HCL

Accelerate your digital transformation journey using the **Azure VMware Solution**

The Microsoft Azure VMware Solution by HCL enables customers to seamlessly extend and deploy the on-prem VMware workload on Azure bare metal infra powered by VMware SDDC.

As we usher into the era of digital transformation, there is a great need for agility, quick deployment and a single view for management that's easily accessible globally. Azure VMware Solution(AVS) is a Microsoft offering that enables the extension and redeployment of VMware workload natively while providing enterprise - grade resilience with cloud-grade capabilities

Building on the foundation of a strong relationship & strategic partnership with Microsoft, HCL, a Gold-certified Microsoft partner helps embracing the true benefits of AVS to seamlessly migrate, extend and run existing VMware workloads from on-premises environments to Azure without the cost, effort or risk of re-architecting applications or re-tooling operations.

Leverage AVS to Thwart Cloud Deployment Challenges

AVS helps mitigate traditional challenges associated with a typical hybrid cloud setup such as:

- Hypervisor compatibility
- Application remediation
- Operational inconsistencies
- Skill sets mismatch
- Disparate management tools and controls

A Rapid Deployment Approach

01
Scan and Consult:
Scanning the environment, analyzing pain points, readiness for transformation, ROI, TCO, business case analysis and demo.

02
Define and Design:
Architecture Design, POC, workflow and orchestration, infrastructure sizing, tabletop assessment and setting up foundation for migration
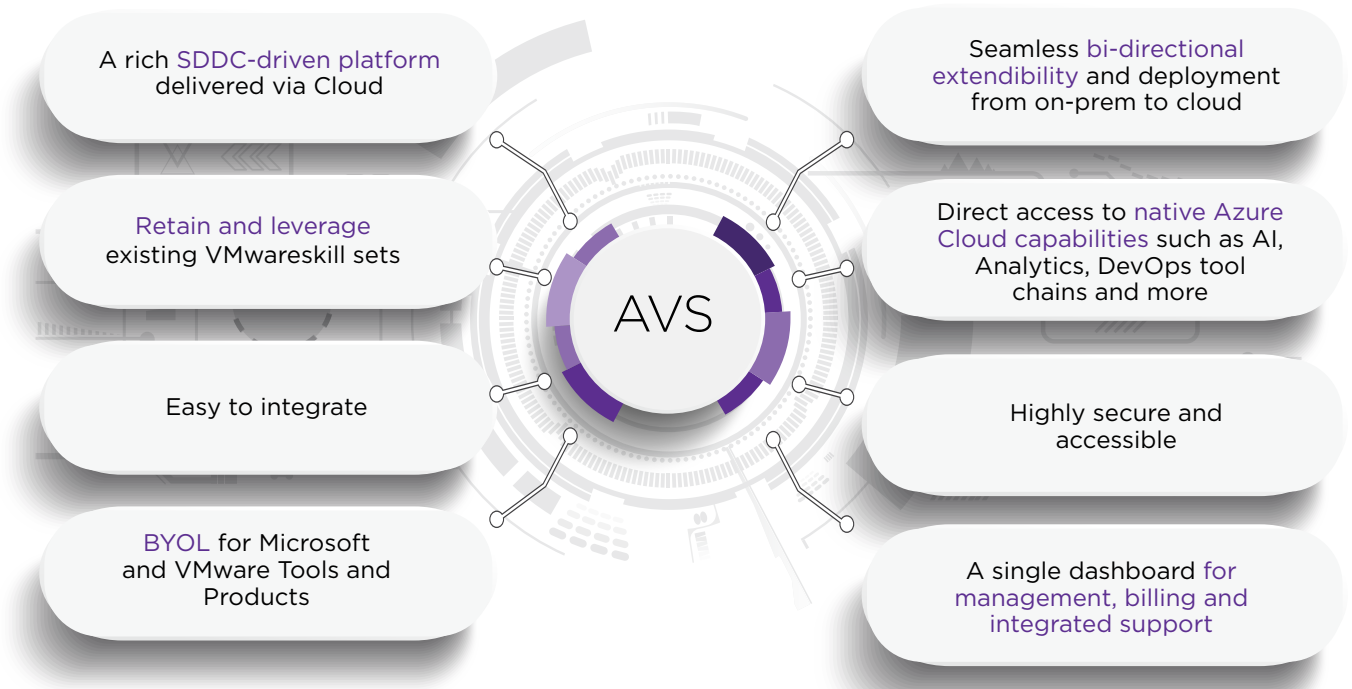

03
Build and Migrate:
Execution and workload migration, compliance and management

04
Run and Manage:
Day 2 operations

The AVS Advantage

A rich SDDC-driven platform delivered via Cloud

Retain and leverage existing VMwareskill sets

Easy to integrate

BYOL for Microsoft and VMware Tools and Products

AVS

Seamless bi-directional extendibility and deployment from on-prem to cloud

Direct access to native Azure Cloud capabilities such as AI, Analytics, DevOps tool chains and more

Highly secure and accessible

A single dashboard for management, billing and integrated support

The AVS Promise

- Free security updates for 3 Years on Windows 2008 and SQL 2008

- Massive saving of up to 75% of licensing cost on Windows 2008 and SQL 2008 migration

- Save up to 90% of licensing cost using Azure Hybrid usage benefit

- Save up to 50% of Infrastructure cost using Reserved Instance

- Best in-class support and availability with an SLA of 99.9

Why Choose HCL

- HCL is Microsoft Gold certified Partner and Microsoft Azure Expert Managed Service Provider (MSP)

- 360-degree Partnership engagement with VMware

- Azure & VMware Certified Resources

- VVD 4.1 certified framework with VCDX certified resource

- Tested and validated functionality & use cases on AVS platform.

- HCL ElasticOps offering AI driven Cloud Managed Services validated by Azure

- Free PoC with a significant investment
