

Deep roots new possibilities

Building a digital enterprise with
Oracle Cloud

Typical challenges in migration to cloud

 <p>Legacy upgrade = Slows down innovation</p>	 <p>Siloed systems and cloud systems</p>	 <p>High integration costs</p>
 <p>Legacy cloud system processes</p>	 <p>Complexity in the cloud journey</p>	 <p>Limited resources in the digital journey</p>

Business Challenges

-  The future of work
-  Exceptional customer experiences
-  Digital supply chains and operating models
-  The future of finance function

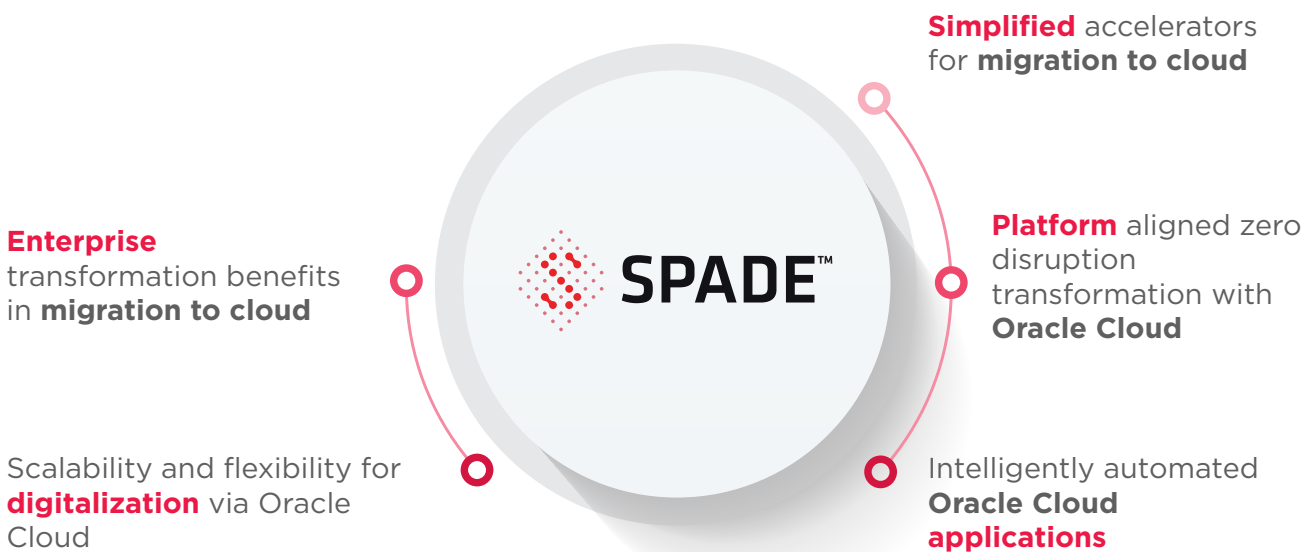

Technology Change

-  Artificial Intelligence / Machine Learning
-  Blockchain
-  Internet of Things
-  Conversational UI's / Chatbots/ RPA

SPADE is a 'low touch' solution to turbo charge your implementation of Oracle SaaS Cloud. It automates and simplifies the migration of the setup, master data and open transactions from various sources like Oracle EBS, PeopleSoft & JD Edwards to Oracle SaaS applications.

As companies migrate their on-premise Oracle applications to Oracle SaaS cloud for leveraging cloud benefits, the challenge is in data migration due to volume, complexity, validation and reconciliation. This solution has been designed and developed as per the best practices and guidelines recommended by Oracle for data migration into cloud.

Simplified Platform for Application Digital Enterprise Transformation

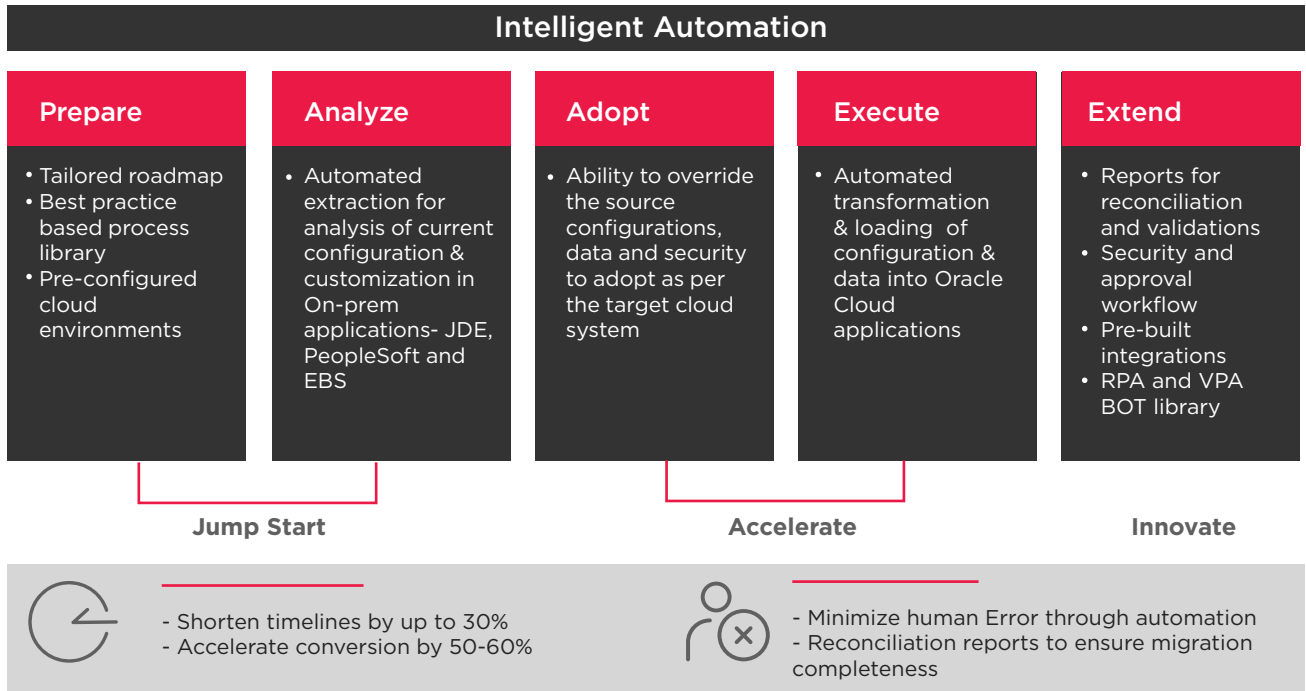

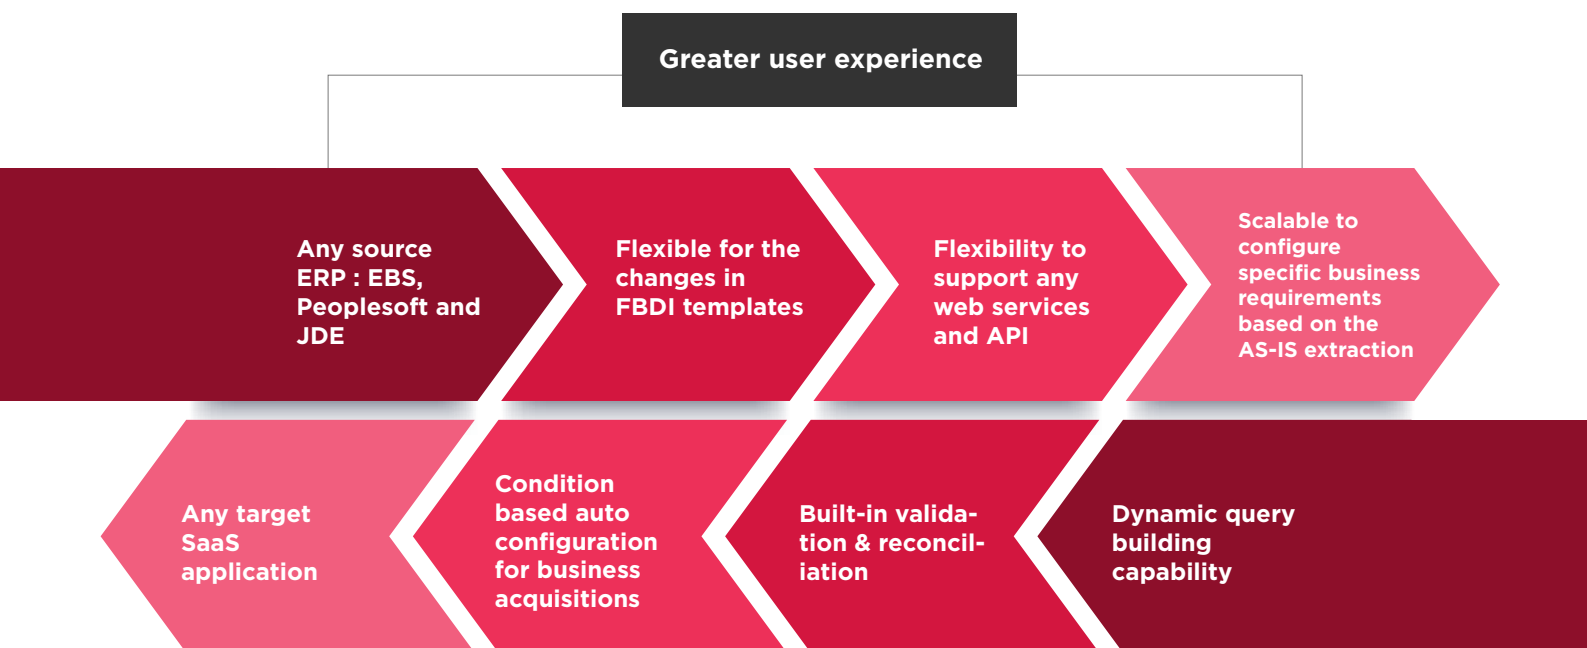

SPADE is a unified platform to discover, prepare, accelerate, adopt & extend oracle cloud applications with built-in flexibility, extreme automation, transparency to give you a head-start on your digital journey- faster, better, with lower TCO and mitigated risk.

Simplified accelerator to turbo-charge your migration to cloud

Digital Scalability and Flexibility

Salient Features

- Pre built Auto Extraction of Business Process
- Built-in impact analysis & usage analysis for customizations
- Identification of current configurations and customizations
- Best practice-based process library for Oracle Cloud Apps
- Pre-built integration with Oracle Cloud applications and Oracle ERP
- Auto configurations and migration of data
- Reconciliation reports for every data loading
- Field-tested iterative methodology
- Multiple data source extraction which includes Cloud to Cloud migration.
- Value adds- reports, dashboards, integrations, RPA/ Chatbot

Enterprise Transformation Benefits

Any complex data transformation in short duration and less business team involvement

Reduce the risk of human error through automation

Accelerate conversion by 50-60%

Simple to deploy for specific geography and locations.

Reduce overall implementation time & costs by upto 30%

Simplify and ensure a smooth and efficient transition.

Leverage and ability to override pre-built mapping & reconciliation reports to ensure quality transformation

Open source technology to avoid software licence
