

HCL

Enhanced learning experiences through video-based models

Introduction

Video-based learning literally refers to learning experiences facilitated through video. With its ability to combine graphics, text, audio and videos create a multisensory learning experience, unlike any other e-learning format. Because of this, it's no surprise that video-based learning is quickly becoming a dominant standard of online training.

About our solution

As part of our learning process, we have a library of 100+ audio-visual contents on different warehouse processes where domain experts explain the basic warehousing processes like receiving & put-away, storage, order picking, packing, labeling, stacking and shipping.

It comes in many different formats that serve unique purposes.

01

Animated explainers

Apart from being visually appealing, animated videos are kept for illustrating details of the warehouse management topics which would otherwise be harder to convey. This makes it easier for fresh learners or laymen to process the information as well.

02

Expert-led explainer videos

Expert advice is always valuable. But when it's delivered by the experts themselves in the form of an explainer video, it creates an inviting experience that emulates a lecture or even one-on-one instruction. In our SaaS academy, we kept over 100 plus explainer videos of different warehouse management case studies, challenges and solutions provided by our BY SMEs and WMS domain experts.

03

Training videos for knowledge transformation

Our solution architects have created over 100 plus audio-visual training sessions for implementation of different BY solutions from their experience of working in different international clients. New joiners in projects get thorough product knowledge of different BY solutions with the help of these video-based training contents.

Solution highlights

HCL Technologies developed training academy and platform

Business highlights

Multisensory learning

Video learning allows users to learn better and retain information longer.

Pull learning

Enables learning on the go and tackle challenges in the real world with resources availability at a click on mobile devices

Reduced training cost

The cost for video production for training offsets the higher and repetitive costs of instructor-led learning. Video-based training can result in 50%-70% savings for a company.

Versatility

Video-based learning lends itself as a teaching tool for a vast number of subjects.

Flexibility of pace

It allows learners to access and absorb content at their own pace.

Consistency

It is a great driver for continuity and consistency for a globally dispersed workforce as they are easily distributable across locations and convey a coherent message or instruction.

HCL Technologies (HCL) empowers global enterprises with technology for the next decade today. HCL's Mode 1-2-3 strategy, through its deep-domain industry expertise, customer-centricity and entrepreneurial culture of ideapreneurship™ enables businesses to transform into next-gen enterprises.

HCL offers its services and products through three lines of business - IT and Business Services (ITBS), Engineering and R&D Services (ERS), and Products & Platforms (P&P). ITBS enables global enterprises to transform their businesses through offerings in areas of Applications, Infrastructure, Digital Process Operations, and next generation digital transformation solutions. ERS offers engineering services and solutions in all aspects of product development and platform engineering while under P&P. HCL provides modernized software products to global clients for their technology and industry specific requirements. Through its cutting-edge co-innovation labs, global delivery capabilities, and broad global network, HCL delivers holistic services in various industry verticals, categorized under Financial Services, Manufacturing, Technology & Services, Telecom & Media, Retail & CPG, Life Sciences, and Healthcare and Public Services.

As a leading global technology company, HCL takes pride in its diversity, social responsibility, sustainability, and education initiatives. As of 12 months ending on March 31, 2022, HCL has a consolidated revenue of US \$11.48 billion and its 209,000 ideapreneurs operate out of 52 countries. For more information, visit www.hcltech.com
