Independent Auditor's Report

To the Shareholders of HCL Technologies Lithuania UAB

Opinion

We have audited the financial statements of HCL Technologies Lithuania UAB ("the Company"). The Company's financial statements comprise:

- the balance sheet as at 31 March 2021,
- the income statement for the year then ended,
- the statement of changes in equity for the year then ended,
- the cash flow statement for the year then ended, and
- the notes to the financial statements, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 March 2021, and of its financial performance and its cash flows for the year then ended in accordance with Business Accounting Standards of the Republic of Lithuania.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the Law on Audit of Financial Statements of the Republic of Lithuania and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The other information comprises the information included in the Company's annual management report, but does not include the financial statements and our auditor's report thereon. Management is responsible for the other information.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

In addition, our responsibility is to consider whether information included in the Company's annual management report for the financial year for which the financial statements are prepared is consistent with the financial statements and whether annual management report has been prepared in compliance with applicable legal requirements. Based on the work carried out in the course of audit of financial statements, in our opinion, in all material respects:

- The information given in the Company's annual management report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- The Company's annual management report has been prepared in accordance with the requirements of the Law on Financial Reporting by Undertakings of the Republic of Lithuania.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation of the financial statements that give a true and fair view in accordance with International Financial Reporting Standards, as adopted by the European Union, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Average number of IT specialists	430	295
Total average number of employees:	443	309
Number of employees at the year-end date:	419	464

II. ACCOUNTING POLICY

1. Legal acts underlying the drawing up of the financial statements

The Company manages its accounting and draws up its financial statements according to the following legal acts governing financial reporting:

- Business Accounting Standards of the Republic of Lithuania;
- Law on Accounting of the Republic of Lithuania;
- Law on Financial Reporting of Entities of the Republic of Lithuania.

The Company's accounting year does not coincide with a calendar year. It starts on 1 April and ends on 31 March.

The financial statements are drawn up at an accuracy of a whole euro.

Since 1 April 2020 the Company belongs to the category of medium size companies. The Company has to prepare the balance sheet, income statement, statement of changes in equity, cash flow statement and explanatory notes.

The principal aspects of the Company's accounting policy followed by the Company in drawing up its financial statements are laid down below.

Accounting estimates

The financial statements were drawn up on a historical cost basis.

Accounting estimates refer to the following significant areas of financial reports: loss from the impairment of amounts receivable and other assets, the recognition of deferred income tax assets and liabilities. Any future events may modify the assumptions used to arrive to the accounting estimates. The result of the changes in such estimates will be accounted for in the financial statements when determined.

Going concern principle

The financial statements of the Company were drawn up following the going concern principle i.e. anticipating that the Company will continue its operations in the future.

There was an outbreak of coronavirus (COVID-19) at the beginning of the year 2020 in the world and Lithuania as well. The Company has assessed the potential impact of COVID-19 pandemic, including the quarantines, which were announced in the Republic of Lithuania on 16 March 2020 and 7 November 2020. Based on management assessment, there are no indications that the value of the assets reported in the balance sheet should be measured differently on the last day of the reporting periods.

2. Accounting policy

a) Non-current intangible and tangible assets

Intangible assets are accounted for at acquisition value less the accrued amortisation and the impairment loss. Amortisation is computed applying straight-line (linear) depreciation method throughout the estimated useful life of the intangible asset. The costs of the amortisation of intangible assets are included in the general and administrative expenses item of the income statement.

Non-current tangible assets are considered to include the asset that renders economic benefits to the Company for a period longer than one year and the acquisition (production) cost of which is equal to at least the minimum cost of non-current tangible assets set by the Company and the Company reasonably expects a flow of economic benefits from such asset in future periods.

In the financial statements the non-current tangible assets are carried at the acquisition cost less any accumulated depreciation and its impairment. The initial value of the non-current tangible assets is represented by its acquisition price including the unrecoverable acquisition taxes and all other costs directly attributable to the preparation of the asset for the use and the transfer of the same to its location of use.

Depreciation is computed according to a straight-line (linear) method throughout the useful life of the asset established for individual asset groups. Depreciation is calculated from the month following the month in which the asset was put into operation. The depreciation amount shall be recognised as costs in each accounting period.

b) Impairment

The carrying amounts of the Company's assets are revised at balance sheet day with a view to determining their impairment. If any such indication of impairment exists the Company shall estimate the recoverable amount of that asset. Impairment loss is accounted for when the carrying amount of an asset or its tied cash generating unit exceeds the recoverable amount. All depreciation loss is carried in the income statement.

Recoverable amount is calculated as the higher of an asset's expected net of selling price and its value in use. An asset's value in use is estimated by discounting net future cash flows to the current value applying a pre-tax discount rate reflecting the realistic market assumptions concerning the time value of money and the risk related to the asset.

c) Cash and cash equivalents

Monetary assets are considered to include all cash and cash equivalents held by the Company in banks. The monetary funds of the Company as of the balance sheet date are measured in euro according to the official euro and foreign currency exchange rate established as of that date by the Bank of Lithuania.

Cash equivalents – short-term (up to three months) liquid investments that are readily convertible to known amounts of cash and that are subject to an insignificant risk of changes in value. Investment in equity securities is not attributable to cash equivalents.

d) Foreign currencies

Accounting is arranged and accounting documents are drawn up in euro. Financial statements are drawn up using the euro. On initial recognition a foreign currency transaction is recorded in the reporting currency euro by applying the exchange rate at the date of the transaction. Currency items in the balance sheet are reported in the reporting currency euro applying the official euro and foreign currency exchange rate set in accordance with the Law on Accounting of the Republic of Lithuania. The differences resulting from the amounts paid and recorded using other exchange rate are recognized as a current year gain or loss.

e) Amounts receivable

At initial recognition amounts receivable are measured at cost. Subsequently the short-term amounts receivable are accounted for taking into account their impairment and the long-term amounts receivable – at discounted value less the impairment loss. The amounts of doubtful debts are recognised as general and administrative expenses of the accounting period.

f) Amounts payable and liabilities

The Company's liabilities are recognised in the accounting and recorded in the balance sheet when the Company acquires the liabilities that have to be fulfilled. Projected transactions or guarantees granted are not recognised as liabilities.

Non-current liabilities are the liabilities expected to be settled by an entity later than within one year after the balance sheet date.

Current liabilities are the liabilities to be settled within one year.

At initial recognition amounts payable are measured at acquisition cost. Subsequently amounts payable are carried at amortised cost applying an estimated interest method (application of estimated interest rate method for discounting cash flows through the entire liability validity period or until the next revaluation date). Short-term amounts payable cannot be discounted.

g) Equity

The amount of the authorised capital equal to the total of all nominal values of subscribed shares irrespective of the share paid-up. The account of the authorised capital records only the nominal value of the shares. Where the share issue price exceeds the nominal value of the shares the share premium is recorded in the share premium account. The entire authorised capital has been paid-up. The reserves in the Company are formed in the manner established by laws. A change in the authorised capital is recorded in the accounting when the amended Articles of Association of the Company are registered in the manner set forth by laws.

h) Reserves

The legal reserves are formed in the manner stipulated by laws i.e. not less than 1/10 of the authorised capital. Other reserves are formed in the manner set forth by the Articles of Association where the shareholders pass a decision to cancel or reduce other reserves.

i) Revenue accounting policy

At the Company revenues are recognised according to the accrual principle i.e. recorded in the accounting and presented in the financial statements when earned regardless of the receipt of the monies.

Only an increase in the Company's economic benefit is considered to represent revenue. Amounts collected on behalf of third parties and value added tax are not recognised as revenue since they are not attributed to economic benefits earned by the entity and do not result in increases in equity.

The revenue from the provision of services is recognised in different ways depending on whether or not the service provision result may be reliably assessed. The result may be accurately measured when all of the following conditions are fulfilled:

- ✓ the amount of such revenue can be measured reliably;
- ✓ the economic benefit from the service transaction may be reasonably expected.

Revenues are recognised where it is probable that the Company will generate in the future an economic benefit from the transaction and provided the value of the revenue may be reliably measured; the sales are measured less VAT and rebates.

j) Costs accounting policy

Costs are recognised on the basis of the accrual and comparability principles in the accounting period during which the related revenue is earned regardless of the time of spending the cash.

The service provision costs are recognised in the Company recorded in the accounting and presented in the financial statements in the same accounting period in which the revenue for the services provided was recognised. The cost of the services includes the acquired consultation services.

The Company's selling expenses include the following costs ensuring the provision or increasing of services during the reporting period: commissions to third parties; publishing and advertising costs.

The general and administrative expenses of the Company include the following costs: accounting services, communication services; minor property purchase, bank charges, other operating and other costs related to the earning of the Company's revenues.

k) Other activities

The other activities include profit and loss from transfer of non-current and current assets, compensations received or paid in relation to termination of contracts, other income and expenses not related to the Company's operating and financial and investment activities.

l) Other interest and similar income and costs

Interest and other similar income and costs articles include: income and costs from penalties and late interest; income and expenses from the currency exchange change, income and expenses from investment in shares of subsidiaries, parent companies and associates; income and expenses of other long-term investment and loans; other interest and similar income and expenses; impairment in the financial assets and short-term investment, interest and other similar income and costs not related to the Company's operating and other activities.

m) Corporate income tax and deferred tax

The corporate income tax is composed of the current and the deferred tax.

The corporate income tax of an accounting year is estimated from the taxable result of the year and applying the rates effective at the balance sheet date. The standard corporate income tax rate in Lithuania is 15 %.

The deferred corporate income tax is computed having regard to the temporary differences between the amounts of assets and liabilities in the financial statements and their values for tax purposes. The deferred corporate income tax amount depends on the projected use of the assets and coverage of the liabilities in the future and projected tax rates. Deferred corporate income tax assets are recognised only where the Company expects to have sufficient taxable profit in the future which will enable the utilisation of the deferred tax assets.

n) Contingencies

The liabilities which do not meet the liabilities and provision recognition criteria are referred to as contingent liabilities. Where the contingencies are not recorded in the income statement or the balance sheet the information about the contingent liabilities is presented in the Notes to the financial statements.

The contingent asset is an asset which due to the events beyond the control of the Company may be owned by the Company and generate to it economic benefit. Where the contingent assets are not recorded in the income statement or the balance sheet the information about the contingent assets is presented in the Notes to the financial statements.

o) Inter-company offsetting

For the purpose of these financial statements, assets and liabilities and revenue and expenses are not offset, except for the cases required by the Business Accounting Standards. Amounts receivable and amounts payable are offset when there exist sufficient legal grounds for that purpose.

p) Provisions

Provisions are recognised in liabilities when the Company has a legal obligation or irrevocable commitment as a result of past events, it is probable that an outflow of resources will be required to settle a legal obligation or irrevocable commitment, and a reliable estimate of the amount can be made.

q) Related parties

Upon preparation of the financial statements of the Company, the following entities have been considered to be related parties:

- a. Owners (the parent company and the owners of the parent company);
- b. Subsidiaries and associated companies;
- c. Other consolidation group companies (including other subsidiaries of the parent company);
- d. Members of the management, the management board and the supervisory board;
- e. Close relatives of the persons mentioned above and companies related to them.

r) Subsequent events

The financial statements of the Company shall be adjusted in case any subsequent events have direct impact upon the data of not yet approved financial statements. All significant subsequent events are presented in the Notes to the financial statements.

s) Financial risk management

The risk management methods employed by the Company are specified below:

Credit risk. The credit risk and the counterparty risk are controlled applying the specific credit terms and control over procedures.

Foreign exchange risk. Most of the transactions concluded in the reporting financial year are assessed in euro; therefore, the Company does not face any significant foreign exchange risk.

Liquidity risk. The Company's policy is to maintain a sufficient flow of cash and cash equivalents or maintain financing through respective credits.

Interest rate risk. The Company has not significant financial liabilities.

Indicators	31-03-2021	31-03-2020
— < 1 year	786.719	799.865
— 1–5 years	1.921.387	2.708.106
Total lease:	2.708.106	3.507.971

NOTE 22: RIGHTS AND OBLIGATIONS OF THE COMPANY NOT INDICATED IN THE BALANCE SHEET

As at 31 March 2021 the Company was not involved in any legal proceedings that in the opinion of the management could have material effect upon the financial statements.

Under the current law the tax authorities may at any time inspect the Company's accounting records and records for 5 years immediately preceding the current accounting period, and can charge additional taxes and penalties. The Company's management is not aware of any circumstances which require the Company to calculate additional significant tax liabilities.

In the end of 2019, the news emerged from China about the COVID-19 (Coronavirus). In the first few months of 2020 the virus had spread globally and its negative impact has gained momentum. As at the date of the financial statements there was no significantly adverse impact on the Company caused by the virus COVID-19. Operational processes are continued to the full extent, sales volumes were not affected. Due to the fact that the situation related to the outbreak of the disease is very dynamic and responses of the Lithuanian and other governments worldwide are evolving rapidly, and, having assessed the uncertainty regarding the slowdown in the economy globally and in individual regions, it is highly difficult at this stage to reliably estimate the potential impact on the results.

NOTE 23: SUBSEQUENT EVENTS

No subsequent events took place in the period from the end of the accounting period until the approval of the present financial statements which could have an impact upon the financial statements or which would have to be disclosed.

Chief operational officer

Shiv Kumar Walia

Member of the Board

Subramanian Gopalakrishnan

Authorised person of the accounting company
