City, CA—June 16, 2003—Questra Corp. announced today that it has forged a strategic partnership with HCL Technologies (HCL Tech), a leading global IT services company, to provide implementation support for customer projects. Questra recently launched the Questra Smart Service Certified Engineer program, which trains and certifies development engineers to implement Questra's industry-leading intelligent device management (IDM) software.

The partner certification program is a response to accelerated growth in the Questra customer base. The company is seeing accelerated growth and acceptance in medical equipment, power generation, and imaging market segments. A growing number of equipment manufacturers including Diagnostic Products Corp., Eaton Corp.'s Cutler-Hammer business, Swissray International, and eBidenergy use Questra remote diagnostic and monitoring applications to collect data from medical instruments, power generation equipment, and other remote devices. Questra IDM software improves equipment uptimes and customer satisfaction while reducing the cost of service.

HCL Tech is developing a practice group focused on upcoming implementation projects in Japan and the U.S. HCL Tech engineers have gained hands-on experience and certification on both the device-side and server-side elements of the Questra Smart Service Solution™ product family, as well as with the patent-pending Questra SecureLink™ security technology.

"HCL Tech is an excellent partner for a fast-growing company like Questra because we extend their geographical reach and speed with our prepared, trained engineers. This partner program allows the Questra team to focus on product development and direct customer involvement," said S. Raman, COO, HCL Technologies Ltd.

"IDM software is a bright spot in the enterprise software market, and Questra is taking careful steps to manage its growth. As a certified engineering partner with global presence, HCL Tech will leverage our resources as we expand into new geographies," said Rajeev Raman, Questra vice president, product development.

About Questra (www.questra.com)

Questra Corporation is an enterprise software company leading the development of intelligent device management solutions. The company's remote diagnostic and monitoring applications collect data from power generation equipment, medical instruments, and other remote devices. Equipment manufacturers and their customers using the Questra Smart Service Solution lower their service costs through reduced emergency calls, proactive device monitoring and diagnostics, and streamlined accounting for consumables and usage. Questra is headquartered in Redwood City, CA.

About HCL Technologies (www.hcltech.com)

HCL Technologies is one of India's leading global IT services and product engineering companies, providing value-added, software-led IT solutions and services to large and medium-scale organizations. Founded in 1991, HCL Technologies focuses on technology as well as R&D outsourcing, with the objective of working with clients in areas at the core of their business. HCL Technologies delivers these services through an extensive offshore software development infrastructure and a vast global marketing network that enables scalable, flexible and cost-effective delivery. The company's well defined business strategy has enabled it to build domain expertise across a host of chosen verticals including among others banking, funds management, insurance, petrochemicals, pharmaceuticals, aerospace, automotives, semi-conductors and retail.

As of 31 March 2003, HCL Technologies Limited, along with its subsidiaries, had 8748 employees. The HCL Technologies team today has operations spanning 26 locations in 14 countries — covering over 80% of the world IT market. Together with its knowledge of embedded systems, core technologies and application development expertise, HCL Technologies is positioned, as a composite solutions provider equipped to cater to the entire gamut of IT needs.
