

Insider threat monitoring service

#HCLFortius

The Challenge

As important as it is for large enterprises to protect their external perimeter from cyberattacks, the same care and attention must be given to internal threats as well. Be it a well-meaning insider that was not aware of a specific policy, or a malicious attacker using compromised credentials, if you're not watching what is happening internally, you're not addressing half of your company's cyber risk. In fact, statistics now show that insider threats make up a third to a half of all cyber-attacks, and that number is growing rapidly each year. It's simply not enough to just keep an eye on regular employees – users with privileged access and third-party vendors are key actors for malicious insider activity that can result in exfiltration of sensitive corporate data. All these factors combined with the increasing costs of breaches and time that it takes to detect an insider threat puts more pressure on an already overburdened security remediation team.

Solution

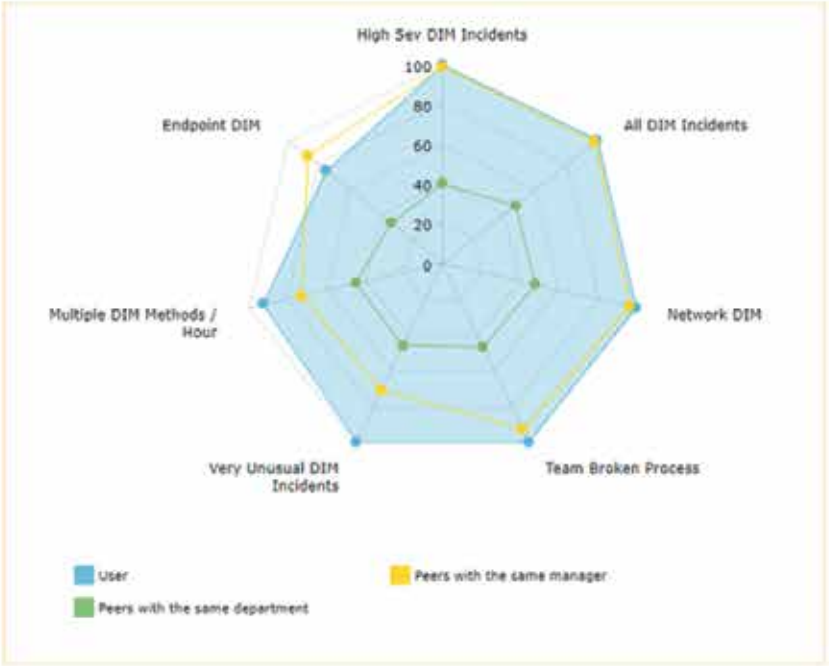

HCL Fortius resources have vast experience in deploying and maintaining insider threat solutions to help your teams stay on top of potentially malicious internal activity. Leveraging some of the latest User Entity Behavioral Analytics (UEBA) software on the market, Fortius can transform your security strategy to help cut through the noise of event-driven detection tools and find that needle in the haystack, while also enabling your teams to do more with less. By pivoting from an incident-by-incident analysis to a more risk-based analysis, Fortius can assist you in implementing a more centralized, automated escalation process through harnessing machine learning techniques that focus on detecting abnormal behavior. Fortius resources can also then remain on to administer and manage these tools as part of our staff augmentation (Security Operations Services) to ensure you are getting the most value out of your investment.

Who should leverage this service?

- Clients overwhelmed with alert fatigue and want to shift to a more risk-based approach when triaging incidents.
 - Clients interested in deploying and utilizing User Entity Behavioral Analytics (UEBA) software within their environment.
 - Clients interested in deploying and utilizing User Entity Behavioral Analytics (UEBA) software within their environment.
- DLP incidents
 - Authentication data
 - Web activity data
 - Endpoint protection and vulnerability data
- Clients wanting to leverage pre-built insider threat use cases, while still having the flexibility to customize their own (for example):
- Unusual login or email activity
 - Behavior of users scheduled for termination
 - Top risky contractors
- Clients who would like to bring product experts into their operational teams through a resident consultant.

Focused on Delivery

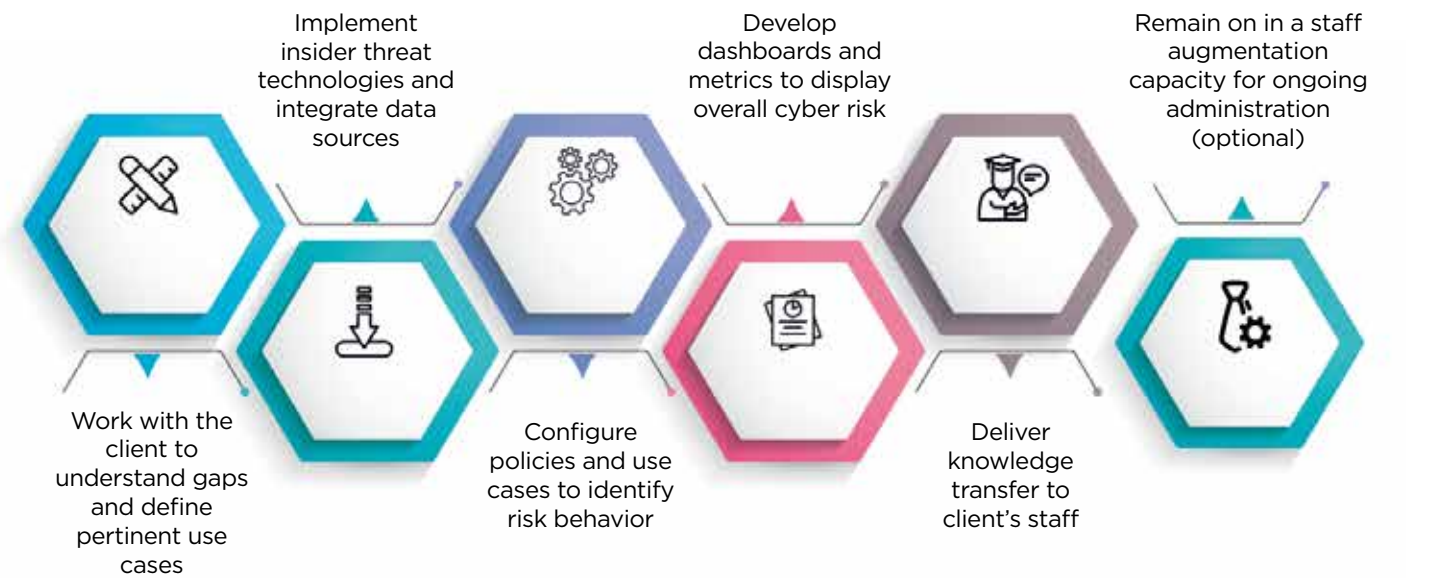

Our standard methodology ensures consistent service delivery, which means that you will always have an expert who to help you reach your business outcomes on time. HCL Fortius provides a proven framework with a result-driven approach, by leveraging our best practices in key areas encompassing business and technical objectives/processes - all in an effort to derive the most value out of the solution for current and future needs.

Insider Threat solutions use dedicated analytics and machine learning to detect and abnormal behaviors within the context of the organization and its business processes, regardless of the environment or program maturity.

How it Works

HCL's Insider Threat Monitoring Service is a pre-packaged professional service effort specifically developed to accelerate your time to value by deploying insider threat capabilities. Consulting Services from Fortius are tailored to deliver a professional, end-to-end implementation of the insider threat solution and address client specific use cases. The result is a design, implementation and configuration of an insider threat platform that meets customer requirements and ensures a successful and optimized operational focus.

Why HCL Fortius?

Our consultants deliver real-world value to help guide organizations in improving their security posture through:

- Acting as a trusted advisor to help design security that meets your operational needs
- Specialization in multiple regulatory requirements our customers face, such as PCI/DSS, HIPAA, and GDPR
- Real-life experience operating solutions in the world's largest and most complex networks
- Direct access to internal product teams enabling faster diagnosis and resolution of issues
- Utilize Subject Matter Experts, proven methodologies, and industry best practices
- Optimize policies and procedures and engage measurable controls to realize greater program maturity
- Informal training to improve your team's effectiveness
- Drive increased value from existing security products
