Mosaic

A license analyzer and predictability tool for RISE with SAP

Cloud Adoption, made easier

SAP license management is complex – and many customers struggle to understand and optimize their license spend.

This challenge becomes more acute when building a value case for RISE with SAP. Lack of reliable data on license inventory and system consumption, along with confusion over how to translate perpetual licenses into RISE Full Use Equivalent (FUE) – can make it hard to project the total cost of ownership under RISE.

We developed Mosaic to provide a holistic, simplified view of your total cost of ownership, so you can make data-driven decisions regarding license purchases, renewals, or upgrades.
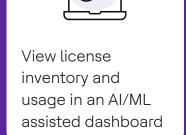

Demystify your RISE with SAP licensing needs

Mosaic is a cloud-based solution that serves as a single platform for all information on license usage, conversion, and re-classification to optimize license shelf-ware. Mosaic evaluates license requirements across direct access, infrastructure, digital access and LOB solutions, and automatically translates perpetual licenses into RISE Full Usage Equivalent (FUE).

By evaluating current licenses along with system consumption (both apps and infrastructure), Mosaic provides the data you need to optimize licenses – and costs.

Three simple steps to license and cost transparency

Mosaic helps understand RISE with SAP licensing in three simple steps.

Execute license analysis reports in the system and upload into the tool

View license inventory and usage in an AI/ML assisted dashboard

Finalize the license requirements, cost, and estimated TCO

With the help of AI/ML algorithms and the processing of data automatically on the SAP BTP platform, Mosaic accelerates the license optimization process and helps reduce shelf ware.

Mosaic benefits and features

Existing SAP users can also leverage this solution to consistently track, evaluate, and manage software licenses, compliance, and optimization to aid ongoing monitoring capabilities.

License and system monitoring
Mosaic collects and showcases system data consumption, so you can better understand use of purchased licenses and other IT assets.

License optimization
Mosaic interprets the current system consumption and suggests license type, such as user, infrastructure, digital access, and support to help you better understand the total cost of ownership.

Lower risk of software license audit and penalties
Mosaic simplifies compliance efforts by providing information on over-usage, renewals, etc. of the licenses.

Key Benefits

Supervision
Understand and optimize the current system consumption to adjust the license spend

Cost savings
Helps balance software spending with usage patterns, reduce waste, and optimize licensing

Future readiness
Ensures compliance and penalty avoidance

About HCLTech's SAP Practice

To get the best return on your digital investments, you need a partner that doesn't just do SAP right, but does it better. Our SAP practice works seamlessly with HCLTech 's digital consulting, engineering services, IoT WoRKS™, and cloud infrastructure practices to design, implement, and support tomorrow's integrated, intelligent solutions today. As an SAP Global Strategic Services Partner, our 10,000+ consultant base leverages insights, advanced accelerators, and industry-acclaimed frameworks to deliver award-winning services from local offices across Europe, Africa, Asia, and the Americas.

SAP, Done Better.
