

Solutions transformation assessment

The challenge

Our clients face challenging decisions when it comes to finding the correct mix of cybersecurity solutions to implement in their complex environments. One of those challenges involves replacing the entire solutions with other vendor(s) solutions. Our Solutions Transformation Assessment service offers a unique opportunity to navigate this challenge and successfully identify the right solution for each client's specific requirements.

Solution

Clients requiring objective guidance with these critical decisions can count on HCLTech's Fortius. Our highly skilled cybersecurity consulting team offers a comprehensive approach to helping customer choose the best solutions to enhance and strengthen their cyber security program. The first step in this workshop is to understand your business and technical requirements. Once evaluated, HCLTech's works with your team to fully comprehend the solutions in place to identify and resolve gaps. This process allows HCLTech's the ability to help identify a clear road map to ensure your environment has a stronger cybersecurity program in place.

This could include consolidating one or multiple vendor solutions to help strengthen your overall cyber security program. HCLTech's Fortius aligns with the leading security partners in the cyber security arena. This sets us apart from others that are tied to a single vendor.

Who should leverage this service?

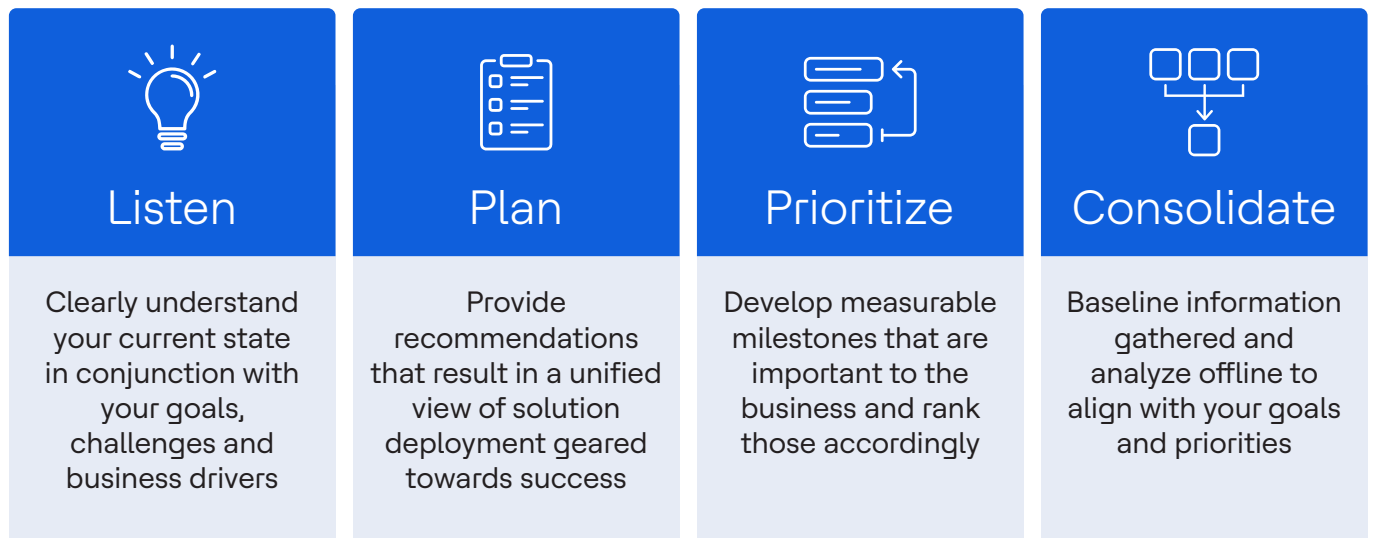

- Clients who want to assure their security solution investments are meeting their requirements
- Organizations who are displacing a security solution and want to ensure a smooth transition
- Clients who are apprehensive about their current security posture and would like to review and understand alternative security solutions

Why HCLTech's Fortius?

- Clients who want to assure their security solution investments are meeting their requirements
- Clients who are apprehensive about their current security posture and would like to review and understand alternative security solutions

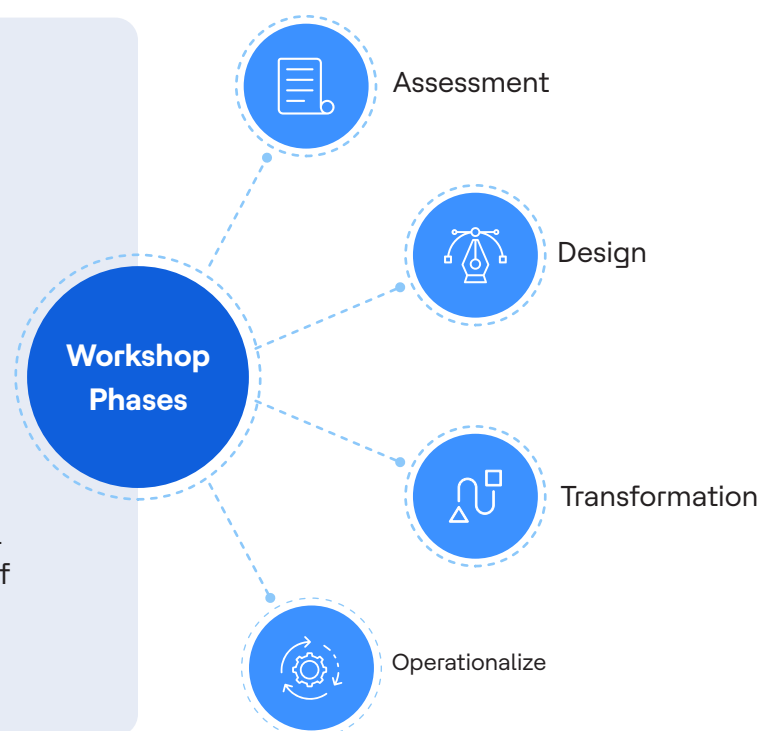

Typical solutions transformation assessment activities

- Comprehensive analysis of current cybersecurity solution(s) and processes including zero-Trust and SASE
- Identify solution gaps (network security, endpoint security, information security, and analytics)
- Provide recommendations based on assessment of Solution as well as people and processes

How solutions transformation assessment planning workshops work

Our standard methodology ensures consistent service delivery, which means that you will always have an expert who can help you reach your business outcomes on time and on target. HCLTech's Product Consulting provides a proven framework with a solution driven approach, by leveraging our best practices in key areas encompassing business and technical objectives/processes – all to extract the maximum value out of the solution for current and future needs.

Why HCLTech's Fortius?
