

HCL Nippon

One-stop solution for employee
productivity and efficiency measurement

Key capabilities

HCL Nippon application is a unique solution designed to measure employee productivity and efficiency. This one-of-a-kind offering enables employees to monitor their daily activities based on the hours spent on individual projects. Likewise, a similar distribution can be seen in terms of the past performance and any discrepancy can be flagged and corrected. The application also helps managers evaluate the performance of their team members as well as measure inter team performances.

Implementation

Requires minimal cloud product configuration

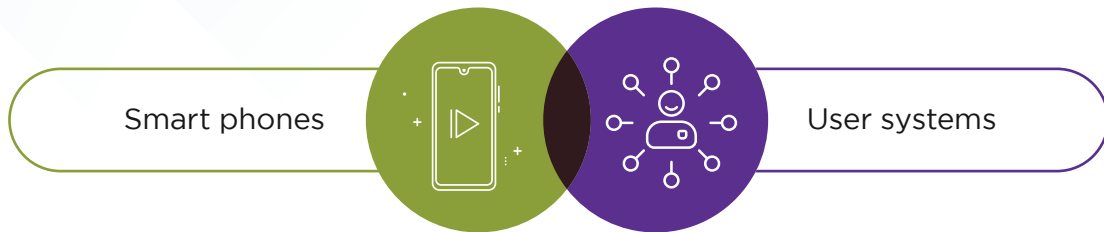

Pricing

The pricing varies based on the following considerations:-

- » Price for customer cloud solution (usage based/consumption-based pricing)
- » Additional services-based price - Subject to the agreed scope with the customer

Prerequisites

Preferred, not subject to limitations:-

Why HCL Technologies?

01

Strong expertise and experience in smart product engineering

02

Helps uncover business value and new revenue streams

03

Industry-leading client success stories and analyst ratings

04

Consistent deliverance of industry-specific client requirements

Solution features

Nippon is natively developed using SAP cloud-native apps on SAP BTP. Here are the use cases of this game-changing solution:-

Activity tracking

The user can monitor the overall screen time for a particular day and the distribution of individual projects.

Productivity measurement

Based on the working hour distributions of each project and their past distributions, the user can plan and determine which project needs greater priority.

Automated data submission

The user need not provide attendance every day and can opt for auto submission of work hours. Once enabled, the app automatically tracks a record of the hours spent on the system, and auto submits it to the attendance roster.

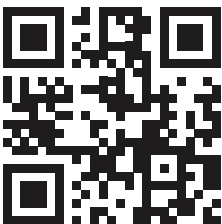

Performance evaluation

The application allows managers to keep a track of employee performance. These analytics enable managers to measure the efficiency of the overall team, and compare it with other teams.

HCL Technologies (HCL) empowers global enterprises with technology for the next decade today. HCL's Mode 1-2-3 strategy, through its deep-domain industry expertise, customer-centricity and entrepreneurial culture of ideapreneurship™ enables businesses to transform into next-gen enterprises.

HCL offers its services and products through three lines of business - IT and Business Services (ITBS), Engineering and R&D Services (ERS), and Products & Platforms (P&P). ITBS enables global enterprises to transform their businesses through offerings in areas of Applications, Infrastructure, Digital Process Operations, and next generation digital transformation solutions. ERS offers engineering services and solutions in all aspects of product development and platform engineering while under P&P. HCL provides modernized software products to global clients for their technology and industry specific requirements. Through its cutting-edge co-innovation labs, global delivery capabilities, and broad global network, HCL delivers holistic services in various industry verticals, categorized under Financial Services, Manufacturing, Technology & Services, Telecom & Media, Retail & CPG, Life Sciences, and Healthcare and Public Services.

As a leading global technology company, HCL takes pride in its diversity, social responsibility, sustainability, and education initiatives. As of 12 months ending on March 31, 2022, HCL has a consolidated revenue of US \$11.48 billion and its 209,000 ideapreneurs operate out of 52 countries. For more information, visit www.hcltech.com
