

Scaling digital enablement through DevOps-led transformation

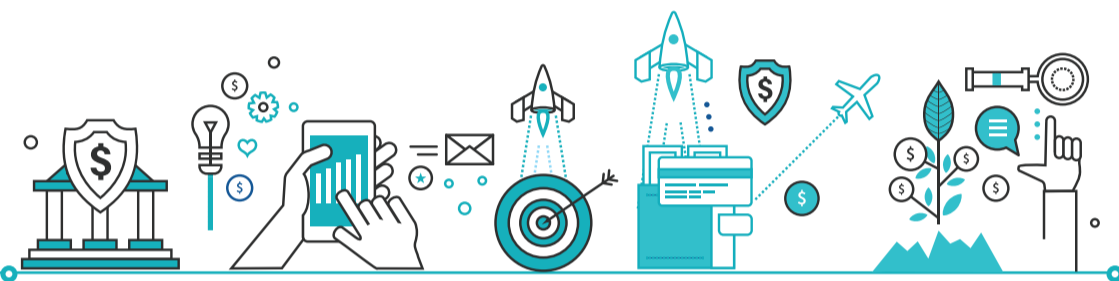

Client Description

One of the largest gas distributors in the United Kingdom. The company manages the network that distributes natural and green gas to 5.9 million homes and businesses across Scotland and the south of England.

Business Challenges

- To transition myriad enterprise applications to cloud in a bid to rapidly respond to changing business needs
- Skyrocketing costs owing to multiple heterogeneous applications with inconsistent processes and large data volumes
- Delayed decision making and application launches owing to an isolated technology stack and lack of automation
- Security concerns and high manual intervention in hosting and managing business applications

Our Solution

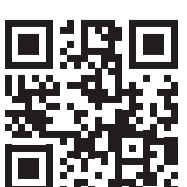

- Established a fully automated DevSecOps platform via a Zero-Touch, Zero-Trust architecture to enable rapid application delivery and guard against modern cyberthreats
- Modernized the IT landscape by leveraging iPaaS MuleSoft for API based cloud-to-cloud and hybrid integrations
- Enabled an agile and responsive technology foundation by automating static and dynamic assessment of application code

Business Impact

- Significant cost savings owing to 10% reduction in infrastructure footprint
- Reduction in overall application deployment efforts due to end-to-end automation
- Agile and secure application landscape owing to the DevSecOps platform
- Faster time-to-market as a result of integration with the open-API platforms
