

# DEEP ROOTS **NEW** **POSSIBILITIES**

BUILDING DIGITAL ENTERPRISE  
WITH **ORACLE CLOUD**

HCL Oracle Tools and Accelerators

**COMIT** the Custom Object Migration Tool, that will fetch a comprehensive report of the customizations in the DB and also analyse the impact of custom objects during Upgrades.

**Provantage** configured with Business KPIs and IT KPIs, that can be used for effective monitoring and proactive solutioning by both Business and IT Teams.

**Month End Dashboard** providing a holistic view of the Month End pending transactions to the Finance Business team. Supports AP, AR, GL and INV modules.

**iLoad** data conversion utility compatible with R12 that encompasses 23 conversion templates which are readily available to import data into Oracle.

**MEDHA - Oracle Virtual Private Assistant** with whom the business users can interact directly rather than signing in to Oracle. Could be an interactive, request for action or request for data in Oracle.

**Robotic Process Automation** enabling customers to sense the feel of bots performing their tasks in Oracle, thus reducing OPEX and improving customer experience

**iFusion** the Data migration utility from EBS to Cloud. Faster migration to Cloud with less efforts! Presently supports 12 templates in Finance and SCM areas.

**Rapid Deployable Offering** the Jump Start Kit to enable seamless and faster transformation to Cloud. This prescriptive offering for Cloud covers R2R, O2C, P2P, H2R business processes.
