

Network Security Maturity Workshop

Summary

It is increasingly important to ensure that your organization has a firm understanding of the network security requirements and how to get the most out of your current investment. HCLTech's Cybersecurity Consulting Services partners with you to build a path forward to get more value out of your solutions. Our consulting team - which brings decades of experience integrating and operationalizing our products - offers an onsite or remote Network Security Maturity Workshop. While this is typically a paid engagement, we will deliver this free of charge as an investment in improving your environment and strengthening our partnership. This is a high-level discussion focused on the organizational programs and processes that

encompass network security technologies. The key attendees for this workshop are senior decision-makers for network security such as the strategic leader for network security and the operational leader for network security technologies. The operational and strategic team members associated with the two leaders described are also welcome to attend and may provide greater insights as we discuss specific details of how strategic guidance makes its way to operational implementation.

Who should attend?

Network security stakeholders

Engineering/
Operations team(s)

Other relevant team members (optional)

Logistics

We provide a facilitator and delivery experts to drive the workshop and share information with you

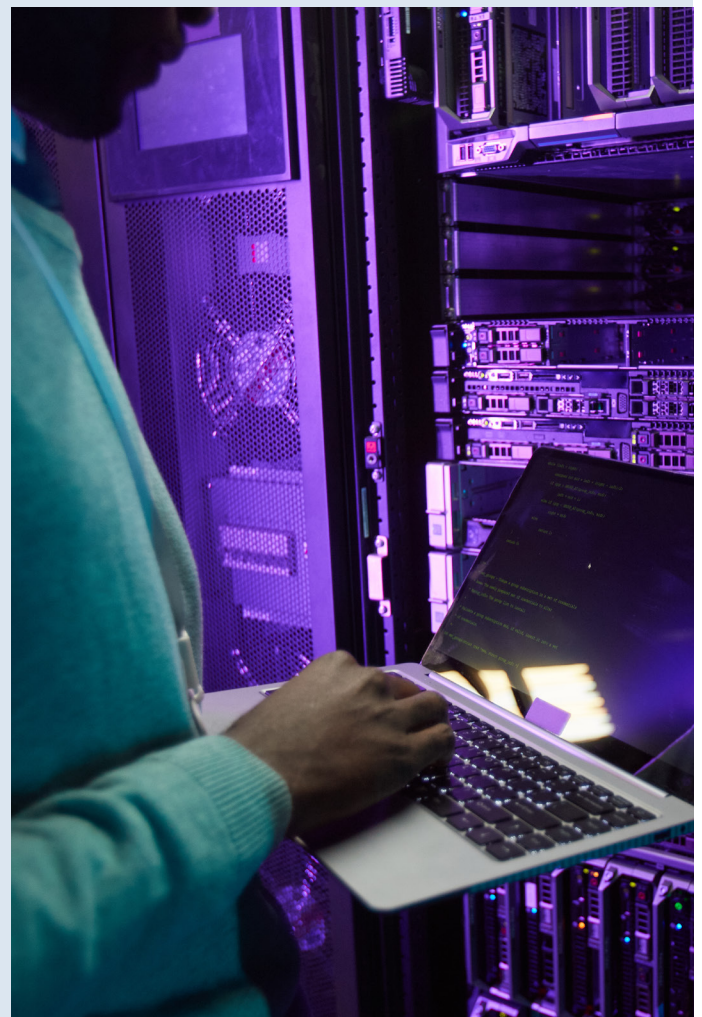

Typically involves resources from your IT, Security, Compliance and Architecture teams

4 hours with 4 to 8 resources from your team

An interactive information-sharing activity that gives you the ability to collaborate with high-level security practitioners who have deployed our technologies for similar clients

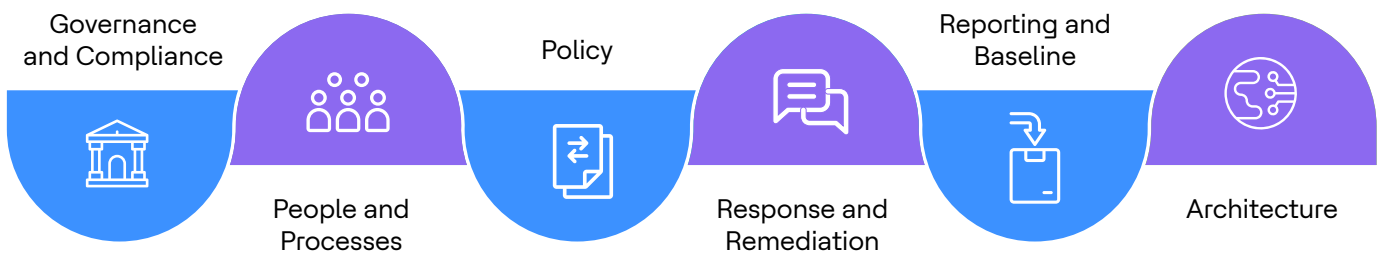

Agenda

Time	
9:00 to 9:15	Introductions, overview, and ice breaker
9:15 to 9:45	Understand your goals and challenges
9:45 to 11:45	Discuss product maturity best practices
11:45 to 12:45	Measure product maturity
12:45 to 1:00	Workshop wrap-up and review of next steps

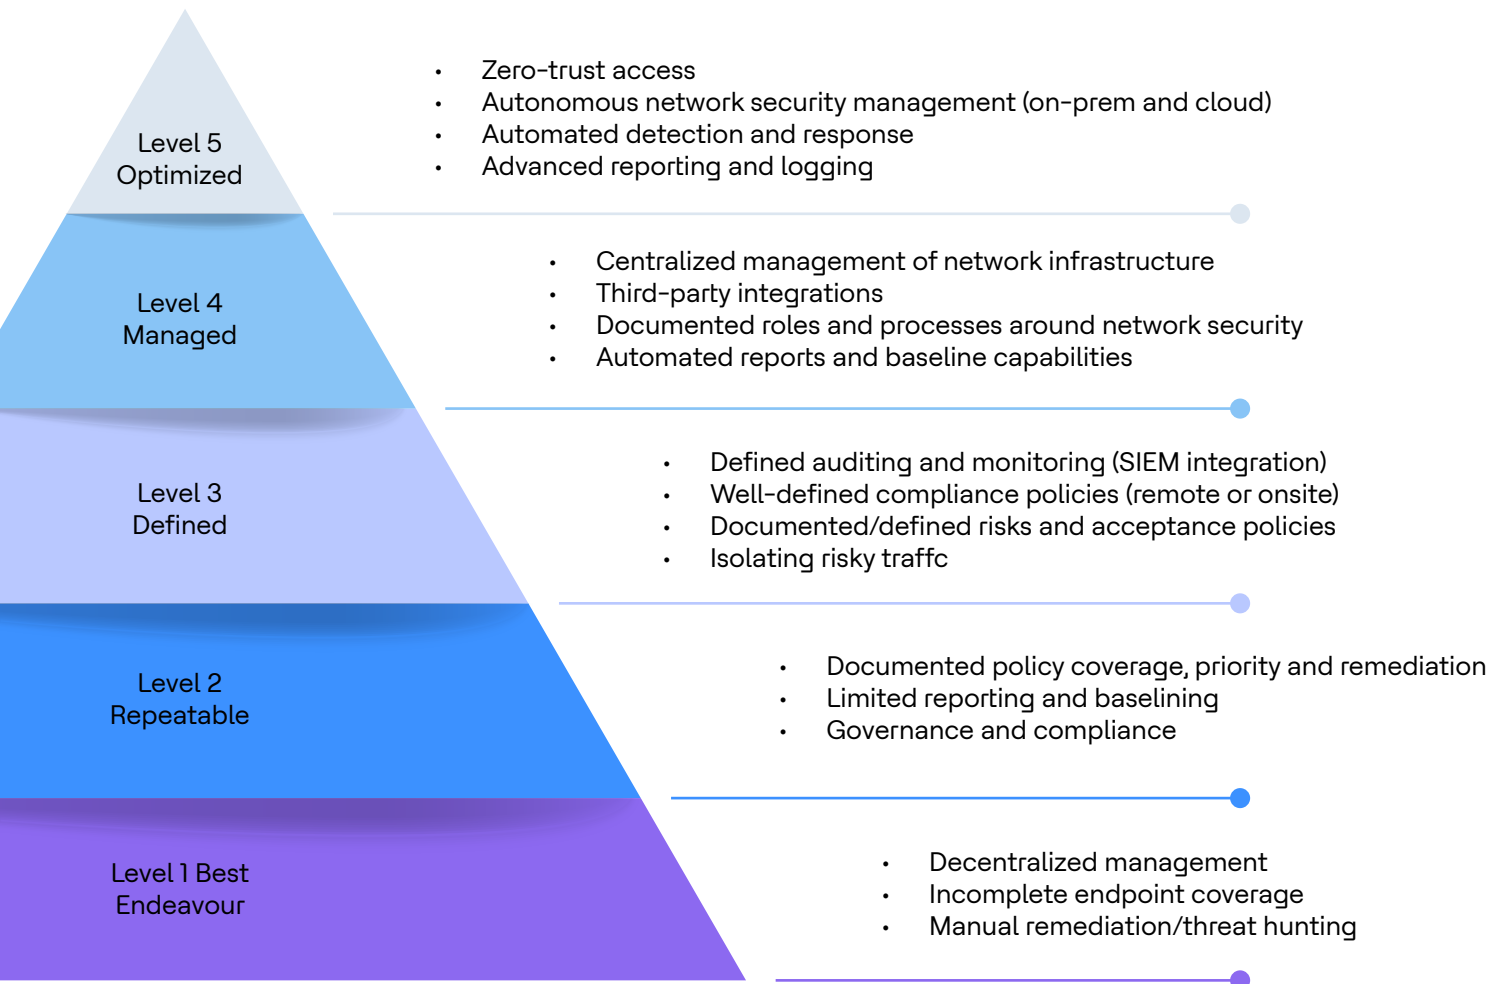

*Assumes 9 AM workshop start and 4-hour commitment

Maturity model elements

Value delivered

- Quickly catalog your concerns so that we can subsequently develop a mitigation action plan
- Analyze best practices over the six key maturity model elements: program governance, enterprise coverage, policy coverage, remediation, security awareness and metrics and reporting
- Ensure we understand your current technical and business goals around network security
- Provide you with a deliverable you can share with executive leadership that will provide valuable input for your network security roadmap
- Provide you with direct access to practitioners who deploy these technologies daily and allow you to learn best practices from them
- Establish a maturity baseline across deployment, configuration and operational vectors so that we can measure the network security maturity over time

Why HCLTech's Cybersecurity Consulting Services

Our consultants deliver real-world value to guide you in improving your security posture through:

Real-life experience with operating solutions in the world's largest and most complex networks

Enabling faster diagnosis and resolution to issues through direct access to internal product teams

Utilizing subject matter experts, proven methodologies, and industry best practices

Optimizing policies and procedures and engaging measurable controls to realize greater program maturity

Providing informal training to improve your team's effectiveness

Driving increased value from existing security products
