

Solutions transformation assessment

#HCLFortius

The challenge

Our clients face challenging decisions when it comes to finding the correct mix of cybersecurity solutions to implement in their complex environments. One of those challenges involves replacing the entire solutions with other vendor(s) solutions. Our Solutions Transformation Assessment service offers a unique opportunity to navigate this challenge and successfully identify the right solution for each client's specific requirements.

Solution

Clients requiring objective guidance with these critical decisions can count on HCL Fortius. Our highly skilled cybersecurity consulting team offers a comprehensive approach to helping customer choose the best solutions to enhance and strengthen their cyber security program. The first step in this workshop is to understand your business and technical requirements. Once evaluated, HCL works with your team to fully comprehend the solutions in place to identify and resolve gaps. This process allows HCL the ability to help identify a clear road map to ensure your environment has a stronger cybersecurity program in place. This could include consolidating one or multiple vendor solutions to help strengthen your overall cyber security program. HCL Fortius aligns with the leading security partners in the cyber security arena. This sets us apart from others that are tied to a single vendor.

Who should leverage this service?

- Clients who want to assure their security solution investments are meeting their requirements
- Organizations who are displacing a security solution and want to ensure a smooth transition
- Clients who are apprehensive about their current security posture and would like to review and understand alternative security solutions

Why HCL Fortius?

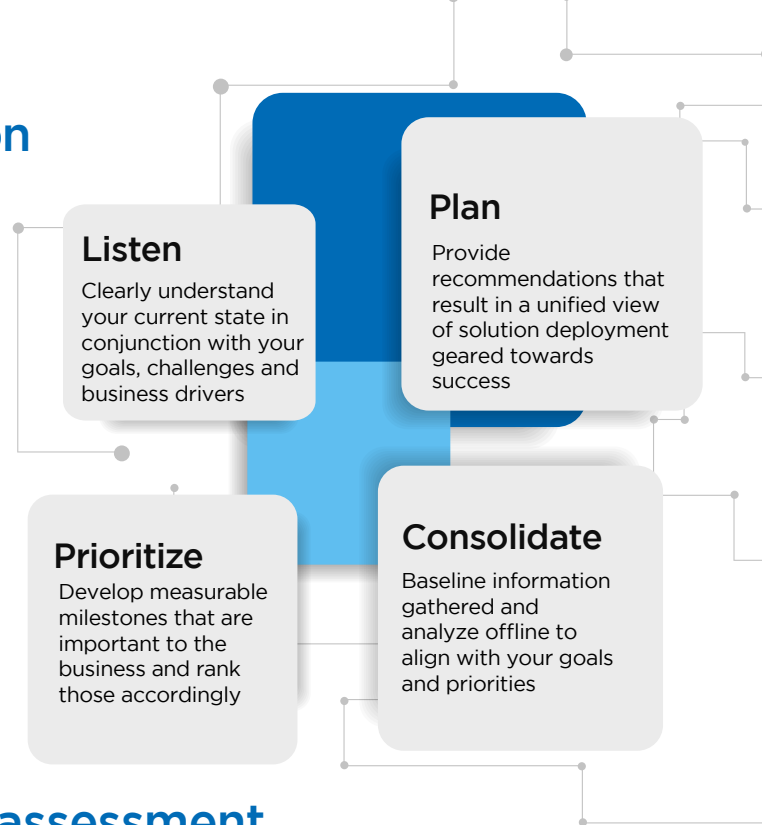

- Clients who want to assure their security solution investments are meeting their requirements
- Organizations who are displacing a security solution and want to ensure a smooth transition
- Clients who are apprehensive about their current security posture and would like to review and understand alternative security solutions

Typical solutions transformation assessment activities

Comprehensive analysis of current cybersecurity solution(s) and processes including zero-Trust and SASE

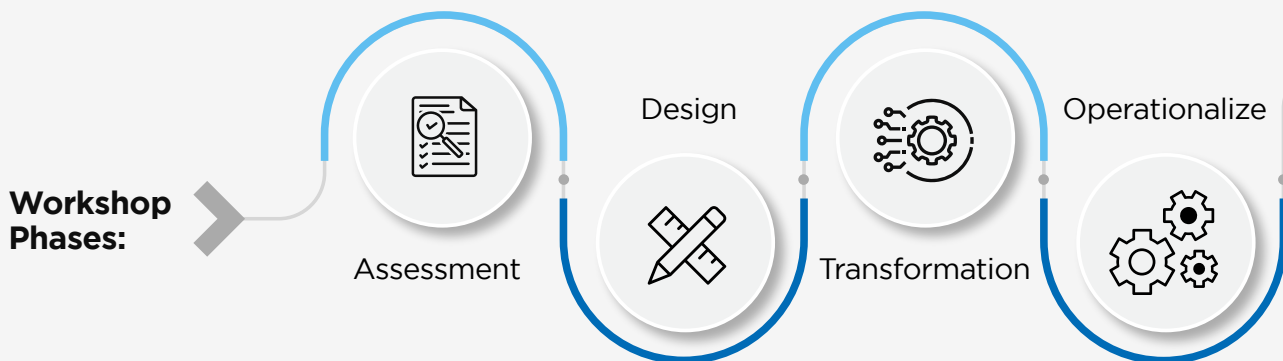

Identify solution gaps (network security, endpoint security, information security, and analytics)

Provide recommendations based on assessment of Solution as well as people and processes

How solutions transformation assessment planning workshops work

Our standard methodology ensures consistent service delivery, which means that you will always have an expert who can help you reach your business outcomes on time and on target. HCL Product Consulting provides a proven framework with a solution driven approach, by leveraging our best practices in key areas encompassing business and technical objectives/processes – all to extract the maximum value out of the solution for current and future needs.

Why HCL Fortius?

Our consultants deliver real world value to help guide organizations in improving their security posture through

- Real-life experience operating solutions in the world's largest and most complex networks
- Direct access to internal product teams enabling faster diagnosis and resolution of issues
- Utilize subject matter experts, proven methodologies, and industry best practices
- Optimize policies and procedures and engage measurable controls to realize greater program maturity
- Informal training to improve your team's effectiveness
- Drive increased value from existing security products
