

Channelizing digital experiences: Direct to Consumer (D2C) re-defined

Not long ago, large CPG companies in developed markets had little to worry about. Their products dominated retail shelves. Their brands were household names. Their reputations were strong. In the new normal however, everything has changed. Consumers want more. New technologies are readily accessible, allowing them to be 'always-online' consumers. Emerging revenue models are enabling new avenues of growth.

Ultimately, to thrive in the online world, CPG companies need to fundamentally rethink how they compete. By strengthening their e-Commerce capabilities, these companies will be taking a significant step in their journey to becoming a fully digital entity. By building their digital maturity, they will make their brands and their customer experiences even stronger than they were before.

Trends and Business Opportunities

In tomorrow's hyper connected world. the battle will be for customer ownership. To avoid being dis-intermediated. the CPG players will need to build or partner on intelligent engagement platforms. The challenge is to deliver seamless, immersive digital experience along the entire customer journey.

A X2

The CPG Industry will double in size in the next decade

CPG startup funding has experienced an 8X increase in the last six years

Customers are purchasing personalized products today

Consumers are already Generation Y and Z

🗣 \$22 bn

US market has been taken by upstarts in the last five years

Grocery sales will be online by 2025

US homes already shop for food and beverage online

Share of the CPG market will be in grocery in 2025

Opportunities that D2C is deriving for CPG Brands

Revenue Growth: Establish direct

connection with customers, increase engagement and conversion rates through their own e-Commerce channels.

Improved Margins:

No longer need to outspend the competition for better in-store positioning and promotions through pricing, or negotiate pricing with retailers for paper-thin margins.

Dimensions	Traditional		Digital
Reach	Finite	•	Unlimited
Personalization	Mass market	•	Personalized
Loyality	Basic	•	Advanced
Access to customer	Limited, periodic	•	Comprehensive, realtime
Pricing	Partial control	•	Full control
Speed to	Slow	•	Fast
Merchandising	Limited control	•	Full Control
Assortment	Limited	•	Full
CAPEX	High	•	Low

Expanded Market Reach:

Sell to the fastest growing markets with the most desirable customer segments, allowing them to go global overnight.

Improved Customer Data:

Leverage data generated by digital tools and platforms to better understand customers' preferences, lifestyles, demographics, path to purchase, identify/ target and nurture high value segments.

Comprehensive Product Assortment:

Provide a full assortment line of products while not being restricted to what is seen as hot selling items in physical stores.

This accentuates the **digital commerce** era where the CPG organizations need to significantly revisit and re-imagine their business model to go closer to the digital experience, more than ever, and establish themselves as **direct-to-consumer (D2C)** brands by innovating themselves around below mentioned constituents:

- Extend fulfilment capacity by enabling drop-shipment as a capability / order integration for last mile fulfilment setup and delivery
- Create store/web front within the marketplace with catalogue integration
- Establish own e-Commerce site/commerce-engine that enables order management extensions

Therefore, D2C brands must determine how to innovate the path to purchase channels, reconfigure the products, services and ecosystem, and deliver differentiated value to the consumers.

Our Solution and Framework Approach

Our Consultative Framework "CPG Starter Kit"

Whether CPG organizations intend to create a D2C channel for the first time or to invest deeper into an existing implemented platform, it's imperative to first understand what consumers want from a direct relationship (multi-channel/Omni-channel) and then build the digital commerce ecosystem around those requirements by gaining access to customer data, feedback, and insights for product enhancement and personalized delivery.

To enable this mechanism, we have developed a consultative framework CPG Starter Kit - the key objective of which is to assess the end-to-end value chain from products-to-platform and help deliver a rapid D2C enablement project to operationalize the digital commerce behavior with following tenets in place:

- Product Strategy
- MVP capabilities
- Fulfilment Strategy
- Revenue Accounting
- Operational Changes
- Go-Live

Decision-Making of Product range to offer, Product Price, Product Packaging, Information(For SEO), Campaign Setup

01 **Product** Strategy Include Timelines and 02 06 what all is included in the **Fulfilment Go-Live** service Strategy D2C-CPG **Starter Kit** Key tenets All sales will be accounted against a single customer account (D2C account) and 03 05 D2C Commerce will send the Revenue **Operational** Consolidated Billing Information Accounting Changes at the end of the day. Revenue to be recognized post delivery and AR adjusted accordingly 04 D2C MVP

Decision making on operating Model that will be adopted by the company- a) Own Ops b) Outsource Ops c) B2b2C via

Warehouse layout, loading bay area management, outer wrapping materials etc. all need to be reviewed. Also Tie-ups with Parcel delivery Providers will need to be established. Retraining of Operational staff will need to be considered

Include, customers browsing as guests, adding products to cart, and checking out to by paying through the payment options available. Integration of Orders downstream, Goods Issue/Delivery Confirmation

Capabilities

Our Solution: Commerce-in-a-Box

HCLs Commerce in a Box (CIB) provides a powerful customer interaction platform (store front/web front/commerce led) for Omni channel commerce. CIB is a customizable, scalable, and high availability solution that is built to leverage open standards. It can be used by companies of all sizes, and for many different industries. It provides easy-to-use tools for business users to drive increased conversions, 90-days go-live time and single ownership to drive efficiencies.

How **Commerce-in-a-Box** is an extension to CPG Starter Kit

Existing Sales Channel

CPG companies have existing consumer sales channels through retailers and distributors

Shipment

CPG companies typically ship in pallets and not in small packaging that is needed by consumers. So there is always a need of a partner/3PL provider for shipping

B2B Commerce

B2B commerce and market place integration is big for CPG companies, so this is part of basic features for them

Recurring Orders

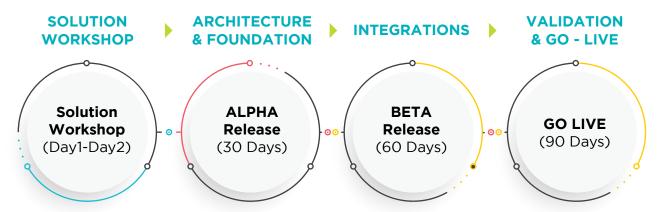

Consumers tend to make repeat purchases so there is a need of recurring orders/subscriptions

What Commerce-in-a-Box delivers for CPG organizations

- Web store for both D2C and B2B
- Business tools for easy setup of customer specific category, product, promotion and tiered pricing
- Digital marketing services
- Distributed order management for dropping shipments through partners and 3PL providers
- Out of box support for major credit cards and PayPal
- Go live in 90 Days

Our Success Stories

A Leading Sportswear Brand

For a leading sportswear brand, we led the digital transformation project, helping boost digital sales through seamless customer journeys, and increased customer loyalty.

Business Benefits:

- 4% rise in the number of online visitors by enhancing the digital experience
- 5% increase in sales through the digital channel since launching the new site
- Fast and seamless upgrades of the HCL solution by using out-of-the-box functionality

A leading beverage company

HCL helped a leading beverage company which was contemplating company-wide digital transformation exercise to enable Platform Refresh with the necessity of moving applications and infrastructure to cloud, so that a small revenue of stream could start in D2C space.

Business Benefits:

With the centralized integration of website, the outcome delivered is the enablement of enhanced digital engagement and Omni-channel commerce hub to achieve common central intelligence area for all promotions, pricing and products that could help the client to bring agility in creating promotions and sell in market places.

Hello there! I am an Ideapreneur. I believe that sustainable business outcomes are driven by relationships nurtured through values like trust, transparency and flexibility.
