

# LibreSpace

Reinventing the way of work with a fully managed Workspace-as-a-Service

# About the Solution

A global crisis and world-wide shutdowns have led to a major shift in the attitude of both organizations as well as the workforce. While most organizations have expressed their intent to increase remote working even after the crisis stabilizes, others have offered to make remote working permanent. The changing complexity of work has led enterprises to reimagine and reconfigure their workplace to ensure superior user experience. This helps their teams connect seamlessly and optimize work.

HCL's LibreSpace is an end-to-end Workspace-as-a-Service, powered by Nutanix and Citrix Technologies. It offers the end-users a personalized workspace to work smarter, faster, from any device, and from anywhere.

LibreSpace delivers fluid and modern workspaces that eliminate the traditional barriers of rigid and inflexible IT. It helps enterprises address unique demands of the modern user and modern IT. It is a fully managed, truly hybrid, Workspace-as-a-Service offering that maximizes employee experience, improves productivity while making IT operations seamless.

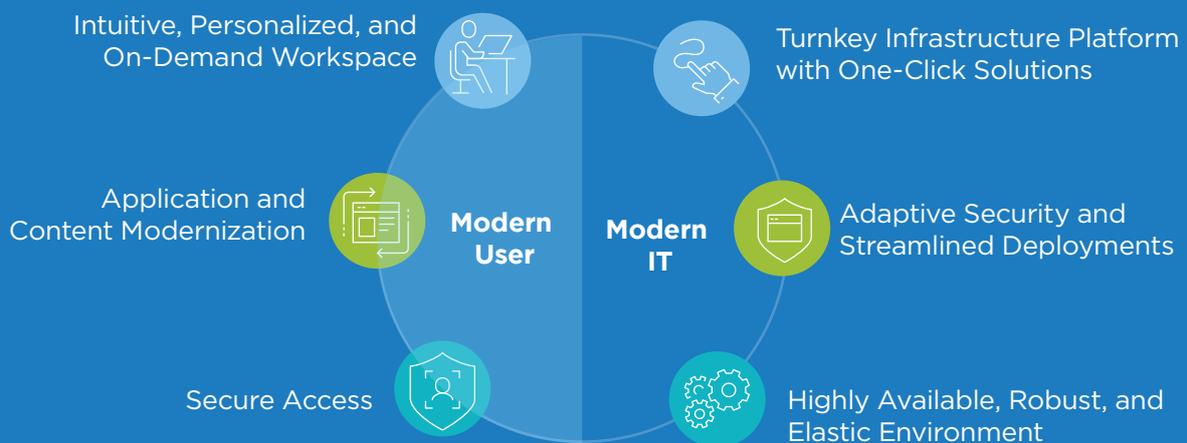

Over **80%** of business leaders plan to permit remote working after pandemic

**47%** intend to allow employees to work remotely on a full-time basis

**43%** would grant flex days

**42%** would provide flex hours
