# HCL ElasticOps for Microsoft Azure

For secured and automated  
on-demand Azure cloud operations

[www.hcltech.com](http://www.hcltech.com)

Microsoft Azure adoption for your core IT infrastructure brings flexibility, business agility, and speed that is not possible with legacy on-premises systems. The ability to immediately and continuously optimize your Azure infrastructure to meet changing business needs, or to drive agility allows you to explore innovative ways to accelerate your business operations. Through the deployment of modern, scalable cloud-native applications, your organization is better prepared to disrupt markets, create new revenue channels, adapt with greater agility, differentiate value propositions, and drive shareholder value.

A flexible, consumption-based Azure solution demands a different approach to IT management. Efficient, flexible, and expert management of the cloud environment is crucial to realize the benefits of your Microsoft Azure investment.

HCL ElasticOps for Microsoft Azure is an artificial intelligence-driven operations solution that uses smart algorithms and machine learning to provide zero-touch automation of key operational tasks and processes. It brings the power of AI, autonomies, and orchestration to simplify IT and business operations at the speed of cloud.

By implementing industry-recommended best practices, HCL ElasticOps for Microsoft Azure simplifies cloud operations, safeguards the cloud environment from threats, and reduces operational overheads. It performs all the heavy lifting and unburdens you from unpredictable monthly costs across all Azure infrastructure and platform services.

## Azure operations for your business

HCL ElasticOps for Microsoft Azure provides an integrated suite of operational services to achieve enterprise-class scalability, performance, and availability. It focuses on governance, flexibility, and automation innovation.

HCL is a Microsoft Gold Partner and certified Azure Expert Managed Service Provider, audited by Microsoft. ElasticOps for Microsoft Azure also meets ISO 27001 certification criteria. We have over 5000 Azure trained and certified experts, with presence in every region.

ElasticOps for Microsoft Azure is designed to address the needs of any geography or industry. HCL helps you unlock the value of your cloud investments through our deep knowledge and understanding of Microsoft Azure products and services. Our domain expertise enables us to ensure that your Azure environment continually meets quality, compliance, and performance expectations.

HCL delivers Azure managed services based on enterprise-scale Microsoft Cloud Adoption Framework for Azure (CAF). This ensures that Microsoft best practices for the implementation and growth of your Azure cloud infrastructure can continually meet the changing needs of your business operations. HCL ElasticOps for Microsoft Azure performs deployment, monitoring, configuration and change management, cost analysis, and optimization for all Azure services. It achieves enterprise-class scalability, performance, and availability with a focus on your objectives. It deploys a flexible suite of Azure services that continuously meets your changing business needs, and is dependable, scalable and reliable.

## Benefits

HCL's Microsoft Azure certified resources have an in-depth understanding and proven track record of delivering cloud solutions. They are specifically positioned to design, execute, and manage a comprehensive cloud strategy. We can help you realize key short term and long-term benefits from your Azure cloud investment.

## Service level agreements

ElasticOps services come with the following service levels. These service levels are measured and reported on a monthly basis.

Tiered SLA options are offered depending upon your business requirements, architecture, and needs

Platinum 99.99%	Gold 99.9%
Silver 99.5%	Bronze 99%

Each of these standard SLAs have the following assured service levels:

Category of service	Time to respond	Category of service	Time to respond
Incident response	Priority 1 : 15 minutes Priority 2 : 30 minutes Priority 3 : 2 hours Priority 4 : 4 hours	Incident resolution	Priority 1 : 2 hours Priority 2 : 6 hours Priority 3 : 2 business days Priority 4 : 3 business days

## Support coverage options

### Support coverage

HCL ElasticOps for Microsoft Azure offers three levels of support coverage. These can be mixed and matched at a subscription level, aligned to your workload and business needs.

✓ 24x7

✓ 16x5

✓ 8x5

## Expertise on demand

ElasticOps for Microsoft Azure includes the key skills and expertise to ensure that your Azure environment is deployed, managed, and optimized to meet your changing business needs. Our Technical Account Manager (TAM) is the single point of contact for the entire ElasticOps team, and ensures that HCL's capabilities flex with your needs. The TAM is backed by a skilled team of appropriately trained and certified people, focused on delivering our commitments to meet your requirements.
