

**HCL HELPS GLOBAL ENGINEERING AND MINING LEADER ACHIEVE STREAMLINED BUSINESS PROCESSES THROUGH FOCUSED MOVEX/M3 APPLICATION CUSTOMIZATIONS AND ENHANCED DOCUMENTATION**

### About the Client

The customer is a global leader in the high-tech engineering and mining space. They use multiple versions of Movex/M3, which are integrated with third-party systems.

### Challenges Faced

The company was grappling with gaps in the documentation of existing processes and functionalities, which affected their capabilities for driving business efficiencies. The practice of having multiple vendors managing the different Movex/M3 implementations led to further challenges, resulting in their M3 consolidation being put on hold.

### HCL's Approach

HCL identified several approaches including a need for customization of applications on Movex/M3 and a comprehensive assessment of M3 consolidation. An SME was onboarded across manufacturing, finance, and technical administration. The client also received a clear-cut consolidation of business documentation. Test automation was implemented to streamline the integration and migration processes.

### Benefits

The HCL approach delivered a series of tangible benefits including:

- 30% reduction in execution time cycle
- Standardized frameworks and test processes
- Detailed documentation to enable M3 consolidation
- A customized data migration framework adopted to minimize efforts and increase Total Cost of Ownership during consolidation and roll out
