A complete approach to
adopting SAP enterprise mobility

Why SAP BTP Mobile Services is key to your enterprise mobility strategy

A well-executed mobility strategy can be a competitive advantage, with optimized processes resulting in more productive and satisfied employees, quicker access to data and faster response times, better and more efficient communications, and revenue growth.

SAP's Mobile Services bring additional benefits to enterprise users. Business processes can be optimally enhanced with intelligent features enabled through SAP Mobile Services, and mobile application development, configuration, and management is greatly simplified–reducing development time and cost.

SAP BTP Mobile Services also features

- ‣ Integration with heterogeneous landscapes and newer technologies, enabling continuous innovation and adoption of new features found in advanced niche technologies

- ‣ Enhanced security standards, providing secure access to sensitive enterprise data SAP's no-code platform, allowing citizen developers to build quick mobile apps to enhance a business process

- ‣ A wide range of technical options, so you can choose what is best suited for the use case

- ‣ Allows you to harnesses the power of native features from mobile devices

The result? Adopting SAP enterprise mobility increases productivity, with operational cost reduction and better collaboration.

Key benefits at a glance

No-code development	Ensures better collaboration	Unified UX for branding
Leverages native features	Enhanced productivity	Enables efficient communication
Secured data access	Intelligent technologies	Reduces operational cost

Our flexible, guided approach to mobility adoption

Our five-step approach provides the flexibility needed to move forward with SAP Mobile Services on the SAP BTP platform

Step 1

Educate- We start with a workshop to help key stakeholders understand the advantages of SAP BTP capabilities focusing on mobility adoption and raising awareness of key features and business outcomes.

Step 2

Assess- A complete assessment of your landscape follows. SMEs share prerequisites, best practices, and the preferred landscape, and identify potential mobility use cases.

Step 3

Pilot- We plan and execute a four-week pilot utilizing an identified use case, employing low/no-code tools to help business users recognize the benefits of mobility.

Step 4

Scale- Scale up with further mobilization of business processes, or a migration of apps from on-premises to cloud or moving web to hybrid.

Step 5

Sustain- By choosing a longer-term partnership with HCLTech, a dedicated offshore team will work alongside your team, providing ongoing knowledge transfer and insight into new innovations and technology trends.

Our flexible pricing catalog

HCLTech's flexible pricing catalog makes adoption easy. We offer four plans suited to different organizational needs, outlined below:

‣ **Starter** offers a basic awareness program with detailed assessment and SAP Mobile Start recommendations.

‣ **Advanced** provides strategic roadmap definition and SAP Mobile Start configuration for quick onboarding to SAP mobility with existing applications. It also includes a quick pilot to realize the benefits of SAP mobility.

‣ **Pro** scales the mobile footprint across the organization, offering multiple mobile app delivery.

‣ **Ultimate** is a long-term partnership engagement aimed at helping you develop, migrate, and maintain applications. We provide your team with further training and mentoring so they gain a deeper understanding of the technologies and continued integration with intelligent technologies in SAP BTP.

An overview of each plan is provided below:

Starter	Advanced	Pro	Ultimate
