

## HCL Technologies Unveils Corporate Sustainability Report

Report reflects significant economic, environmental and social impact created at HCL

**Noida, December 17, 2012** – [HCL Technologies](#), a global IT services provider has released its second corporate sustainability report under the Global Reporting Initiative (GRI) 3.1 framework. The report is an indicator of HCL's progress and outcomes in the corporate sustainability areas and has been created as per the A+ application level and externally assured by DNV. The report is aligned to the requirements of Business Responsibility Report (BR Report) in compliance with Ministry of Corporate Affairs' National Voluntary Guidelines on Social, Environmental and Economic Responsibilities of Business.

The sustainability report not only highlights relevant data and numbers but also showcases how HCL has continued to leverage its core competencies, people, values and 'Employees First' culture to reinforce its commitment to the ecosystem including environment and the diverse communities it interacts with. HCL's Sustainability vision is founded on 4 R's - Responsible Business, Redefine Workplace, Renew Ecosystem and Repay Society.

"At HCL we have always believed in the power of communities and ecosystems to drive positive change. Our Sustainability programs also follow this ground rule and have over the years achieved significant momentum on the thrust of active involvement from our employees and partners. I am confident that going forward we will continue to walk this journey to ensure that sustainability performance remains an intrinsic part of HCL's corporate and business strategy ", **Mr. Vineet Nayar, Vice Chairman and CEO, HCL Technologies** said.

This year's sustainability report has drawn inspiration from 5 elements of the nature- atmosphere, fire, water, earth and wind and their characteristics for the sustainability journey. Given below are some of the highlights:

1. Participated in the Carbon Disclosure Project (CDP) India and received a rating of 66/100, which is above the industry-average this year
2. All recently acquired and new campuses outside India are 'green compliant' e.g. the Global Development Centres (GDC) in North America are LEED certified buildings
3. Introduction of Global IT Cloud services reduced the hardware procurement needs of HCL project teams, and thus reducing the total power consumption and cooling requirements by up to 58%. Savings of 20292 units of electricity in FY 2012, with the help of various green IT initiatives launched pan Globe
4. During FY 2012, HCLT volunteers out to 37,000 direct beneficiaries and 70,000 indirect beneficiaries through community outreach programs across the globe. 8000 volunteers spent more than 45,000 person hours on community work

“I am happy to share immense progress we have made towards our unique vision for sustainability. Our employees are the real sustainability champions as they continue to lead, engage and drive community initiatives creating a social and environmental impact every day.” says **Ms. Srimathi Shivashankar, AVP –Diversity & Sustainability HCL Technologies**. “In FY 2012, our absolute emission reduction over the 2010-11 was 20,566 tCO2 and we reduced the per capita emissions by 17% for the same period.”

The GRI framework serves as a generally accepted framework for reporting on an organization’s environmental and social performance. It covers the performance of all the business units of HCL and reflects significant economic, environmental and social impact that can substantially influence the assessments or decisions of the stakeholders.
