

Preventing data loss and **protecting** intellectual property

For a multinational pharmaceutical company,
using DLP deployment

Customer profile

A multinational pharmaceutical corporation, headquartered in Switzerland. The client is one of the largest pharmaceutical companies in the world.

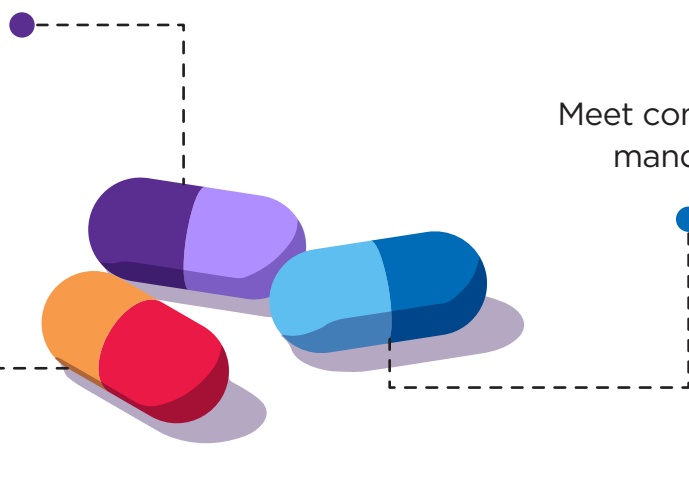

Business need

The client needed to comply with data privacy mandates and manage intellectual property risks. To achieve this, the requirement was to develop and support a program aimed at preventing data loss. The business needed to:

Implement single centralized data loss prevention (DLP) program

Meet compliance mandates

Evaluate internal resources

HCL solutions and services

The process of implementing solutions was laid out in four stages:

- 01 Planning the end-state roadmap:** The program roadmap included the technology selection, as well as the design and transformation process.
- 02 Framing the solution architecture, which involved the following:**
 - Architecting the controls
 - Understanding the scope - Regulatory requirements and security functions
 - Defining appropriate processes
- 03 Solution deployment, the process consisted of:**
 - Ensuring pre-requisite readiness
 - Deploying data loss prevention technology
 - Implementing policy configuration
 - Process implementation
- 04 Post-deployment services:** This involved the transition to DLP program and go-live. Ongoing support services such as process improvements, platform and security incident support, and reporting were implemented post go-live.

The pharmaceutical company was able to remain compliant and secure its IP with HCL's DLP deployment.

HCL

HCL Technologies (HCL) empowers global enterprises with technology for the next decade today. HCL's Mode 1-2-3 strategy, through its deep-domain industry expertise, customer-centricity and entrepreneurial culture of ideapreneurship™ enables businesses to transform into next-gen enterprises.

HCL offers its services and products through three lines of business - IT and Business Services (ITBS), Engineering and R&D Services (ERS), and Products & Platforms (P&P). ITBS enables global enterprises to transform their businesses through offerings in areas of Applications, Infrastructure, Digital Process Operations, and next generation digital transformation solutions. ERS offers engineering services and solutions in all aspects of product development and platform engineering while under P&P. HCL provides modernized software products to global clients for their technology and industry specific requirements. Through its cutting-edge co-innovation labs, global delivery capabilities, and broad global network, HCL delivers holistic services in various industry verticals, categorized under Financial Services, Manufacturing, Technology & Services, Telecom & Media, Retail & CPG, Life Sciences, and Healthcare and Public Services.

As a leading global technology company, HCL takes pride in its diversity, social responsibility, sustainability, and education initiatives. As of 12 months ending on December 31, 2021, HCL has a consolidated revenue of US \$ 11.18 billion and its 197,777 ideapreneurs operate out of 52 countries.
