

# Data migration using Azure Data Factory

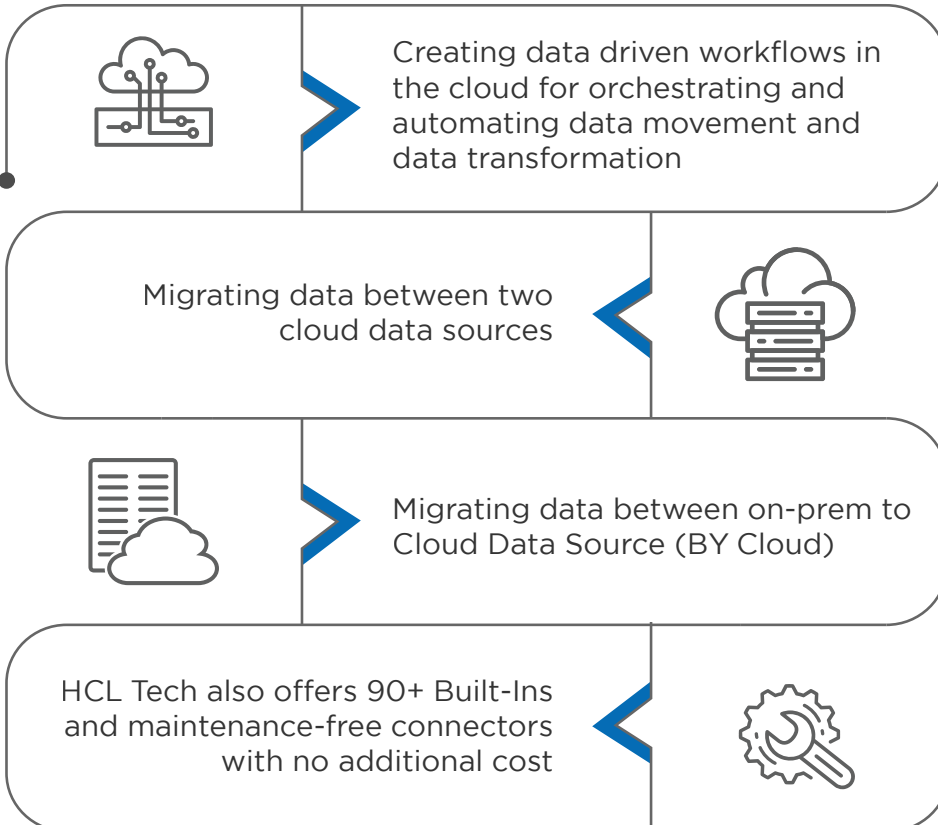

# Introduction

In the modernized business environment of the cloud transformation journey, customers across the globe face challenges in moving from on-premise to the cloud environment.

Microsoft Azure facilitates fully managed, serverless data integration services to solve the migration issues and enrich data generated in the cloud, by using reference to on-premise or other disparate data sources, which is known as Azure Data Factory (ADF).

HCL Technologies supports its customers by leveraging the support of the Azure Data Factory to provide services for:

# About the solution

Azure Data Factory is a simplified platform for application and digital enterprise transformation which helps organizations to migrate to BY cloud from on-prem/3rd Party Cloud Source.

ADF leverages and provides support for the products including Blue Yonder (BY) WMS, BY TMS and luminate products.

## Solution highlights

### Completely automated

A comprehensive automation platform which can be configured in minutes with minimal maintenance

### Connectors

Provides supports for 50+ integrations to SaaS platforms

### 100% Complete & accurate data transfer

BY's robust infrastructure ensures reliable data transfer with zero data loss

### Fast transactions

Insert data in BY Cloud environment and process the transactions in seconds

### Data management

For hassle-free management, BY offers smart triggers for event processing and push notifications

HCL Technologies (HCL) empowers global enterprises with technology for the next decade today. HCL's Mode 1-2-3 strategy, through its deep-domain industry expertise, customer-centricity and entrepreneurial culture of ideapreneurship™ enables businesses to transform into next-gen enterprises.

HCL offers its services and products through three lines of business - IT and Business Services (ITBS), Engineering and R&D Services (ERS), and Products & Platforms (P&P). ITBS enables global enterprises to transform their businesses through offerings in areas of Applications, Infrastructure, Digital Process Operations, and next generation digital transformation solutions. ERS offers engineering services and solutions in all aspects of product development and platform engineering while under P&P. HCL provides modernized software products to global clients for their technology and industry specific requirements. Through its cutting-edge co-innovation labs, global delivery capabilities, and broad global network, HCL delivers holistic services in various industry verticals, categorized under Financial Services, Manufacturing, Technology & Services, Telecom & Media, Retail & CPG, Life Sciences, and Healthcare and Public Services.

As a leading global technology company, HCL takes pride in its diversity, social responsibility, sustainability, and education initiatives. As of 12 months ending on March 31, 2022, HCL has a consolidated revenue of US \$11.48 billion and its 209,000 ideapreneurs operate out of 52 countries.
