

# Global Coating company

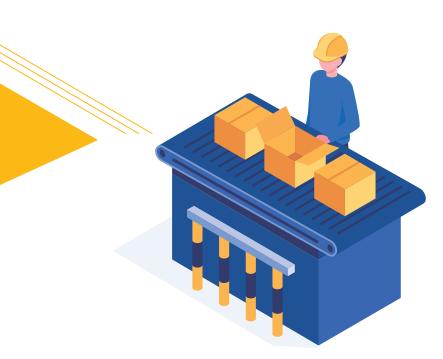

Redefining the future growth strategy with SAP on Azure

#### **About the client**

The client is a leading global coating company dedicated solely to the development, manufacture, and sale of liquid and powder coatings. It has 150+ years of experience in the coating industry operating in 130 countries with 52 manufacturing plants, 4 technology centres and more than 13,000 people who develop, manufacture, distribute and support their products and services. The client provides a range of performance and transportation coatings for manufacturers of light and commercial vehicles, the refinish aftermarket future proofing and for many industrial applications. Their innovative products and services include paint and powder, colour matching tools, application technologies, and customer training, support and business management systems.

# **Business Challenge**

The business identified the need for an agile and fast delivery of project infrastructure with SAP HANA footprints. The following were the major business challenges:

- Agile Implementation of SAP S/4 HANA without disruption to the legacy R/3 4.6c system
- Flexibility to scale the environment as solution matures in the multi-phased corporation wide roll-out of of S/4HANA

- Optimized Disaster
  Recovery capabilities
- Reduced lead time for capacity planning

Reduced governance and oversight of IT systems

## **Solution Highlights**

HCL led the deployment of the client's SAP Central Finance environment on Public Cloud Platform. HCL was able to implement agile and fast delivery of project infrastructure within days for mid-size SAP HANA footprints using the Azure M-Series virtual compute. Further, HCL future-proofed the growth path with larger M-Series virtual computes up to 4TB HANA instances. The following were the major solution highlights provided:

- Microsoft Azure Cloud Environment setup as per best practices
- Production high availability deployment with 99.95% uptime SLA
- Out of region DR solution utilizing native SAP and public cloud functions
- Azure M-Series for SAP HANA and ESv3 Series for application compute
- Azure Active
   Directory (AAD)
   integration for Single
   Sign-On
- Integration into legacySAP environmenthosted in SAP HEC
- Managed Services to support all aspects of SAP and Non-SAP components running in Microsoft Azure

## **Benefits Delivered**

HCL worked closely with the customer's team to transform their SAP environment. The transformation had immediate benefits for the client, making the whole system more flexible and cost-effective with consumption-based cloud operations. The collaboration enabled a faster delivery of the project infrastructure within days for mid-sized SAP HANA footprints. Following were the major benefits delivered:

Reduction in overall infrastructure spends

Capacity Planning lead time reduction

Automated and streamlined business processes

Enhanced IT-Control System - Improved Governance

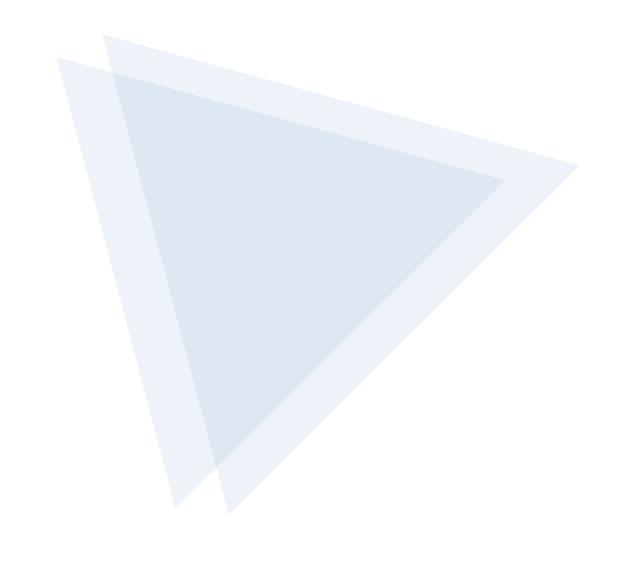

Out of Region solution utilizing native SAP and Azure Functions

Optimized Disaster Recovery capabilities

HCL Technologies (HCL) empowers global enterprises with technology for the next decade today. HCL's Mode 1-2-3 strategy, through its deep-domain industry expertise, customer-centricity and entrepreneurial culture of ideapreneurship $^{\text{M}}$  enables businesses to transform into next-gen enterprises.
