HCLTech | Supercharging Progress™

Threat assessment and remediation services

Helping to enhance your Log4J response

The challenge

Zero-day threats. This is what keeps CISOs up at night. When you don't know what you don't know, how can you adequately protect your infrastructure and data? Whether it's standard application and asset vulnerabilities, or more complicated supply chain attacks, IT security managers whose staff are already stretched thin have little time to react once zero-day exploits are reported. The instant these attacks make headlines, you're already working from behind to determine where such vulnerabilities exist in the environment, how they get remediated, and whether or not they have been exploited. Add in a growing attack surface as more companies migrate their applications to the cloud, and there simply aren't enough hours in the day to manage your security landscape to effectively react to threats when they arise. What is your plan to address the next Log4J? The next SolarWinds? The next WannaCry?

Solution

HCLTech Fortius Cybersecurity Consulting is your trusted partner in addressing and responding to the latest cyber threats. Our team of seasoned consultants will work with you to evaluate your current vulnerabilities, determine your risk posture, and develop an action plan for remediation. If required, HCLTech Fortius can also staff resources to act as an extension of your security operations team to execute on the remediation plan provided. Additionally, HCLTech Fortius can conduct forensic activities to determine if these vulnerabilities were exploited, or if any malicious activity occurred as a result of the exposure. Engage with HCLTech Fortius to help combat current threats and stay ahead of the next one.

Who should leverage this service?

- Clients who need assistance assessing their vulnerability risk posture to specific threats
- Clients looking for staff augmentation services to develop and execute on patching/remediation plans
- Clients requiring forensic analysis identifying indicators of compromise

Why HCLTech Fortius?

Our standard methodology ensures consistent service delivery, which means that you will always have an expert who to help you reach your business outcomes on time and on target. HCLTech Fortius cybersecurity consulting provides a proven framework with a results driven approach. We leverage our best practices in key areas encompassing business and technical objectives/processes all in an effort to derive the most value out of the solution for current and future needs.required expertise to meet your cybersecurity demands

- Drive increased value from existing security products and processes

Identify
Detect and isolate vulnerabilities related to threat
01

Plan
Develop a remediation plan to patch apps and devices
02

Deploy
Execute on patch program and manage patch deployments
03

Validate
Confirm vulnerability remediation and risk reduction
04

Assess
Determine if a breach occured as result of the vulnerability
05

Prepare
Proactively scan, perform tabletop excersies for future response
06
