

Hybrid FinOps

Transforming financial operations for multicloud and AI-driven architectures

As organizations navigate increasingly complex cloud ecosystems, financial accountability must evolve beyond traditional public cloud models. HCLTech's Hybrid FinOps solutions are designed to power the next-generation FinOps framework, delivering comprehensive visibility, cost optimization and governance across diverse environments, including Public Cloud, SaaS, Data Centers, AI platforms, Licensing and Edge infrastructure.

Key approach

In line with the evolving FinOps framework, HCLTech's Hybrid FinOps bridges the gap between traditional IT and modern cloud environments. Our approach integrates data from diverse platforms to create a holistic FinOps practice that is scalable, intelligent and automation-first.

Cross-domain coverage

Public and Private Cloud, VPCs, On-Prem Data centers, SaaS, AI/ML workloads and Licensing

Automated governance

FinOps-as-Code embeds policies and controls into CI/CD and DevOps workflows

AI-driven insights

Predictive optimization, anomaly detection and cost forecasting

Unified visibility

Centralized dashboards for hybrid spend and performance metrics

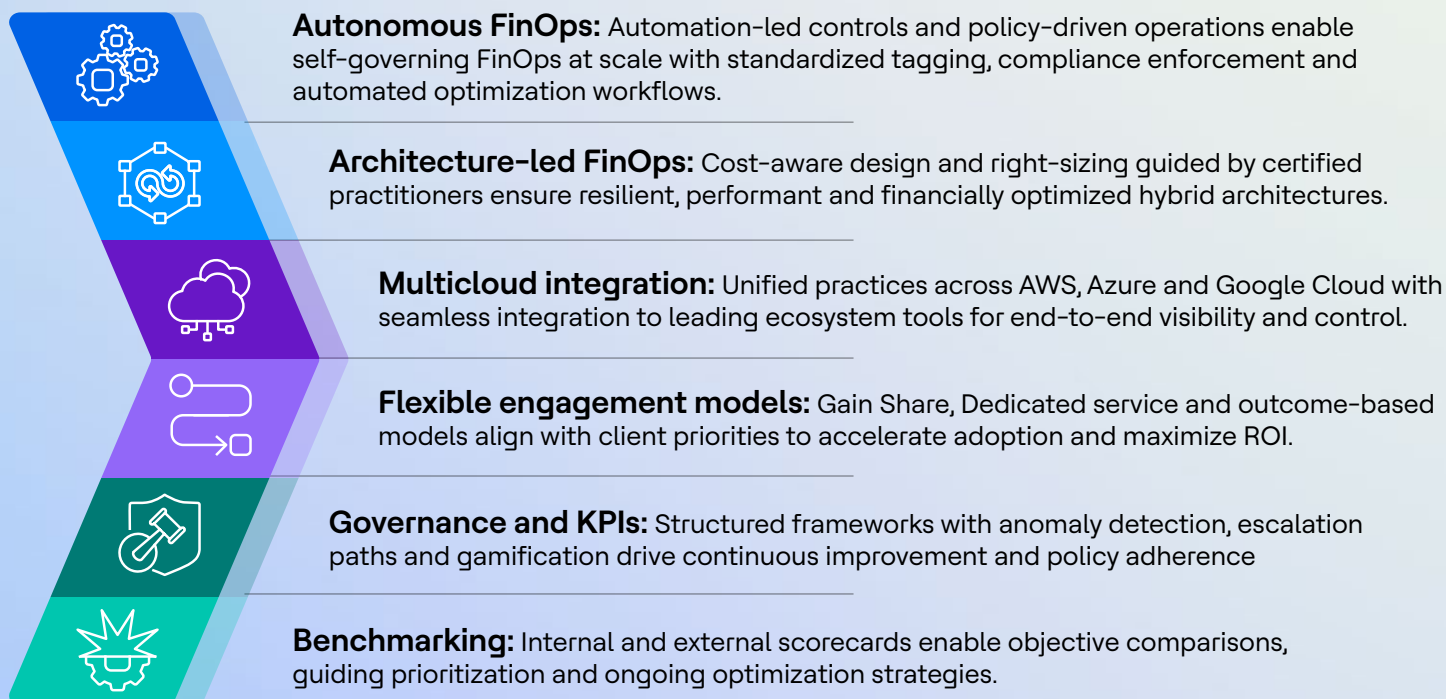

Smart allocation

Business-context tagging and auto-remediation for idle or orphaned

Hybrid FinOps accelerates maturity by aligning costs with business priorities, intelligently and at scale.

Key pillars

HCLTech's FinOps framework drives financial accountability, cost efficiency and governance across hybrid and multicloud environments through six core pillars:

Service portfolio

FinOps consulting and assessment	Fully managed service	Day 2 operations
<ol style="list-style-type: none">I. FinOps maturity assessment and gap analysisII. Framework and governance designIII. KPI identification and tool guidance	<ol style="list-style-type: none">I. Platform adoption and FinOps operationsII. Visibility, recommendations and savings realizationIII. Regular performance reviews with stakeholders	<ol style="list-style-type: none">I. Ongoing FinOps platform managementII. Continuous optimization through stakeholder insightsIII. Governance through cadence reviews and

Key features

- 
- **Dynamic budgeting and forecasting**
Automation-led controls and policy-driven operations enable self-governing FinOps at scale with standardized tagging, compliance enforcement and automated optimization workflows.
 - **Real-time cost visibility**
Interactive dashboards with granular insights at project, team and service levels.
 - **AI-powered optimization**
Predictive cost analysis, anomaly detection and automated recommendations.
 - **Continuous compliance**
FinOps-as-Code for automated policy enforcement and operational efficiency.
 - **Smart tagging frameworks**
Context-aware tagging for complete resource traceability and accountability.
 - **Transparent cost allocation**
Showback and chargeback models based on usage, ownership and KPIs.
 - **Benchmarking and gamification**
Comparative scoring to drive cost accountability and performance improvement.

Partner ecosystem

Why HCLTech for FinOps?

- **Recognized by analysts**
Consistently ranked as a leader in cloud and FinOps by IDC, Everest Group, ISG, Avasant and Gartner.
- **FinOps foundation premier partner**
Active contributor to global best practices and accredited as a certified service provider.
- **Robust partner ecosystem**
Strategic partnerships with Apptio, Flexera, CloudHealth, Turbonomic, CAST AI and more.
- **Deep expertise**
One of the largest pools of certified FinOps practitioners among GSIs.
- **Cross-industry delivery**
Proven success across BFSI, retail, manufacturing, healthcare and technology sectors.
- **Scalable models**
From advisory to fully managed FinOps-as-a-Service tailored to client maturity and architecture

HCLTech Hybrid FinOps empowers enterprises to achieve true financial accountability across complex, multicloud and AI-driven ecosystems. By combining automation, AI insights and governance into a unified framework, we help organizations optimize costs, enhance transparency and align technology investments with business priorities. Our proven expertise and strong partnerships ensure scalable solutions for every stage of FinOps maturity. With HCLTech, you can unlock sustainable value, today and in the future.

HCLTech | Supercharging Progress™

HCLTech is a global technology company, home to more than 226,600 people across 60 countries, delivering industry-leading capabilities centered around AI, digital, engineering, cloud and software, powered by a broad portfolio of technology services and products. We work with clients across all major verticals, providing industry solutions for Financial Services, Manufacturing, Life Sciences and Healthcare, High Tech, Semiconductor, Telecom and Media, Retail and CPG, Mobility and Public Services. Consolidated revenues as of 12 months ending September 2025 totaled \$14.2 billion. To learn how we can supercharge progress for you, visit hcltech.com.
