

DFX Platform

A scalable, extensible and flexible DFX framework that has collection of application, processes and technologies that are coupled with customization and support services based on customer needs.

DFX Enterprise platform to drive design quality, reduce product cost, bring in traceability and improve time to market

Cost Add on

DFMPro cost add-on provides early cost visibility to design engineers right from when designs are getting created.

DFX Analytics

Enabling organizations to develop more collaborative and data driven culture

DFX Analytics Provides Value Across the Enterprise

Ensuring DFX Best Practices

Improves Effectiveness of DFX Reviews

Track DFX Issues for Program Success

Ensure Success of DFX Initiatives

“

Celestica expertise is in design and engineering, electronics manufacturing and supply chain management services. Our suite of solutions spans the entire product lifecycle- from design, through to delivery and after market support. Geometric DFX (rights reserved logo) solution helped us to improve productivity by almost 12% and helped us to identify quality issues earlier right during design phase.

Frank Huang
ME Director, Celestica

DFMPro helps our designers quickly identify the issues which are otherwise difficult to capture at the design stage. These issues include things like mold wall thickness and undercuts in plastic parts, incorrect bends in sheet metal parts which cause problems downstream. This tool helps our design teams understand the processes involved in manufacturing. In other words, helps them understand how to Design for Manufacturing. This leads to a significant reduction in design iterations due to issues with manufacturability and a reduction in design checking time. Our aim is to get designs right the first time and this tool helps us achieve this goal.

SK Pradeep Kumar
Director, E&T Capabilities

George Angelov
Director, Global Prototyping & Planning,
Whirpool

Now 3D design data of our products are checked by the DFMPro in the design process. Our conventional checking process by designers was highly time-consuming. In contrast, the DFMPro checking is truly fast and reliable in searching the parts to be redesigned or corrected, and the checking criteria can be customized for the appropriate checking of our own products. As a result, we successfully reduced 75% of the checking time of the wall thickness to enhance the efficiency and effectiveness of our design improvement before the release of drawings.”

Kaoru Mizoroki
Group Manager, Toshiba Corporation

”

Hello, I'm from HCL's Engineering and R&D Services. We enable technology led organizations to go to market with innovative products and solutions. We partner with our customers in building world class products and creating associated solution delivery ecosystems to help bring market leadership. We develop engineering products, solutions and platforms across Aerospace and Defense, Automotive, Consumer Electronics, Software, Online, Industrial Manufacturing, Medical Devices, Networking & Telecom, Office Automation, Semiconductor and Servers & Storage for our customers.
