

MANAGING DEMAND AND QUOTATIONS SEAMLESSLY THROUGH **DRYiCE™ DXP**

INTRODUCTION

DRYiCE DXP (Digital Transformation Platform) is a new-age demand management system natively designed for business users to manage the demand, and quoting process till requisition in the integrated ecosystem of procurement and financial management tools.

DRYiCE DXP connects business users with demand managers & catalog buyers, and drives collaboration around key transaction documents like quotations, demand orders, etc. by offering an e-commerce portal style marketplace. It offers a unified & best-in-class shopping experience for placing demand orders and requesting quotes through a configurable and requestor controlled catalog.

DRYiCE DXP can also be used to drive orchestration by integrating with strategic customer requisition systems for further driving collaboration around transaction documents like purchase orders, invoices, etc. DRYiCE DXP has a highly secured, cloud-native architecture and is built on a Cloud Foundry PaaS.

KEY CAPABILITIES

Requestor-controlled catalog item configuration

Supports enterprise procurement teams by integrating with concerned enterprise procurement management system

Procurement demand management

Quote management

Requestor self-service portal

Ad-hoc reporting capabilities

Demand order tracking and feedback, routing and orchestration for requisitioning

Integration hub (SXHub) powered by the industry leading iPaaS platform

BUILT IN TECHNICAL MODULES

Approval management system for approval rule configuration and management

SLA Management

Notifications

Security

User profile management

Feedback on demand orders

KEY FEATURES AND BENEFITS

1

Revolutionized Digital Transformation Platform with e-commerce capabilities

2

Allows procurement to focus on strategic aspects and enforces strict governance by eliminating e-mail and spreadsheet based transactions

3

Self-intuitive, customizable and interactive user interface for business users, demand managers, and category buyers.

4

Ability to configure and manage approvals for demand orders and quotes against catalogued items

5

Enables users to prioritize transaction volumes for better quotes

6

Drives collaboration across different transactional documents like demand orders, quotes, etc.

7

It can be accessed from any device

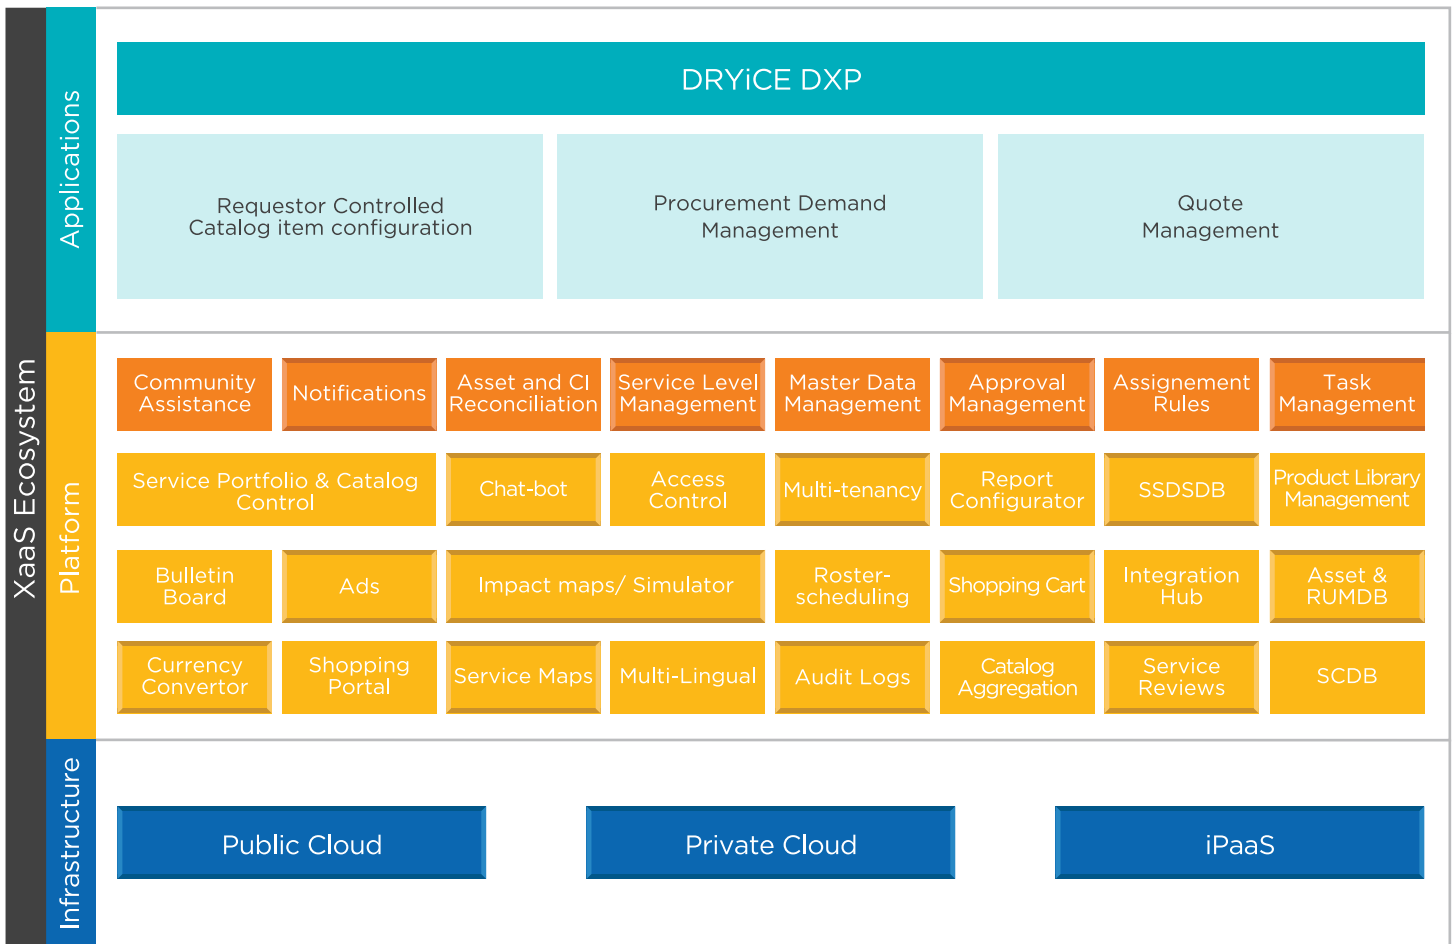

8

Simple and seamless user interface requiring minimal training effort

9

Seamless orchestration layers for integration with customer requisition systems

DRYiCE DXP ARCHITECTURE MODEL

WHAT IS DRYiCE?

DRYiCE is the Enterprise AI Foundation. It is HCL's autonomies and orchestration suite of services, products, and platforms powered by the world's best AI technology to enable enterprises to operate in a leaner, faster, and cheaper way, while ensuring superior business outcomes in terms of experience, speed, and agility. It brings the power of AI to transform IT and business services, business processes, and digital operations. HCL's cutting-edge autonomies and AI-enabled solutions are supported by an extensive partner ecosystem and Centers of Excellence across the globe.

This year, HCL's presence at Think 2018, is themed with an iconic representation of the letters "U & i". Through this coinage, we aspire to represent the growing tide of productive infusion of data analysis, cognitive capabilities and intelligence-based decision systems (denoted by the "i") into the mainstream enterprise operational rubric of our clients worldwide (denoted by "U").

We believe this rapid convergence of technology, processes and people, will create a self-sustaining eco-system for 21st century enterprises that will mature to realize value beyond the norm for years to come. Most of the 30 HCL solutions being showcased at Think 2018 are testament to this evolving philosophy for enterprise solutions that bear a similar promise for the future.

And finally, we also realize that the human-machine capability integration is something that cannot become a reality in isolation. In fact, it will be a product of close partnerships (as denoted by the melding of human and robotic minds in the visual), like the one forged by HCL and IBM and many others to come. All of which will take steps to help create a world that understands the risks and appreciates the benefits of making this next big human-inspired technological leap ahead.
