HCLTech | Skytap

Accelerate your cloud journey with **Skytap** on Azure

Business agility is critical for modern-day enterprises. Yet, due to legacy infrastructure, enterprises running traditional workloads often need to deal with challenges such as time to scale, high capex and security concerns. Transitioning to cloud wherever necessary, has thus become a business priority now, and more and more organizations are taking the plunge.

Gartner predicts that by 2025, 80 percent of enterprises will shut down their traditional data centers. Cloud migration, therefore, is the way forward for many workloads but it also involves considerations like time, cost, operational sustainability and data security to ensure that desired objectives are achieved in the stipulated timeframe.
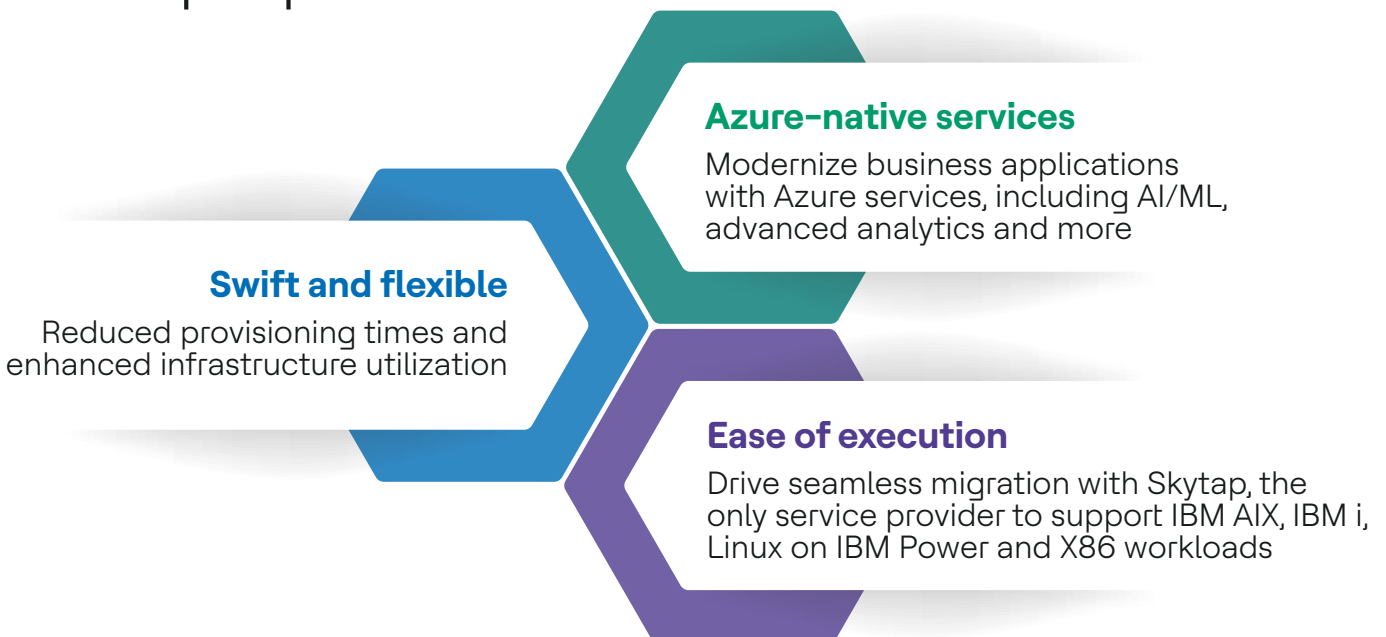

Skytap on Azure

HCLTech's Skytap on Azure services enable traditional workloads to run seamlessly on Azure, providing a resilient, faster and affordable way for enterprise cloud transformation journey.
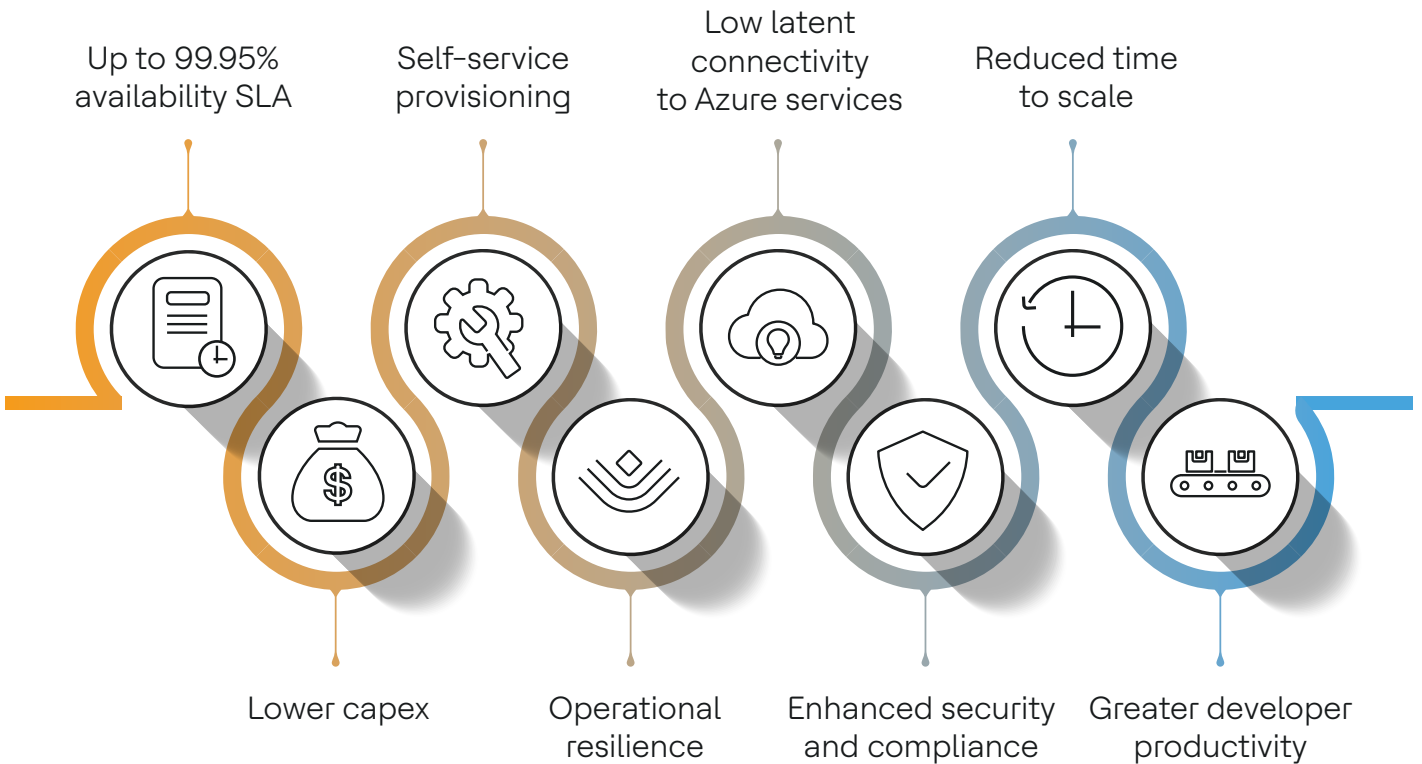

Skytap on Azure helps organizations to reap the benefits of cloud with an optimized effort. This service includes a cloud-based solution that executes IBM i, IBM AIX, Linux on IBM Power and x86 workloads natively in Azure, without the need for refactoring, rewriting and re-architecting mission-critical workloads. Customers can now seamlessly run, move, secure and develop business applications, leveraging HCLTech's extensive IBM Power and Azure experience combined for this offering.

Value proposition

Azure-native services

Modernize business applications with Azure services, including AI/ML, advanced analytics and more

Swift and flexible

Reduced provisioning times and enhanced infrastructure utilization

Ease of execution

Drive seamless migration with Skytap, the only service provider to support IBM AIX, IBM i, Linux on IBM Power and X86 workloads
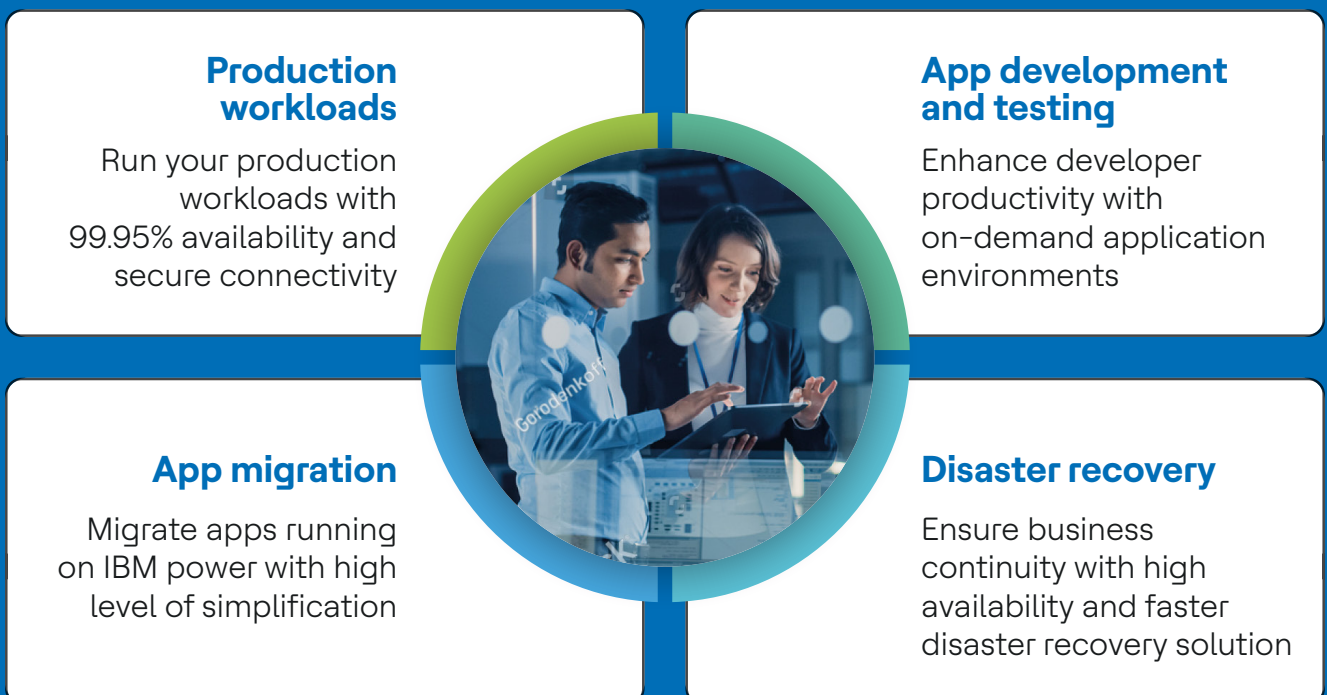

HCLTech services: Our extensive IBM and Azure experience spanning decades enables us to provide global skills, services and offerings for a successful cloud journey.

Key benefits

Up to 99.95% availability SLA

Self-service provisioning

Low latent connectivity to Azure services

Reduced time to scale

Lower capex

Operational resilience

Enhanced security and compliance

Greater developer productivity

Use cases

Production workloads

Run your production workloads with 99.95% availability and secure connectivity

App development and testing

Enhance developer productivity with on-demand application environments

App migration

Migrate apps running on IBM power with high level of simplification

Disaster recovery

Ensure business continuity with high availability and faster disaster recovery solution

HCLTech differentiators

◆ Leader in all analyst reports for cloud (IDC, Everest Group, ISG, Avasant and Gartner)

◆ Microsoft Cloud Adoption Framework (CAF) enterprise-scale certified partner

◆ One of the first global SIs to attain the Solutions Partner designation in the Microsoft Cloud Partner program

◆ Extensive pool of Azure-certified professionals and trained resources across Microsoft & IBM technologies

Partners

Microsoft | **Skytap**
