Overview

The IT industry is seeing a clear shift from the customer who can create the highest business value by increasing their competitiveness and reducing business costs. Aligning IT to business and a value centric approach to build a sustainable business model has been the underpinning of HCL's transformation strategy. This investment has been paying off well as can be seen in the results of the last few quarters.

"HCL's investments in new growth engines, innovative service offerings and value centricity have helped us convert today's challenging market environment into opportunities for growth. HCL's leadership in the industry in having a robust growth pipeline yet again this quarter is a proof point that this strategy is paying off. Our investments are not only delivering business results but with heightened employee engagement and a global recognition of HCL's 'Bold' business strategy, HCL is today geared to lead the industry well through this difficult time", said **Shiv Nadar, Chairman and Chief Strategy Officer, HCL Technologies.**

Commenting on the results, **Vineet Nayar, CEO, HCL Technologies** says, "HCL's response to the challenging environment has been focused on growth and investing in emerging trends and solutions that create value for customers. \$1.5b worth of large deals won in the last 9 months and Gartner's comment on HCL's Infrastructure Utility (IU) offerings that cites "HCL has been investing in utility-type offerings for infrastructure for more than five years" is "a vendor to watch" are proof points. HCL's Employee First philosophy continues to be a key differentiator for us. The Hewitt employee study adjudging HCL as the No. 1 Employer in India and the Best Employer in Asia is a recognition of this fact."
