

Data protection maturity workshop

#HCLFortius

| Summary

It is increasingly important to ensure that your organization has a firm understanding of the data protection requirements and how to get the most out of your current investment. HCL's Fortius Cybersecurity Consulting can partner with you and build a path forward to help you get more value out of your solutions. Our consulting team, who have decades of experience integrating and operationalizing our products, offers an onsite or remote Data Protection Maturity Workshop. While this is typically a paid engagement, we will deliver this free of charge as an investment in improving your environment and strengthening our partnership.

This is a high-level discussion focused on the organizational programs and processes which encompass DLP and the related data protection technologies. The key attendees for this workshop are senior decision makers for data protection, such as the strategic leader for data protection and the operational leader for data protection or DLP technologies. The operational and strategic team members associated with the two leaders described are also welcome to attend. They may provide greater detail as we discuss specific details of how strategic guidance makes its way to operational implementation.

| Maturity Model Elements

Who should attend

- Lead strategic decision maker
- Lead operational decision maker
- Other relevant team members (optional)

Logistics

- We provide a facilitator and delivery experts to drive the workshop and share information with you
- 4 hours with 4 to 8 resources from your team
- Typically involves resources from your IT, security, compliance, and architecture
- Is an interactive information sharing activity that gives you the ability to collaborate with high-level security practitioners that have deployed our technologies at similar customers

Agenda*

- **9:00 to 9:15** – Introductions, overview, and ice breaker
- **9:15 to 9:45** – Understand your goals and challenges
- **9:45 to 11:45** – Discuss product maturity best practices
- **11:45 to 12:45** – measure product maturity
- **12:45 to 1:00** – Workshop wrap-up and review next steps

*Assumes 9 AM workshop start and 4-hour commitment

| Value

Quickly catalog your concerns so that we can subsequently develop an action plan to mitigate them.

Ensure we understand your current technical and business goals around data protection

Establish a maturity baseline across deployment, configuration, and operational vectors that we can both use to measure data protection maturity over time

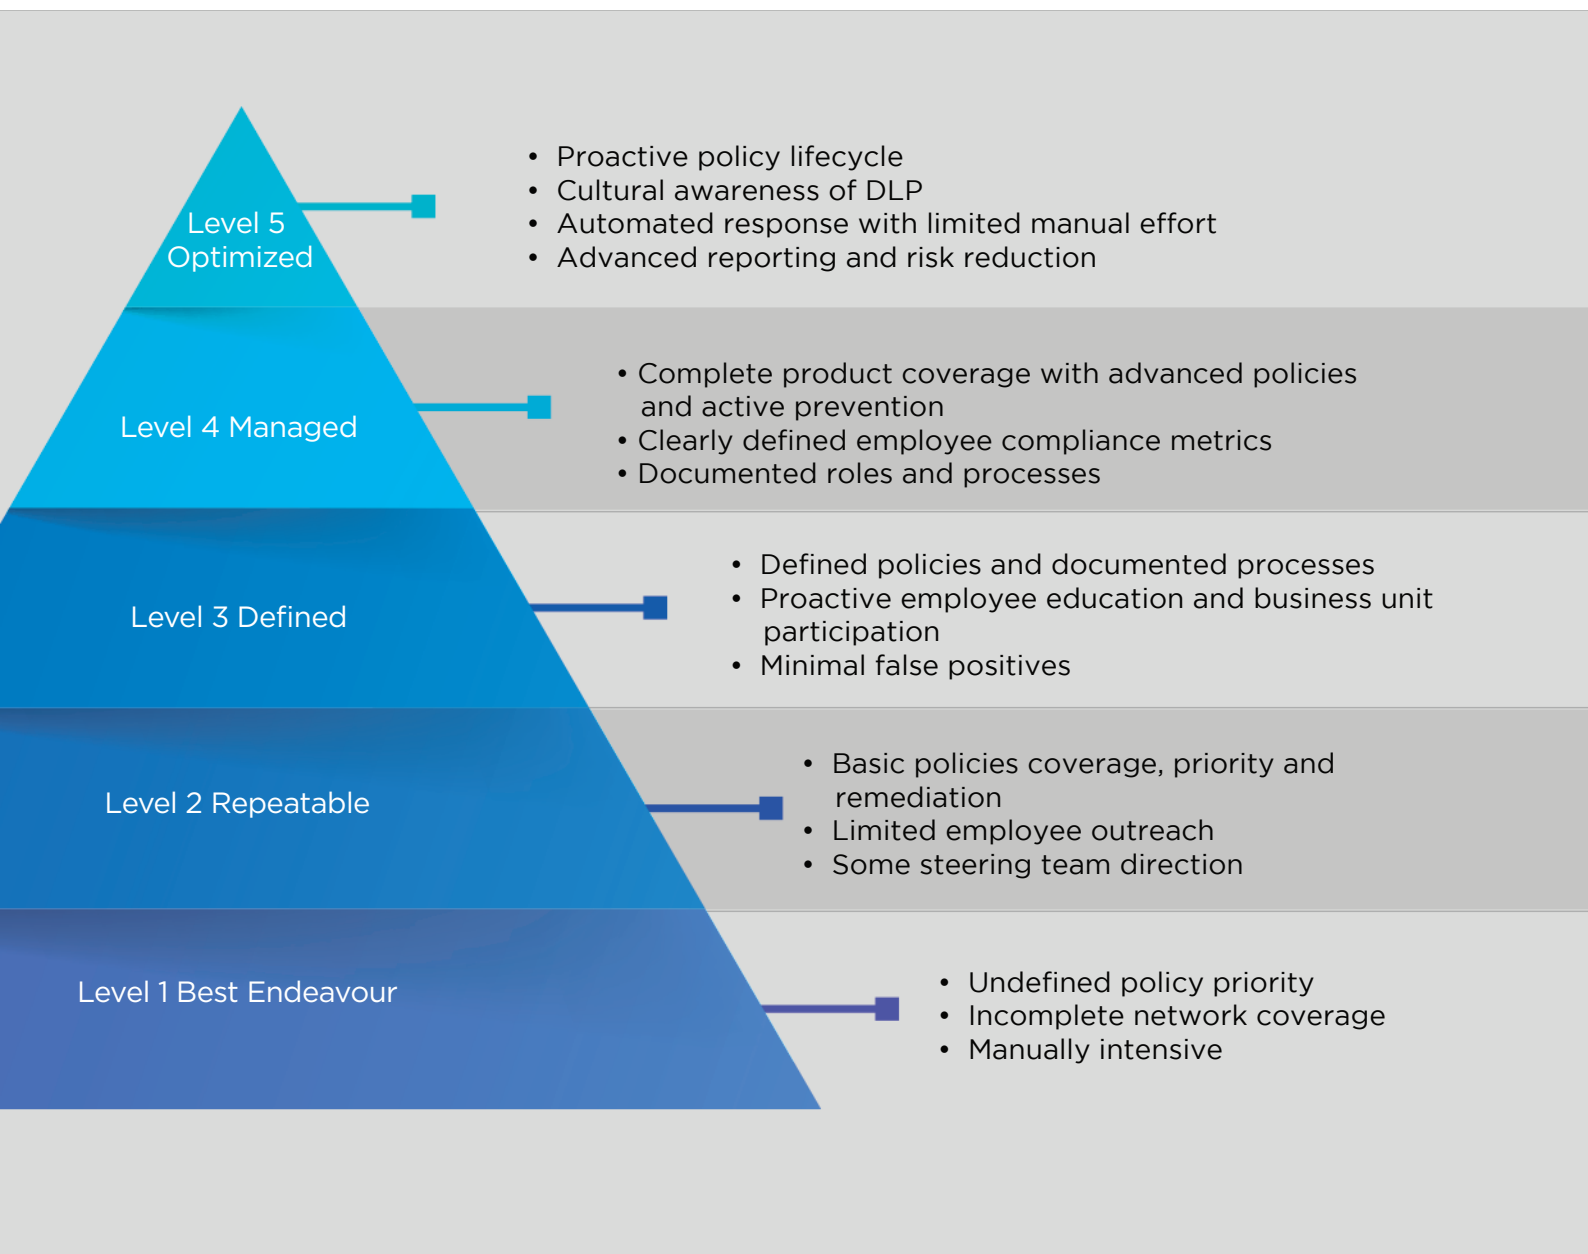

Analyze best practices over the six key maturity model elements: program governance, enterprise coverage, policy coverage, remediation, security awareness, and metrics and reporting

Provide you with a deliverable that you can share with executive leadership that will provide valuable input for your data protection roadmap

Provide you with direct access to practitioners who deploy these technologies on a daily basis and allow you to learn best practices from them

| Why HCL's Fortius cybersecurity consulting

Our consultants deliver the value and power of global consulting, by creating a bridge between your staff and our teams through the following:

- Real-life experience operating solutions in the world's largest and most complex networks
- Direct access to internal product teams enabling faster diagnosis and resolution of issues
- Utilize subject matter experts, proven methodologies and leading industry best practices
- Optimize policies and procedures and engage measurable controls to realize greater program maturity
- Informal training to improve your team's effectiveness
- Drive increased value from vendor products
- Access to several managed service provider offerings from the larger HCL Technologies catalog

HCL

HCL Technologies (HCL) empowers global enterprises with technology for the next decade today. HCL's Mode 1-2-3 strategy, through its deep-domain industry expertise, customer-centricity and entrepreneurial culture of ideapreneurship™ enables businesses to transform into next-gen enterprises.

HCL offers its services and products through three lines of business - IT and Business Services (ITBS), Engineering and R&D Services (ERS), and Products & Platforms (P&P). ITBS enables global enterprises to transform their businesses through offerings in areas of Applications, Infrastructure, Digital Process Operations, and next generation digital transformation solutions. ERS offers engineering services and solutions in all aspects of product development and platform engineering while under P&P. HCL provides modernized software products to global clients for their technology and industry specific requirements. Through its cutting-edge co-innovation labs, global delivery capabilities, and broad global network, HCL delivers holistic services in various industry verticals, categorized under Financial Services, Manufacturing, Technology & Services, Telecom & Media, Retail & CPG, Life Sciences, and Healthcare and Public Services.

As a leading global technology company, HCL takes pride in its diversity, social responsibility, sustainability, and education initiatives. As of 12 months ending on March 31, 2022, HCL has a consolidated revenue of US \$ 11.48 billion and its 208,000 ideapreneurs operate out of 52 countries. For more information, visit www.hcltech.com
