# **Base90** template for Consumer Packaged Goods (CPG)

**SAP, Done Better.**

#SAPbyHCLTech

Digital transformation is changing the game for CPG companies. Smart, connected products, plants, assets, and operations offer the potential for productivity gains, increased quality, cost savings, and improved revenue. Automation can optimize existing manufacturer-wholesale-retail cycles, and also unfold new modes of distribution via omnichannel pipelines.

A modern, digital ERP is the prerequisite for fully realizing the benefits of these innovations. Forward-thinking CPG companies know that digital transformation leveraging the SAP S/4HANA platform is essential for profitable growth and sustainable competitiveness.

To help accelerate your digital transformation and reduce the cost and risk of implementing SAP S/4HANA, HCL Technologies has developed an industry-specific template built on top of SAP S/4HANA best practices for the CPG industry.

## Accelerate your SAP S/4HANA digital transformation

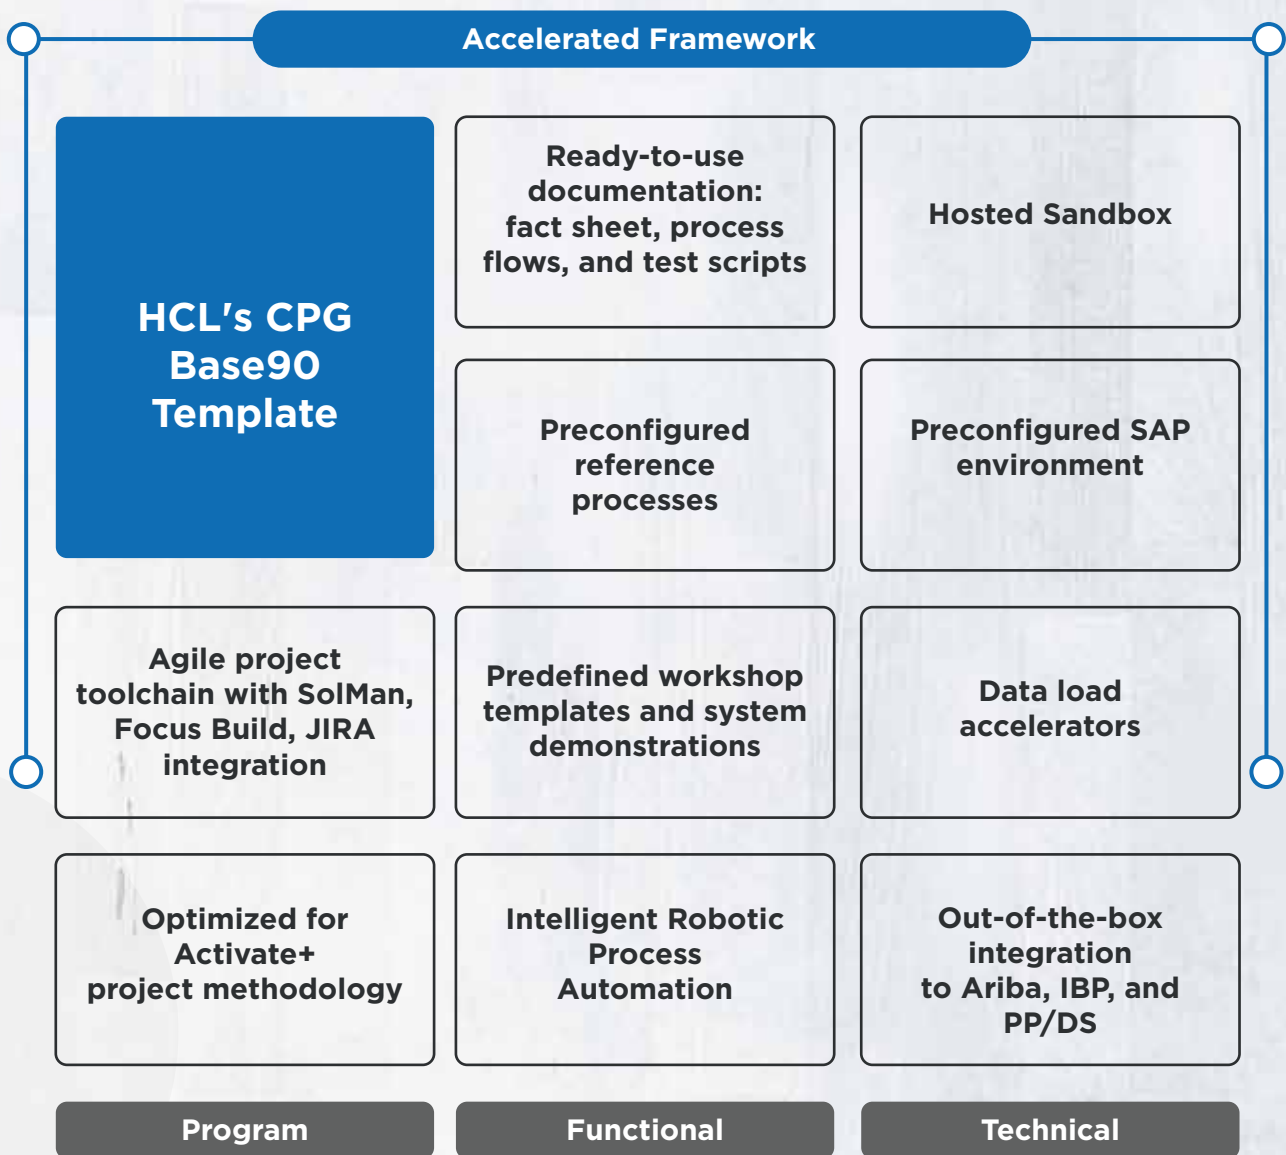

HCL's Base90 template for CPG features a defined implementation methodology, predeveloped project documentation, and a preconfigured SAP system. Built on SAP Business Suite, Base90 for CPG is supplemented by a vast library of preconfigured best practices, flows and scripts, step-by-step user guides, data load and conversion templates, and industry-specific reports and dashboards.

### HCL's Base90 for CPG template features:

- Newly identified SAP S/4HANA business models, innovations, and simplified best practices and processes
- Real-time KPIs and analytics across business processes using SAP SAC
- 65+ SAP S/4HANA best practices iRPA BOTs
- 25+ custom SAP S/4HANA preconfigured iRPA BOTs
- 14+ preconfigured SAP S/4HANA EWM business processes
- 12+ preconfigured SAP S/4HANA decentralized EWM business processes
- 13+ preconfigured SAP S/4HANA embedded PPDS business processes
- 12+ custom SAP S/4HANA EWM mobile apps
- Preconfigured integration template for SAP S/4HANA embedded TM, EWM, Yard Logistics with SAP Logistics Business Networks (LBN) for efficient logistics and warehousing collaborations and processing with carriers
- HCL's automated SAP S/4HANA Smart Conversion tools for faster conversions

- Digital supply chain transformation framework and reference architecture
- HCL's OneTest automation tool for implementing best practices and reducing project timelines
- 130+ key reference best practices processes with documentation readiness, such as configurations, test scripts, and process flows
- 60+ data load accelerators for data migration
- On-premise, cloud, and hybrid deployment options

# HCL's CPG leadership and experience

With over 15 years of experience in consumer product industries, business and process knowledge, and deep SAP expertise, we build solutions that ensure innovation-backed operational excellence.

HCL helps companies maximize user adoption of SAP S/4HANA and new-age digital technology solutions. We provide support at every stage— from business case creation and performance baselining to implementation and user education. HCL's SAP CPG services are listed below:

## Value drivers and benefits

HCL takes a unique benefits realization approach to customer engagements by committing to guaranteed outcomes, such as minimizing operations costs and improving organizational efficiency. The following are examples of value drivers and the benefits realized by our customers:-

- **Improved product development**  
Shorter time-to-market and increased product success rates
- **Increased compliance**  
Ensure regulatory and safety compliance throughout the supply chain and manufacturing process
- **Global inventory visibility**  
Get immediate real-time inventory visibility across the organization
- **Increased supplier collaboration**  
Improve real-time supplier collaboration for faster and better decision-making, leading to long-term increases in efficiency and cost savings

- **Reduced total logistics cost**

Improve efficiency in transportation processes with better process integration

- **Improved on-time production**

Increase productivity and capacity optimization through constraints-based production planning and scheduling

- **Reduced order fulfillment lead time**

Provide full visibility into projected inventories, integrated sales, purchasing, and shipment status updates

- **Improved customer experience**

Offer exceptional customer experience by combining order management with commerce to bridge sales and service

- **Real time track and trace**

Improve real-time global goods traceability and trigger rule-based follow-up transactions

- **Improved supply chain collaborations**

Create transparent and highly responsive supply networks
