

HCL's CIG (Cloud Integration Gateway) Deployment Package for SAP/Ariba Network Customers

What is CIG?

The SAP® Ariba® Cloud Integration Gateway delivers a single gateway to integrate your SAP ERP systems, SAP Ariba cloud applications, and the Ariba Network to enhance the speed and ease of integration, and maximize cost and efficiency benefits across your source-to-pay process.

Why should I adopt CIG?

Besides providing a simpler and easier to maintain integration method, customers should be aware and plan for the fact that the SAP Ariba cloud integration (CI) solution - including CI-9 support package (SP) 1 and SP2 - as well as the SAP Business Suite add-on, **will be sunset on December 31, 2021**. As a result, innovations are delivered only through the SAP Ariba Cloud Integration Gateway.

Where does HCL fit in?

HCL was one of SAP's first system integration partners to actually deploy CIG for a large energy company in 2019. As an early adopter of this innovation, we are ahead of the curve on lessons learned and have launched a rapid deployment offering to help our Ariba customers modernize their integration process in the most cost effective way possible.

As a trusted Ariba partner, we are also in a unique position to provide forward looking and strategic consulting based on SAP's roadmap for CIG expansion into integrating other third party systems to/from Ariba

Our first step is to provide a free assessment to right-size a plan to meet your own unique situation.

The next step is to execute the plan. The following infographic represents a typical CIG migration (variable depending on how much customization exists within your current environment and how many systems are to be integrated). Cost effectiveness is achieved by leveraging significant offshore capability and following a well-defined, repeatable process.

Custom migration options are also available as required.
