

21ST CENTURY **CYBER SECURITY**
FOR MEDIA AND BROADCASTING

THE AGE OF DISRUPTION: THE AGE OF CYBER THREATS

While the digital era has brought with it significant advances in technology, capabilities and experiences, it has also opened the doorway to continuously evolving threats, stringent IT governances and compliances, and cloud service adoption. With sensitive data being collected, processed, and disseminated within the infra and cloud environment, it is imperative to implement robust network and infrastructure security—leveraging greater depth and breadth of knowledge, toolsets, and other resources. This onset of the new breed of cyber attacks over the time stands as a grim reminder that the organization’s IT requires the expertise and resources to assess and enhance network and infrastructure security.
