**Notes to Financial Statements**  
December 31, 2020

**1. Nature of operations:**

Actian International, Inc. (the Company) was incorporated in Delaware and is a subsidiary of Actian Corporation. The Company is a holding entity with investments in related subsidiaries, acts as a pass-through entity and does not generate revenue.

**2. Significant accounting policies:**

This summary of significant accounting policies is presented to assist in understanding the Company's financial statements. These accounting policies conform to accounting principles generally accepted in the United States of America (GAAP) and have been consistently applied in the preparation of the financial statements.

Use of Estimates - The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Risks and Uncertainties - The Company's products are concentrated in an industry which is characterized by significant competition, rapid technological advances, changes in customer requirements, and evolving regulatory requirements and industry standards. The success of the Company depends on management's ability to anticipate and to respond quickly and adequately to technological developments in the industry, and changes in customer requirements or industry standards. Any significant delays in the development or introduction of products could have a material adverse effect on the Company's business and operating results.

The Company's international operations are subject to the risks of operating in an international environment, including the potential imposition of trade or foreign exchange restriction, tariff and other tax increases, fluctuations in exchange rates, inflation and unstable political situations. An increase in the value of the U.S. dollar relative to foreign currencies could make the Company's products less competitive in international markets or require the Company to assume the risk of denominating certain sales in foreign currencies. The Company anticipates that these factors will impact the business to a greater degree as international business activities are expanded.

Investments in Subsidiaries - Investment in subsidiaries are stated at cost in the Company's balance sheet.
