Providing a powerful, secure, efficient and stable foundation

The Intel vPro® platform provides the key foundation for FlexSpace in delivering a holistic experience. It enables businesses to build a modern, flexible, secure and responsive workplace. The Intel vPro platform delivers the latest PC technologies in one validated solution for IT needs and employee requirement. It brings together business-class performance, hardware-enhanced security features, modern remote manageability, and PC fleet stability.

The Intel vPro® platform provides FlexSpace with business-class performance, hardware-enhanced security features, modern remote manageability, and PC fleet stability.

Business-class Performance

The Intel vPro® platform delivers business-class PC performance right out-of-the-box to power workforce productivity, faster data analysis, simplify connectivity and extend battery life. IT and users can reap the full benefits of the platform regardless of which form factor works best for them.

Hardware-Enhanced Security

The Intel vPro® platform is architected with enhanced hardware-based security features that help minimize the risks associated with security threats. Part of the Intel vPro® platform, Intel® Hardware Shield provides enhanced protections against attacks below the OS and advanced threat detection capabilities for increased platform security.

Remote Modern Manageability

IT can remotely manage and repair PCs, kiosks, digital signage, and more, even when these devices are powered off or out of band. As part of the Intel vPro® platform, Intel® Active Management Technology (Intel® AMT) can help cut the costs of IT service calls. Intel® AMT using the Intel® Endpoint Management Assistant (Intel® EMA) tool enables management of devices both inside and outside the corporate firewall, even when out of band.

PC Fleet Stability

The Intel vPro® platform gives IT and end users the stability and reliability of a true business-class device—in one integrated and validated solution—with the latest PC technologies. Intel works closely with OEM partners to ensure PCs have met rigorous criteria and testing requirements for a comprehensive list of components. This delivers outstanding quality, reliability, and compatibility that reduces the burden on IT.

Making business work better

FlexSpace, powered by the Intel vPro® platform, offers a kaleidoscope assessment of business personas and site categorization. It helps organizations choose the right blocks from the service catalogue and delivers business benefits that include:

DRIVING THE FUTURE AHEAD

Businesses are transforming to become more focused on digital workplace solutions. They realize that the key value creating asset is the user. Hence the traditional segregated model for acquisition, support, value and experience delivery is poised for a change. A digital company with digital tools and digital workplace solutions is the milestone to be achieved via an effective digital workplace strategy.

HCL FlexSpace, powered by the Intel vPro® can help achieve this and enable businesses to fundamentally change the way digital workplace services are consumed.
