

HCL Technologies' Factory+ for SAP S/4HANA

Safely move your ECC system into an S/4 digital future

SAP® Qualified
Partner-Packaged Solution

You've spent years investing in SAP ERP – customizing processes and working hard to build a system that reflects your business. The resulting ECC system likely supports your business needs today – but will it drive business growth tomorrow?

Existing ECC systems rely on legacy technology, and your code customizations were designed for this old SAP infrastructure. This means that new ECC investments won't drive long-term ROI - and costs for maintaining legacy technology will only rise.

The good news is that conversion to SAP S/4HANA brings the agility, scalability, access to SAP innovations, and the competitive advantage that comes with implementing a new intelligent ERP - but at a significantly lower cost and risk than implementing a new system.

The benefits of digital ERP + minimal business change

Whether your existing ECC system is heavily customized, or you just want to keep your core system design as-is, a conversion using HCL's Factory+ is the lowest-risk way to move to digital ERP - **without the need for significant capital investment or disruptive business change.**

HCL Technologies' Factory+ allows you to:

Protect your ECC investments	Retain existing data and assets	Deliver business benefits	Leverage new technologies
Retain the code you need, retire what you don't, drive down TCO	Optimize your processes Take advantage of HCL's deep SAP expertise across industries	Faster book closure, eliminate reconciliations, one source of truth, better insight into operations, reduced data footprint, improved UX, real time supply chain planning	Innovate and drive incremental value with technology such as Business Technology Platform, SAP iRPA and Fiori

Low-risk industrialized migration + custom code optimization = lower TCO

HCL Technologies' Factory+ multi-disciplinary team reduces conversion timelines using our automated industrialized delivery model and proprietary tools. This is supported by highly-qualified conversion specialists – combining the reliability of automation with the flexibility and skills HCL Technologies has built our reputation on.

The key building blocks of HCL Technologies' Factory+ are:

Simplification experts

Automated code remediation

Automated regression testing

Automated data transformation

HCL Technologies' Factory+ tools reduce custom code adaptation effort by 25 to 55%

Factory+ is supported by an HCL-developed toolset optimized for intelligent automation - delivering faster migrations, even for systems with a high level of bespoke development. Our proprietary **custom code disposition and benchmarking tool** advises which code to retire, retain, simplify, or convert into cloud extensions.

Factory+ has been designed to deliver significant benefits for customers using on-premise ECC in all industries. For example:

- **IT Services** - Performing real-time analytics on transaction data led to a 25-40% reduction in processing time and a 50% reduction in global payroll processing time
- **Chemicals** - Migration led to a 33% increase in MRP performance and a 55% faster release of the monthly forecast due to improved financial closing
- **Media** - Achieved a leaner, more agile organization with optimized processes and real-time analytics
- **Oil & Gas** - Migration enabled real-time decision making, streamlined and optimized processes, improved productivity through Fiori apps, and tight integration with satellite apps via the SAP Business Technology Platform

What does the plus in Factory+ mean?

Fixed-scope, T-shirt sized SAP S/4HANA conversion packages

To keep things simple and affordable, we offer fixed-scope packages with T-shirt sized pricing. Packages can also be supplemented with additional services, for example, business partner conversion, prerequisite upgrades, additional Fiori activation, archiving/rightsizing, cloud infrastructure provisioning, or integration with other applications.

SAP S/4HANA Conversion Packages - Flexible T-Shirt Packages			
Package Value (AUD)*	Starting from AU\$400K	Starting from AU\$1100K	Starting from AU\$1750K
Duration (weeks)	16	24	36
Attribute	Small (S)	Medium(M)	Large (L)
Total number of custom objects	1000	3000	6000
Functional Scope - OTC	SD	SD+ Intercompany	SD+ Intercompany+ Foreign Trade
Functional Scope - Supply Chain (MM, PP, QM, PM, PS, EWM, WM)	2 or less	3 to 5	> 5
Functional Scope - Finance (FI, CO, AM, FSCM, BPC)	<2	3-4	>4
System Sizing (TB)	<1	1-4	>4
Number of landscape (SBX, Dev, QA, PRD)	3	4	>=5
Number of Satellite Systems (BI, APO, CRM, SRM, PI/PO etc.)	<3	4-7	>7
Number of Add-ons (Vistex, Vertex, OpenText)	0	2	>3

* Pricing has been converted from USD to AUD and is subject to currency conversion rates
